Using Your GPS

A *Global Positioning System* or "GPS" receiver is becoming as common to work in forests as a compass. Yet many who own a GPS receiver feel they are only using a small portion of its capabilities.

This 4-hour program will introduce participants to the science underlying GPS and the range of tasks that can be accomplished with GPS and their accompanying technologies, such as mapping programs, Geographic Information Systems (GIS), and internet data sources. In the last half of the program, participants will practice field exercises with Garmin 76CSX receivers

The programs will be instructed by Chris Schnepf, University of Idaho Extension and Paul Gessler of the University of Idaho Department of Forest, Rangeland, and Fire Sciences.

Credits

- Society of American Foresters: 3 CFE credits.
- Idaho Pro-Logger: 3.5 CE credits.
- Idaho Master Forest Stewards: 3.5 CE credits.

Program Agenda

0:00 hr Welcome

0:10 hr Maps and Coordinate Systems

0:40 hr How Global Positioning Systems Work and Basic Applications
