Student Health Insurance Program
Student Health Pharmacy Formulary Guidelines

The University of Idaho Student Health Insurance Program (SHIP) Formulary is simply a list of medications. The list is not all inclusive and may be subject to change as new products and information become available. Some of the drugs are available under multiple brand and generic names. This list may not include all the names that are available for a specific drug. The list is updated monthly and subject to change. For the most current list, visit our website at www.health.uidaho.edu/pharmacy.

Newly Approved Prescription Drugs
Recently approved and marketed drugs will be considered non-formulary until review to determine if they will be added to formulary.

Quantity Limits
Restrictions on quantity per co-pay have been placed on certain high cost, low dosing frequency medications, i.e. triptans. The following maintenance medications may be obtained in 90 day supplies: birth control, hormone replacements and thyroid hormones or therapies.

Limitations

• Isotretinoin medications (i.e. Accutane) are excluded with the exception of a cystic acne diagnosis
• Availability for non stocked items:
• Same day availability: medications stocked in Student Health Pharmacy
•Next business day availability: all Legend, CV, CIV, and CIII scheduled medications
•Next week availability: CII scheduled medications

Exclusions
• Fertility drugs
• Experimental drugs or, as noted above, medications that are not maintained on the formulary
• Immunization agents, biological sera, blood or blood plasma
• Prescription drugs for smoking cessation or other health enhancement programs
• Medications which are subject to prior authorization
• Medications for treatment of sexual dysfunction and obesity in addition to being non-formulary are excluded from the prior authorization process
• Birth control devices and IUD's
• Medications that are not readily available through the Student Health Pharmacy supplier.

NOTE—Non-formulary Drugs are not available at the Student Health Pharmacy.
