Eddy	83	89	90	101	114	20	96	62.2	41	9
Average	86	96	94	123	143		108	60.4	41	2
LSD (0.05)	7	12	10	12	15		5	0.6	1	4
CV (%)	5	8	6	6	6		5	4	5	5

* Underlined varieties were statisticaly equal to the top yielder at each site.

This table includes new information from Tensed (Benewah Co.). This location was very wet through the spring and seemed to avoid the worst of our mini-drought. This location was tilled and followed lentils. Stripe rust was light but present, fungicide was applied once in the spring.
