University of Idaho Extension

4-H Summer Robotics Club

Attention youth ages 8-12! Twin Falls County Extension is offering a Summer Robotics 4-H Club that will focus on completing educational activities introducing LEGO MINDSTORMS-NXT programming. Youth will build and program a robot to drive fixed distances in set patterns, learn to break the large problems down into simpler ones and work with others to construct solutions to problems. Youth will be expected to complete a 4-H project that would include a presentation at the Twin Falls County Fair. This club will meet twice a week beginning July 7th at the Twin Falls County Extension office. The cost is $100.00 and includes 4-H membership dues, 2014 TFCo Fair Wrist Band and supplies needed to complete the project. This club is limited to the first 10 paid participants.
