U of I College of Agricultural & Life Sciences
Entomology, Nematology and Plant Pathology

Area of Emphasis Form

Name

Last (Family)  First  Middle

Entomology:

Areas of emphasis for the graduate student in Entomology include: agricultural entomology; biological control of insects and weeds; insect biology, insect ecology; insect-plant interactions; insect transmission of plant viruses; plant resistance to insects; and integrated management.

Plant Pathology:

Areas of emphasis for the graduate student in Plant Pathology include: plant disease biology, plant sciences, biology, mycology, microbiology, virology, nematology, ecology, disease management, plant resistance to plant pathogens, molecular biology, plant microbe interactions and entomology.

EPPN faculty also advise graduate and undergraduate students in the Environmental Science program if the student’s research interests match the respective faculty’s area of expertise.
