

## MAT.07.CR.2.000EE.D.158

Sample Item ID:	MAT.07.CR.2.000EE.D.158
Grade:	07
Primary Claim:	<b>Claim 2: Problem Solving</b> Students can solve a range of well-posed problems in pure and applied mathematics, making productive use of knowledge and problem-solving strategies.
Secondary Claim(s):	Claim 1: Concepts and Procedures Students can explain and apply mathematical concepts and carry out mathematical procedures with precision and fluency.
Primary Content Domain:	Expressions and Equations
Secondary Content Domain(s):	
Assessment Target(s):	2 D: Identify important quantities in a practical situation and map their relationships (e.g., using diagrams, two-way tables, graphs, flowcharts, or formulas).  2 A: Apply mathematics to solve well-posed problems arising in everyday life, society, and the workplace.  1 D: Solve real-life and mathematical problems using numerical and algebraic expressions and equations.
Standard(s):	7.EE.1, 7.EE.2, 7.EE.4, 6.EE.7
Mathematical Practice(s):	1, 2, 3, 4, 7
DOK:	2
Item Type:	CR
Score Points:	3
Difficulty:	M
Key:	See Sample Top-Score Response.
Stimulus/Source:	
Target-Specific Attributes (e.g., accessibility issues):	Calculator may be used
Notes:	

All books in a store are being discounted by 30%.

**Part A**

Let  $x$  represent the regular price of any book in the store. Write an expression that can be used to find the sale price of any book

in the store.

Expression

**Part B**

Jerome bought a book on sale at the store. The sale price of the book was \$8.96. Write and solve an equation to determine the regular price of the book to the nearest cent.

Equation

Regular Price of Book

*Sample Top-Score Response:*

**Part A:**  $x - 0.30x$  or  $0.70x$

**Part B:** The regular price of the book was \$12.80.

$$\begin{aligned}x - 0.30x &= 8.96 \\0.70x &= 8.96 \\x &= 12.80\end{aligned}$$

*Scoring Rubric:*

Responses to this item will receive 0–2 points, based on the following:

- 3 points:** The student is able to create both an expression and equation related to sale and regular prices of a book, and solve the equation correctly.
- 2 points:** The student is able to create both an expression and equation related to sale and regular prices of a book, but makes a minor error in solving the equation.  
**OR** The student is able to use alternate strategies to find a correct answer for the price of the book, but doesn't know how to correctly show the expression or equation.
- 1 point:** The student can write either the expression or the equation correctly, but not both. The student is not able to get the correct answer for the price of the book.
- 0 points:** The student shows inconsistent or no understanding of writing expressions, or of solving an equation for real-life problems.
