Forest Stewardship  
Skills*

# Identifying Idaho's Trees

Because we have such a varied range of geography, soils, and precipitation patterns, Idaho has a wider variety of native trees than most other Rocky Mountain states. The first step in caring for these trees, whether they be in a landscape or in a forest, is correct species identification.

Distinguishing between Idaho's trees can be a daunting task for beginners. Through a combination of images and live samples, *Identifying Idaho's Trees* will help participants quickly identify Idaho's most common native trees, including:

- lodgepole pine
- ponderosa pine
- western white pine
- western larch
- Douglas-fir
- Engelmann spruce
- grand fir

- subalpine fir
- western redcedar
- western hemlock
- pacific yew
- black cottonwood
- quaking aspen
- red alder

*Identifying Idaho's Trees* will be held at the following dates and locations:

## Coeur d'Alene

Monday, Feb. 5, 2018 (6pm - 8pm)  
Kootenai County Administration Building  
451 N Government Way  
(lower level - enter by Vehicle Licensing)

## Sandpoint

Friday, April 6, 2018 (2pm - 5pm)  
UI Extension Bonner County Office  
Bonner County Fairgrounds

## Bonnets Ferry

Thursday, May 10, 2018 (6pm - 8pm)  
UI Extension Boundary County Office  
6447 Kootenai (behind the courthouse)

To ensure an effective learning environment, each session is limited to 40 participants. Please return the registration form on the back of this flyer as soon as possible, to assure your place and help us plan. A \$10 registration fee includes handouts and refreshments. For registration questions, contact the University of Idaho Extension Office listed for the program you will attend. For program questions, contact Chris Schnepf at (208) 446-1680.

An Idaho  
Forest Stewardship Program

Co-sponsored by:

- University of Idaho Extension
- Master Gardeners
- Idaho Dept. of Lands
- USDA - Forest Service
