I. Introduction

The Idaho State Department of Agriculture (ISDA) is pleased to announce the competitive solicitation process to award Specialty Crop Block Grant Program (SCBGP) funds for projects that solely enhance the competitiveness of specialty crops in Idaho. The United States Department of Agriculture (USDA), Agricultural Market Service (AMS) has allocated these funds to the states and ISDA will be passing through funds as competitive grants.

The requirements and procedures listed below are based on federal rules and regulations for SCBGP funds. **Specialty crops are defined by USDA as fruits, vegetables, tree nuts, dried fruits, horticulture and nursery crops** (see Appendix E for a list of specialty crops).

II. Eligible Entities

ISDA is seeking proposals from eligible non-profit organizations, local, state, and federal government entities, for-profit organizations, and universities for projects that aim to enhance the production and competitiveness of Idaho specialty crops. In order to be eligible to participate, applicants must reside in or their business or educational affiliation must be in Idaho.

III. Eligible Grant Projects

Limit each application to a single project scope. Each applicant may submit up to two applications. If submitting two applications, specify the priority of the projects.

A. Enhance the Competitiveness of U.S. Specialty Crops

To be eligible for a grant, the project(s) must solely enhance the competitiveness of U.S. specialty crops in either domestic or foreign markets.

Project areas may include (but are not limited to) the following issues affecting the specialty crop industry:

- Increasing child and adult nutrition knowledge and consumption of specialty crops
- Pest and disease control
- Sustainability
- Enhancing food safety
- Developing new and improved seed varieties
- Improving efficiency and reducing costs of distribution systems
- Assisting all entities in the specialty crop distribution chain in developing “Good Agricultural Practices”, “Good Handling Practices”, “Good Manufacturing Practices”, and in cost-share arrangements for funding audits of such systems for small farmers, packers and processors
- Investing in specialty crop research, including organic research to focus on conservation and environmental outcomes
- Participation of industry representatives at meetings of international standard setting bodies in which the US government participates

B. Benefit More Than One Product or Organization

Applications for grant funds should show how the project potentially impacts and produces measurable outcomes for the specialty crop industry and/or the public rather than a single organization, institution, or individual. ***Grant funds will not be awarded for projects that solely provide a profit to a single organization, institution, or individual.*** Single organizations, institutions, and individuals are encouraged to participate as project partners.

The following are some examples of acceptable and unacceptable projects:

Example of an Unacceptable Project

- A company requests grant funds to purchase starter plants or equipment used to plant, cultivate, and grow a specialty crop for the purpose of making a profit, or to expand production of a single business.

Examples of Acceptable Projects

- A university requests funding to conduct research on the feasibility of planting, cultivating, and growing a specialty crop in a particular area, the results of which can be shared with many growers throughout the State.
- A single grower requests funds to demonstrate the viability of organic small fruit production and partners with Cooperative Extension to publicize the working model of diversification to other regional growers.
- A single company requests funds to provide a viable pollination alternative to specialty crop stakeholders in the region, which currently does not have one.
- A single specialty crop organization requests funds to conduct an advertising campaign that will benefit their specialty crop members.

C. Completed Within Two Calendar Years

Projects must be completed within two calendar years after the grant agreement is signed.

D. Multi-State Partnerships

Multi-state projects are encouraged to provide a growing need for solutions to problems that cross state boundaries. If interested in submitting an application involving multiple states, be sure to contact all state's Specialty Crop program managers to ensure you are following with states application procedures. The submitted application should clearly note that the proposed activity is multi-state, listing all states involved, and the amount requested from each state. Requested funds should be specified in the Line Item Budget, (Exhibit B) specifying which state will be funding each line item (or percent of a specific item).

E. Match

Matching funds are highly encouraged, but not required. Match will be calculated into the scoring criteria with cash match receiving more points than in-kind contributions.

IV. Application Procedures and Requirements

All submissions must be in 12 pitch Time New Roman font with 1 inch margins.

Applications must include the Application Cover Sheet (Exhibit A), Project Proposal (**no more than five (5) pages**), Line Item Budget (Exhibit B), and Budget Narrative (Exhibit A and B are available on the ISDA website, www.agri.idaho.gov). Letters of support may be submitted with your application, but any other additional material will be discarded and not included in the review process.

A. Project Proposal

The project proposal must include the following seven categories and not exceed five pages.

- **Project Title and Abstract**
Include the title of the project and an abstract of 200 words or less.
- **Project Purpose**
 - Clearly state the purpose of the project. The purpose should include the specific issue, problem, interest, or need to be addressed and why the project is important and timely.
 - Indicate if the project will be or has been submitted to or funded by another Federal or State grant program and if the grant program duplicates efforts of the SCBGP-FB or the other Federal or State grant program. If it does not, how does it supplement?
- **Potential Impact**
 - Discuss the number of people or operations affected.
 - Identify the intended beneficiaries of each project.
 - Discuss the potential economic impact if such data are available and relevant to the project.
- **Expected Measurable Outcomes**
 - Describe at least one distinct, quantifiable, and measurable outcome that directly and meaningfully supports the projects purpose. The outcome-oriented objective must define an event or condition that is external to the project and that is of direct importance to the intended beneficiaries and/or the public.
 - Provide a timeframe when outcome measures will be achieved. Outcome oriented objectives may be long term that exceed the grant period.
 - Describe how the project outcome will be measured. Describe the plan that will be used to show performance improvements. Include a performance-monitoring plan to describe the process of collecting and analyzing data to meet the outcome-oriented objectives.
- **Work Plan**
 - Explain briefly the activities that will be performed to accomplish the objectives of the project.
 - Indicate who will do the work of each activity and the estimated timeframe.

- **Project Oversight**
Describe the oversight practices that provide sufficient knowledge of grant activities to ensure proper and efficient administration.
- **Project Commitment**
Describe how all grant partners commit to work toward the goals and outcome measures of the proposed project. Include letters of support from project partners and other key beneficiaries.

B. Budget Narrative

Provide sufficient detail in paragraph format about the budget categories listed below. All requested budget items/activities should correlate to the purpose/goals of the project and demonstrate that they are reasonable and adequate for the proposed work. If a project benefits other products than only eligible specialty crops, the project expenses may be prorated to reflect the percent of eligible specialty crops. Please see Appendix D - Budget Narrative Format for further information on preparing the budget narrative.

- **Personnel**
For each participant funded with grant monies, indicate their title, the percent of full time equivalents (FTE) and the corresponding salary for the FTE, or the hourly wage and number of hours spend on the project.
- **Fringe Benefits**
Indicate the rate of fringe benefits for each salary.
- **Travel**
Indicate the destination, purpose of trip, number of people traveling, number of days traveling, total airfare costs if applicable, total ground transportation costs if applicable, total lodging and meals costs if applicable, and total mileage costs for the travel if applicable. See Appendix D for more details regarding mileage and per diem rates.
- **Equipment**
Indicate anticipated purchases or rental costs of equipment and its intended use. List separately each item of equipment, its intended use, and its cost. Please see Appendix B for restrictions and limitations on grant funds for further guidance on equipment.
 - Capital expenditures for general purpose equipment, buildings, and land are unallowable as direct and indirect charges.
 - Capital expenditures for special purpose equipment are allowable as direct costs, provided that items with a unit cost of \$5000 or more have the prior approval of ISDA.
 - Rental costs of buildings and equipment are allowable as direct costs in accordance with the cost principles in Subpart T of 7 CFR 3015.
 - Capital expenditures for special purpose equipment that will every be used for anything other than activities solely benefiting specialty crops is unallowable.
- **Supplies**
Provide an **itemized** list of projected supply expenditures and the **dollar amount for each item**.

- **Contractual**
Provide a short description of the services each contract covers and the flat rate fee or the total hourly rate. Compensation for individual consultant services should be reasonable and consistent with that paid for similar services in the marketplace. Federal regulations for this grant limit consultant fees to \$500 per eight-hour day, excluding travel and subsistence costs.
- **Other**
Provide detailed descriptions of other costs such as conferences or meetings, communications, speaker/trainer fees, publication costs, and data collection, and other miscellaneous budgeted costs associated with each project.
- **Program Income**
If program income will be earned on any project, indicate the nature and source of program income and the estimated amount, and how the income will be used to further enhance the competitiveness of specialty crops. For example if registration fees are being collected at a conference as part of the project, indicate the estimated amount of registration fees that will be collected and describe how the registration fees will be used to solely enhance the competitiveness of specialty crops.
- **Matching Funds**
Matching funds are not required, but cash match from industry partners is encouraged and will be calculated into the scoring criteria. Note that cash match and in-kind match are to be reported separately on Exhibit B - Line Item Budget.

C. Submission Procedures

Applications must be post marked no later than **April 30, 2010**.

Submit applications in both hard copy (unstapled) and electronically on a compact disc in Microsoft Word and Excel format (no pdf's please).

Submit complete packets to:

Idaho State Department of Agriculture
Market Development Division
Attn: Lacey Menasco
2270 Old Penitentiary Rd
Boise, ID 83712

V. Administration of Grants

AMS applies the following federal grant uniform administrative requirements to the management of each grant award, and the Idaho State Department of Agriculture shall in turn apply these requirements to subgrantees based on the type of organization through contractual or cooperative linkages. For example, if ISDA subawards to a non-profit, the administrative requirements applicable to a non-profit will apply.

- State and Local Governments and Indian Tribal Governments - 7 CFR 3015 and 7 CFR 3016
- Colleges and Universities - 7 CFR 3015 and 7 CFR 3019
- Non-Profits - 7 CFR 3015 and 7 CFR 3019

- For Profits - 7 CFR 3015 and 7 CFR 3019

VI. Allowable Costs

All subawards are subject to those cost principles applicable to the particular organization concerned. For example, if ISDA subawards to a university, the cost principles applicable to a university will apply. Please refer to the applicable cost principles when developing your project activities and budget. You may reference Appendix A List of Selected Items of Cost Contained in OMB Cost Principles Regulations to locate the principles applied in establishing the allowability or unallowability of specific items of cost. **All costs must be associated with project activities that enhance the competitiveness of specialty crops.**

- State and Local Governments and Indian Tribal Governments - 2 CFR 225 (OMB Circular A-87). See Appendix B Unallowable and Allowable Costs for State Governments, for specific unallowable and allowable costs under the SCBGP-FB for State governments.
- Colleges and Universities - 2 CFR 220 (OMB Circular A-21).
- Non-Profits - 2 CFR 230 (OMB Circular A-122).
- For Profits - 48 CFR Part 31.2.

VII. Restrictions and Limitations on Grant Funds

- Grant funds may not be used to fund political activities in accordance with provisions of the Hatch Act (5 U.S.C. 1501-1508 and 7321-7326).
- Development or participation in lobbying activities pursuant to 31 U.S.C. 1352 including costs of membership in organizations substantially engaged in lobbying are unallowable.
- Capital expenditures for general purpose equipment, buildings, and land are unallowable as direct charges.

Capital expenditures means expenditures for the acquisition of capital assets (equipment, buildings, land), or expenditures to make improvements to capital assets that materially increase their value or useful life. Acquisition cost means the cost of the asset including the cost to put it in place. Acquisition cost for equipment, for example, means the net invoice price of the equipment, including the cost of any modifications, attachments, accessories, or auxiliary apparatus necessary to make it usable for the purpose for which it is acquired. Ancillary charges, such as taxes, duty, protective in transit insurance, freight, and installation may be included in, or excluded from the acquisition cost in accordance with the governmental unit's regular accounting practices.

General purpose equipment means equipment, which is not limited to research, scientific or other technical activities. Examples include office equipment and furnishings, telephone networks, information technology equipment and systems, reproduction and printing equipment, and motor vehicles.

Equipment means an article of nonexpendable, tangible personal property having a useful life of more than one year and an acquisition cost which equals or exceeds the lesser of the

capitalization level established by the governmental unit for financial statement purposes, or \$5000.

- Capital expenditures for special purpose equipment are allowable as direct costs, provided that items with a unit cost of \$5000 or more have the prior approval of ISDA and the item will only to be used to solely benefit the competitiveness of specialty crops. Special purpose equipment means equipment which is used only for research, scientific, or other technical activities.
- Rental costs of buildings and equipment are allowable as direct costs in accordance with the cost principles in Subpart T of 7 CFR 3015.
- Indirect costs are limited to 10% of the total grant funds. ISDA will be utilizing the 10%, therefore this is not an available category of funds for subrecipients.

VIII. Selection and Scoring Criteria

A selection committee will be made up of specialty crop industry representatives and ISDA staff. The committee will apply the below scoring criteria to each application.

Criteria for assessing the projects includes:	Maximum Points
Project Quality and Soundness	30
<ul style="list-style-type: none"> - How clear is the purpose of the activity? - How feasible and appropriate is the project? - How well does the proposed activity address the specified issue? - How capable are the project leaders and staff? - What level of commitment to the project does the applicant demonstrate? - How well does the project leverage available resources? - Is the budget well justified and appropriate? 	
Enhances the Competiveness of Idaho Specialty Crops	25
<ul style="list-style-type: none"> - How effective will the project be at enhancing the competitiveness of Idaho specialty crops? - How relevant is the project to the Idaho specialty crop industry? - How significant are the long-term benefits? - How great is the need for the project? - How well does it provide for identified industry priorities? 	
Return on Investment	20
<ul style="list-style-type: none"> - How great is the potential economic impact on Idaho? - How well does the number of beneficiaries justify the amount of investment? - How reasonable and achievable are the anticipated outcomes? 	
Measurable Outcomes	15
<ul style="list-style-type: none"> - Does the project include at least one measurable outcome? - How well does the proposed project allow the applicant to quantify and document the project benefits and outcomes? - How significant is the outcome to the Idaho specialty crop industry? - How clear, appropriate, and realistic are the goals and objectives? 	
Level of Match or In-Kind Contribution	10
<p><i>Points should be reflective of the percentage of matching funds with cash match scoring higher than in-kind contribution. Points may be added or subtracted based on the questions below.</i></p> <ul style="list-style-type: none"> - What is the percent of matching funds and in-kind contribution? 	

- | |
|--|
| <ul style="list-style-type: none">- How reasonable is the level and type of the match?- How secure is the source of matching funds? |
|--|

IX. Post-Award Management

Subgrantees must ensure they are:

1. making adequate progress toward achieving the grant project's goals, objectives, and targets;
2. expending grant funds in a way that meets provisions of pertinent statutes, regulations, ISDA administrative requirements, and relevant Office of Management and Budget (OMB) circulars;
3. aware of the requirements imposed upon them by Federal statute and regulation;
4. in compliance with records retention and access requirements;
5. using federal funds responsibly.

Change Key Personnel - When it is necessary to change the program contact for a period of more than 3 months, submit a written request (email is acceptable) to ISDA. Request should contain the new individual's name and contact information.

Scope or Objectives - When it is necessary to modify the scope or objectives of the award, submit a written justification for the change along with the revised scope or objectives of the award to ISDA.

If requesting to add a new project, submit a written justification for the change along with a project proposal to include the project title, purpose, potential impact, expected measurable outcomes, work plan, budget narrative, project oversight, and project commitment and signature of the Project Coordinator.

Extension of Grant Agreement - Where an extension of time is required; the extension(s) must be received in writing no later than 60 days prior to the expiration date of the award. The request must contain the following information:

1. The length of additional time required to complete project objectives and a justification for the extension.
2. A summary of progress to date (status of project timeline and objectives...etc.);
3. An estimate of remaining funds on the scheduled expiration date;
4. A projected timetable to complete the project for which the extension is being requested;
5. Signature of the Program Coordinator.

Budget Changes - Where a modification to the approved budget is required, the modification must be approved in writing by ISDA if the amount of such modifications exceeds twenty percent (20%) of that budget category as last approved by ISDA. A request for a budget change shall include: (a) a description of the change and (b) a justification for the change, and (c) the Project Coordinator signature(s). Note that if the cumulative amount of allowable budget changes is less than twenty percent (20%), prior ISDA approval is not required.

X. Reporting Requirements

All performance reports can be emailed to lacey.menasco@agri.idaho.gov or mailed to ISDA Market Development Division.

The final performance report and financial status report should be signed by the appropriate organizational representative and submitted to Lacey Menasco, ISDA, Market Development Division.

Idaho State Department of Agriculture
Market Development Division
2270 Old Penitentiary Rd
Boise, ID 83712

A. Quarterly Financial Reports

At the end of every quarter each subgrantee must submit a quarterly financial report to ISDA (forms provided by ISDA upon award).

B. Semiannual Performance Reports

Semiannual performance reports are required 30 days after the end of the 2nd and 4th quarters of the granting period and each year until the expiration date of the grant.

The performance reports should be organized under, but not limited to, the following headings for each project:

Activities Performed

Briefly summarize activities performed, targets, and/or performance goals achieved during the reporting period for each project. Include favorable or unusual developments. It is encouraged to clearly convey progress toward achieving outcomes by graphing baseline data and showing the progress toward achieving set targets. If targets have already been achieved, amend the outcome measure to a “stretch goal” where the organization is challenged to go beyond what it is already doing. Identify the amended measurable outcome in the performance report.

Problems and Delays

Note unexpected delays or impediments. Make sure to review measurable outcomes to determine if targets are realistic and attainable. An objective that is too stringent should be scaled back and identified in the performance report. Keep in mind that targets may slip due to all kinds of factors, such as employee turn-over and bad weather. Include revised work plan timelines if applicable.

Future Project Plans

Outline work to be performed during the next reporting period for each project.

Funding Expended To Date

Comment on the level of grant funds expended to date for each project.

C. Final Performance Report

A **final performance report** will be required within 90 days following the end date of the grant agreement. The final report will be combined by ISDA with all other Specialty Crop Grant Reports

from Idaho and posted on the SCBGP-FB web site. This represents an important vehicle for sharing project findings with Federal and State agencies and the public.

The final report should be organized under, but not limited to, the following headings for each project:

Project Summary

An outline of the issue, problem, interest, or need for each project.

Project Approach

How the issue or problem was approached via the project.

Goals and Outcomes Achieved

How the performance goals and measurable outcomes were achieved for each project(s). If outcome measures were long term, summarize the progress that has been made towards achievement. It is encouraged to clearly convey progress toward achieving outcome measures by graphing baseline data and showing the progress toward achieving set targets.

Beneficiaries

Provide a description and quantitative data for the number of people or operations that have benefited from the project's accomplishments, and/or the potential economic impact of each project.

Lessons Learned

Lessons learned, results, conclusions, for each project. If goals or outcome measures were not achieved, identify and share the lessons learned to help others expedite problem-solving.

Contact Person

Contact person for each project with telephone number and email address.

Additional Information

Additional information available (e.g. publications, web sites, photographs).

XI. Request for Payment

Funds will be dispersed to grant recipients in three installments. At the beginning of the granting period, fifty percent (50%) of the funds will be given. At the time that eighty percent (80%) of those funds are expended (according to the quarterly financial reports), forty percent (40%) of the funds will be dispersed. Once the grant is completed and all financial reports are submitted to and approved by ISDA, the remaining ten percent (10%) will be dispersed.

Any unobligated funds at the end of this period must immediately be refunded back to ISDA.

XII. Records Retention

In accordance with Federal regulations, grant recipients should retain all records relating to the grant for a period of three years after the final financial status report has received by ISDA or until final resolution of any audit finding or litigation.

XIII. ISDA Specialty Crop Block Grant Contacts

For questions, please contact:

Appendix A - List of Selected Items of Cost Contained in

OMB Cost Principles Regulations

The following table lists the selected items of cost along with a cursory description of their allowability. The numbers in parentheses refer to the cost item in the applicable regulation. Do not to rely exclusively on the summary but to place primary reliance on the referenced text. All costs must be associated with activities that enhance the competitiveness of eligible specialty crops.

Selected Items of Cost				
Selected Cost Item	2 CFR 225 (A -87), Appendix B State, Local, & Indian Tribal Gov'ts	2 CFR 220 (A-21), Section J Educational Institutions	2 CFR 230 (A-122), Appendix B Non-Profit Organizations	48 CFR FAR 31.2, Section 31.205 For-Profit Organizations
Advertising and public relations costs	(1) Allowable with restrictions			
Advisory councils	(2) Allowable with restrictions	(2) Allowable with restrictions	(2) Allowable with restrictions	Not specifically addressed (28) addresses allowable business expenses such as costs of shareholder meetings
Alcoholic beverages	(3) Unallowable	(3) Unallowable	(3) Unallowable	(51) Unallowable
Alumni/ae activities	Not specifically addressed	(4) Unallowable	Not specifically addressed	Not specifically addressed
Audit costs and related services	(4) Allowable with restrictions and as addressed in OMB Circular A-133	(5) Allowable with restrictions and as addressed in OMB Circular A-133	(4) Allowable with restrictions and as addressed in OMB Circular A-133	Not specifically addressed
Bad debts	(5) Unallowable	(6) Unallowable	(5) Unallowable	(3) Unallowable
Bonding costs	(6) Allowable with restrictions	(7) Allowable with restrictions	(6) Allowable with restrictions	(4) Allowable with restrictions
Commencement and convocation costs	Not specifically addressed	(8) Unallowable with exceptions	Not specifically addressed	Not specifically addressed
Communication costs	(7) Allowable	(9) Allowable	(7) Allowable	Not specifically addressed
Compensation for personal services	(8) Unique criteria for support	(10) Unique criteria for support	(8) Unique criteria for support	(6) Allowable with restrictions
Compensation for personal services-organization-furnished automobile	Not specifically addressed	(10.g) Unallowable for that portion of costs attributed to personal use	(8.g) Unallowable for that portion of costs attributed to personal use	(6.m(2)) Unallowable for that portion of costs attributed to personal use
Compensation for personal services-sabbatical leave costs	Not specifically addressed	(10.f(4)) Allowable with restrictions	Not specifically addressed	Not specifically addressed
Compensation for personal services-severance pay	(8) Allowable with restrictions	(10.h) Allowable with restrictions	(8.k) Allowable with restrictions	(6.g) Allowable with restrictions

Selected Cost Item	2 CFR 225, Appendix B State, Local , & Indian Tribal Gov'ts	2 CFR 220, Section J Educational Institutions	2 CFR 230, Appendix B Non- Profit Organizations	48 CFR FAR 31.2, Section 31.205 For-Profit Organizations
Contingency Provisions	(9) Unallowable with exceptions	(11) Unallowable with exceptions	(9) Unallowable with exceptions	(7) Unallowable with exceptions
Deans of faculty and graduate schools	Not addressed	(12) Allowable	Not addressed	Not addressed
Defense and prosecution of criminal and civil proceedings and claims	(10) Allowable with restrictions	(13) Allowable with restrictions (Defense and prosecution of criminal and civil proceedings, claims, appeals and patent infringement)	(10) Allowable with restrictions (Defense and prosecution of criminal and civil proceedings, claims, appeals and patent infringement)	(47) Allowable with restrictions
Depreciation and Use Allowances	(11) Allowable with qualifications	(14) Allowable with qualifications	(11) Allowable with qualifications	(11) Allowable with qualifications
Donations and Contributions	(12) Unallowable (made by recipient); not reimbursable but value may be used as cost sharing or matching (made to recipient)	(15) Unallowable (made by recipient); not reimbursable but value may be used as cost sharing or matching (made to recipient)	(12) Unallowable (made by recipient); not reimbursable but value may be used as cost sharing or matching (made to recipient)	(8) Unallowable (regardless of recipient) with exception (costs of participation in community service activities)

Trustees	Not specifically addressed	(54) Allowable with restrictions	(52) Allowable with restrictions	Not specifically addressed

Appendix B – Unallowable and Allowable Costs

Unallowable Costs

All costs must be associated with project activities that enhance the competitiveness of specialty crops. Failure to mention a particular item of cost in this section is not intended to imply that it is allowable. Please see [2 CFR Part 225](#) for further guidance on cost principles.

- *Advertising and Public Relations* - Costs of advertising and public relations designed solely to promote the recipient in general (not specific to specialty crops)
- *Alcoholic beverages* - except when the costs are associated with enhancing the competitiveness of wine grapes and prior approval is given from the awarding agency.
- *Bad debts* - Including losses (whether actual or estimated) arising from uncollectable accounts and other claims, related collection costs, and related legal costs.
- *Capital Expenditures for General Purpose Equipment* - Capital expenditures for general purpose equipment, buildings, and land. “General purpose equipment” means equipment, which is not limited to research, medical, scientific or other technical activities. Examples include office equipment and furnishings, modular offices, telephone networks, information technology equipment and systems, air conditioning equipment, reproduction and printing equipment, and motor vehicles.
- *Contingency Provisions*. Contributions to a contingency reserve or any similar provision made for events the occurrence of which cannot be foretold with certainty as to time, intensity, or with an assurance of their happening.
- *Donated Services*. Donated or volunteer services may be furnished to a governmental unit by professional and technical personnel, consultants, and other skilled and unskilled labor. The value of these services is not reimbursable either as a direct or indirect cost.
- *Donations and Contributions*. Contributions or donations, including cash, property, and services, made by the governmental unit, regardless of the recipient.
- *Entertainment*. Amusement, diversion, and social activities and any costs directly associated with such costs (such as tickets to shows or sports events, meals, lodging, rentals, transportation, and gratuities).
- *Excessive Airfare Costs*. Airfare costs in excess of the customary standard commercial airfare (coach or equivalent), Federal Government contract airfare, or the lowest commercial discount airfare.
- *Fines and Penalties*. Fines, penalties, damages, and other settlements resulting from violations (or alleged violations) of, or failure of the governmental unit to comply with, Federal, State, local, or Indian tribal laws and regulations.

- *Fundraising.* Organized fund raising, including financial campaigns, solicitation of gifts and bequests, and similar expenses incurred to raise capital or obtain contributions regardless of the purpose for which the funds will be used.
- *Goods or Services for Personal Use.* Costs of goods or services for personal use of the governmental unit's employees regardless of whether the cost is reported as taxable income to the employees.
- *Investment Management Cost.* Costs of investment counsel and staff and similar expenses incurred to enhance income from investments.
- *Lobbying.* Development or participation in lobbying activities including costs of membership in organizations substantially engaged in lobbying.
- *Political Activities.* Development or participation in political activities in accordance with provisions of the Hatch Act (5 U.S.C. 1501-1508 and 7324-7326).

Allowable Costs

All costs must be associated with project activities that enhance the competitiveness of specialty crops. Failure to mention a particular item of cost in these sections is not intended to imply that it is unallowable. See 2 CFR Part 225 for further guidance on cost principles.

- *Advertising and Public Relations.* Advertising and public relations costs that solely enhance the competitiveness of eligible specialty crops.
- *Advisory Councils.* Costs incurred by advisory councils or committees
- *Capital Expenditures for Special Purpose Equipment.* With prior approval from AMS, costs associated with capital expenditures for special purpose equipment with a unit cost of \$5000 or more. "Special purpose equipment" means equipment which is used only for research, medical, scientific, or other technical activities. Examples of special purpose equipment include microscopes, x-ray machines, surgical instruments, and spectrometers.
- *Compensation for Personnel Services.* Compensation for personnel services during the period of performance under the Federal award, including salaries, wages, and fringe benefits to the extent that they are reasonable for the services rendered and they are supported with adequate documentation in accordance with 2 CFR 225 App. B ¶8h.
- *Communication Costs.* Costs incurred for telephone services, local and long distance telephone calls, telegrams, postage, messenger, electronic or computer transmittal services and the like.
- *Foreign travel.* With prior approval from AMS, direct charges for foreign travel. Each separate foreign trip must receive such approval. For purposes of this provision, "foreign travel" includes any travel outside Canada, Mexico, the United States, and any United States territories and possessions. However, the term "foreign travel" for a governmental unit located in a foreign country means travel outside that country.

- *Materials and Supplies.* Costs incurred for materials, supplies, and fabricated parts necessary to carry out the project. Purchased materials and supplies shall be charged at their actual prices, net of applicable credits. Withdrawals from general stores or stockrooms should be charged at their actual net cost under any recognized method of pricing inventory withdrawals, consistently applied. Incoming transportation charges are a proper part of materials and supplies costs. Only materials and supplies actually used for the performance of the specified project may be charged as direct costs. Where federally-donated or furnished materials are used in performing the Federal award, such materials will be used without charge.
- *Meetings and Conferences.* Costs of meetings and conferences with the primary purpose of dissemination of technical information. This includes costs of meals, transportation, rental of facilities, speakers' fees, and other items incidental to such meetings or conferences with the exception of entertainment costs as described under unallowable costs.
- *Professional service costs.* Costs of professional and consultant services rendered by persons who are members of a particular profession or possess a special skill, and who are not officers or employees of the governmental unit when reasonable in relation to the services rendered and when not contingent upon recovery of the costs from the Federal Government.
- *Proposal costs.* Costs of preparing proposals for potential Federal awards. Proposal costs should be treated as indirect costs and should be allocated to all activities of the governmental unit utilizing the cost allocation plan and indirect cost rate proposal.
- *Publication and Printing Costs.* Publication costs include the costs of printing (including the processes of composition, plate-making, press work, binding, and the end products produced by such processes), distribution, promotion, mailing, and general handling. Publication costs also include page charges in professional publications. If these costs are not identifiable with a particular cost objective, they should be allocated as indirect costs to all benefiting activities of the governmental unit. Page charges for professional journal publications are allowable as a necessary part of research costs where: (1) The research papers report work must be directly related to the grant project; and (2) The charges are levied impartially on all research papers published by the journal, whether or not by federally-sponsored authors.
- *Reconversion.* Costs incurred in the restoration or rehabilitation of the governmental unit's facilities to approximately the same condition existing immediately prior to commencement of Federal awards, less costs related to normal wear and tear.
- *Rental Costs of Buildings and Equipment.* To the extent that the rates are reasonable in light of such factors as: rental costs of comparable property, if any; market conditions in the area; alternatives available; and the type, life expectancy, condition, and value of the property leased. Rental arrangements should be reviewed periodically to determine if circumstances have changed and other options are available.
- *Training Costs.* The cost of training provided for employee development.
- *Travel Costs.* Travel costs are the expenses for transportation, lodging, subsistence, and related items incurred by employees who are in travel status on official business of the governmental unit. Such costs may be charged on an actual cost basis, on a per diem or mileage basis in lieu of

actual costs incurred, or on a combination of the two, provided the method used is applied to an entire trip and not to selected days of the trip, and results in charges consistent with those normally allowed in like circumstances in the governmental unit's non-federally-sponsored activities.

Appendix C - Application Guidelines Supplemental Explanation

Project Title and Abstract – The following information should be included in this section:

- *Project Title:* The title should adequately describe the project.
- *Abstract:* Include a project abstract of 200 words or less. The project abstract must contain a summary of the proposed project suitable for dissemination to the public. It should be a self-contained description of the project and should contain a statement of objectives and methods to be employed.

Project Purpose – The following questions should be addressed in this section:

- What is the specific issue, problem or need to be addressed by the project?
- Why is the project important and timely?
- What are the objectives of the project?
- Has the project been submitted to or funded by another Federal or State grant program?

Example 1

The recent introduction of X virus has threatened specialty crop production; the virus has already caused enormous crop losses in many States (PROBLEM). This research proposal will assess the likely spread of the virus from the initial introduction point and will identify plant reservoir hosts for the disease to form the basis for an integrated pest management strategy to prevent further crop losses (IMPORTANCE and OBJECTIVE). This project has not been submitted or funded by another Federal or State grant program.

Example 2

Many school children do not have access to healthy fruits and vegetables (ISSUE). The School Nutrition Association will subsidize installation of salad bars in forty schools to increase access to nutritious fruits, vegetables and nuts in school breakfasts and lunches (OBJECTIVE). Not only will this result in increased purchases from specialty crop growers, but the evaluation component also will provide a model for other schools in their efforts to market healthy meals to children (IMPORTANCE). This project has not been submitted or funded by another Federal or State grant program.

Example 3

This project would establish a crisis communication plan for the fruit and vegetable industry (OBJECTIVE) in case of emergency such as extreme drought (IMPORTANCE). The previous year's grant funds were used to complete Phase 1 which comprised of research and an audit of the fruit and vegetable industry and created recommendations for handling a crisis. Phase 2 continues the project by implementing and disseminating these recommendations throughout the State (SHOWS HOW PROJECT COMPLIMENTS PREVIOUS WORK). This project has not been submitted or funded by another Federal or State grant program.

Potential Impact - This section should show how the project potentially impacts the specialty crop industry and/or the public rather than a single organization, institution, or individual. The following questions should be answered:

- Who are the beneficiaries of the project?
- How many beneficiaries will be impacted?
- How will the beneficiaries be impacted by the project?
- What is the potential economic impact of the project if available?

Example 1

This project will impact the State's approximately 3000 farms involved in growing the specialty crops (BENEFICIARIES IMPACTED AND #'s). These crops represent approximately \$1 billion in farm income and are the largest crop in the State (ECONOMIC IMPACT). In order to continue the growth this industry has experienced in recent years, this project will develop and conduct marketing efforts to increase their market share (HOW BENEFICIARIES WILL BE IMPACTED).

Example 2

Existing and new specialty crop growers taking part in the grower education will receive an extensive education on many aspects of participating in specialty crop production and direct retail marketing (BENEFICIARIES). It is estimated that the number of specialty crop growers that will be participating in the educational workshops is 50 (# OF BENEFICIARIES). Through grower education, farmers will be exposed to information on how to grow crops and successfully sell their produce at direct-to-consumer markets (HOW BENEFICIARIES WILL BE IMPACTED).

Example 3

In 2008, according to USDA, National Agricultural Statistics Service (NASS), the State's specialty crop industry occupied XXXX acres and had a value for utilized production of \$XX million. This is evidence of the success and potential for this program. New specialty crop varieties being developed through this program will enable the State's XXX farmers (# OF BENEFICIARIES) to be competitive in growing and marketing these specialty crops (HOW BENEFICIARIES WILL BE IMPACTED). These new crops could provide \$XX - \$XX million in additional farm income (POTENTIAL ECONOMIC IMPACT) in XX years.

Expected Measurable Outcomes – The following questions should be answered in this section.

- What is at least one distinct, quantifiable, and measurable outcome that directly and meaningfully supports the project's purpose and is of direct importance to the intended beneficiaries? The measurable outcome, when possible, should include the following:
 - GOAL
 - PERFORMANCE MEASURE
 - BENCHMARK
 - TARGET
- How will performance toward meeting the outcome(s) be monitored?
 - Define your data sources
 - How will data be collected
 - If using a survey, provide information on the nature of the questions that will be asked, the methodology to be used, and the population to be surveyed
 - If a draft questionnaire is available, you may want to include a copy with your application
- How will data gathered be used to correct deficiencies and improve performance, both as it gathered and analyzed and in subsequent project periods?

Examples of outcome measures may include, but are not limited to: per capita consumption, consumer awareness as a percent of target market reached, market penetration based on sales by geographic region, dollar value of exports, or web site hits. For research grants they may include generation of new knowledge, research quality, attainment of leadership in the field, or the development of human resources (e.g., providing opportunities for graduate students).

Steps to Developing Outcome Measures

Whenever possible, the outcomes should include a goal, performance measure, baseline, and a target. The following four steps provide guidance on how to develop outcome measures.

1) Determine what the project will accomplish, i.e., the intended results of the project, generally expressed as a GOAL or OBJECTIVE.

Goals or objectives should be: a) based on a needs analysis and be specific, realistic results you hope to achieve through the project activities; b) specific; and c) outcome-oriented. Outcome-oriented objectives identify the ultimate result, while the work plan activities identify how you intend to achieve the objectives. When developing outcome-oriented objectives, ask yourself “why” are you performing each grant activity; and specify not only what will be achieved, but also when those results will be achieved.

2) Figure out how to measure the results and select the PERFORMANCE MEASURE.

For each objective identified in step 1, select the performance measure. Performance measures are measures/indicators used to observe progress and measure actual results compared to expected results. They are usually expressed in quantifiable terms and should be objective and measurable (numeric values, percentages, scores and indices); although in certain circumstances qualitative measures are appropriate.

3) Determine the BASELINE for each measure and set TARGET goals for future performance.

For each measure identified in step 2, determine the baselines against which you will measure. Baselines are usually determined by researching past circumstances in the area you are trying to measure. As an alternative, you may use benchmarks established by third parties accepted as the standard-setters in your industry. If data does not exist, describe the lack of data. It may be appropriate in the first year to set vaguer targets, such as “improvement” where any increase represents outcome achievement, and set more concrete targets in subsequent years when baseline data is available.

Use the baseline data to set targets for the quantity of change expected. Targets may be framed in terms of:

- a) Absolute level of achievement (ex: feed 150 homeless people);
- b) Change in level of achievement (ex: feed 150 homeless people, 35 more than last year);
- or
- c) Change in relation to the scale of the problem (ex: feed 150 homeless people, approximately 10% of the city’s homeless population.)

If you are starting up a new project or trying new approaches remember that little or no measurable progress will be evident in the project start-up phase. This delay in seeing measurable results should be reflected in target-setting. When setting targets, you should take into account external factors that influence your success. You may have a grand ultimate goal, but you should view annual targets as small steps toward that ultimate goal. You may also want to set stretch goals by using benchmarks as your targets. Benchmarks tell you how the rest of the industry is doing; when you gather data for benchmarks, you look at the results of other organizations serving your type(s) of customers, doing your type of work. In your State plan, you may want to stick to a modest level of planned

achievement and reserve your stretch goals for internal use. Another alternative is to include minimum and maximum targets in your application. For example, “We plan, at a minimum, for a 5% increase. However, we will strive for a 10% increase, which our data shows is possible if all external factors work in our favor and our new methodology yields the same results in the demonstration phase.”

4) Develop your performance monitoring plan or data collection plan.

Define who your data sources are and how the data will be collected. If the project involves a survey, provide some information about the nature of the questions that will be asked, the methodology to be used and the population to be surveyed. If a draft questionnaire is available, you may want to include a copy with the application. Outline how data gathered will be used to correct deficiencies and improve performance, both as it gathered and analyzed and in subsequent project periods. This data collection plan should be integrated into your work plan and budget.

Examples of Outcome Measures

The following are examples of outcome measures. They do not include examples of a performance monitoring plan.

Example 1

The GOAL of this project is to promote specialty crop X in Mexico in order to increase the volume.

Volume Increase:

BASELINE 2007: Actual volume of specialty crop exported to Mexico: 53,969 cases

TARGET 2008: 60,000 cases

TARGET 2009: 70,000 cases

TARGET 2010: 80,000 cases

PERFORMANCE MEASURE: Derive from specialty crop commission assessment reports at the end of each year.

Example 2

Increase the number of specialty crop farmers following Good Agricultural Practices (GOAL) from the current 18 (BENCHMARK) to 55 in two years (TARGET) measured by the number of GAP audits passed (PERFORMANCE MEASURE).

Example 3

Increase fruit and vegetable purchases (GOAL) from the current level of \$2.50 (BENCHMARK) to at least \$3 per enrolled student in awarded schools in one year (TARGET) measured by biannual school reports (PERFORMANCE MEASURE).

Example 4

Work directly with specialty crop industry X to develop a uniform tool to access the health of their specialty crops to give the industry early warning of potential problems in order to optimize their management practices (GOAL). No such tool currently exists (BENCHMARK). The success of the evaluation will be measured by interviewing 20 stakeholders at the end of three years to determine if they developed the tool (TARGET and PERFORMANCE MEASURE).

Example 5

Develop a predictive model for the spread of the specialty crop disease, an analysis of virus resistant varieties, and a foundation for an integrated pest management (IPM) strategy to combat the disease (GOAL). No such model currently exists (BENCHMARK). The information will be shared with more than 700 tomato growers, increasing awareness of the model, at the 2008 conference break-out session (TARGET) measured by attendance at the session (PERFORMANCE MEASURE).

Example 6

Increase visits to the Specialty Crop Website (GOAL) 25% over the course of one year (TARGET) from the current 9,000 annual hits (BENCHMARK) by measuring website visits each month over the next year (PERFORMANCE MEASURE).

Example 7

Increase consumer awareness of specialty crops by distributing 1000 pieces of informational materials containing locations where to purchase specialty crops (GOAL). Six months after distribution, survey 50 locations (PERFORMANCE MEASURE) to determine if sales increased by 25% (TARGET) from the level before distribution of marketing materials (BENCHMARK).

Work Plan – The following information should be included in this section.

- Identify the activities necessary to accomplish the project objectives. Make sure to include your performance monitoring/data collection plan activity described in the expected measurable outcome section in the work plan.
- Indicate who will do the work of each activity. If collaborative arrangements or subcontracts are used, make sure you specify their role and responsibilities in performing project activities.
- Include timelines for accomplishing each activity. Make sure to include the month and year the project is scheduled to begin.

The work plan section may be in any format you choose as long as it contains the appropriate information. The following are two examples of work plans:

Example 1

The Nursery and Landscape Association (NLA) will be responsible for implementing a media campaign to promote the Specialty Crop Program. This project will be implemented from November 2008 until May 2010. Following the approval and funding of the project, a marketing committee will be assembled to assist in the development of the media campaign. The NLA will develop a request for proposal (RFP) which will be distributed to advertising and media relations firms serving the State. The RFP will include plans for television and print media, production schedule, information on demographics for targeted audience, and costs associated with production and delivery.

The media campaign will consist of television, radio, and print advertisements. The advertisements will promote the Specialty Crop Program, educate consumers on why they should “Buy Local” when selecting trees, shrubs, and flowers to plant on their properties and encourage consumers to consult with Nursery Certified Professionals when purchasing these plants. The advertisements will be placed in key markets of the state during the spring and summer of 2009 when consumers are most likely to be purchasing plants and plant materials.

The NLA will also be responsible for measuring the expected outcomes of the project. To gauge consumer awareness of the Specialty Crop Program, the NLA will survey consumers in February and March 2009 at its three annual Garden and Patio Shows to measure consumers’ knowledge of

the Specialty Crop Program and buying trends. In 2010, consumers will again be surveyed to determine the increase in consumer awareness due to the Specialty Crop Advertising Campaign. In addition, the NLA will survey targeted producers after the advertising campaign to see how many of the selected Specialty Crop Program plants were sold the previous year and how many were sold in the year of the campaign, to judge the residual effectiveness of the campaign. Producers will be surveyed in 2009 and 2010.

Example 2

Project Activity	Who	Timeline
Create a survey to assess growers current pest control programs and perceptions of IPM	State University Personnel	Begin January 2010 (0-4 months)
Administer survey to a minimum of 200 growers at annual meeting	Cooperative Extension Personnel	April 2010 (month 4)
Compile survey results	Cooperative Extension Personnel	May-June 2010 (month 5-6)
Review survey for likely cooperator candidates	State University Personnel	May 2010 (month 5)
Interview and select candidates for on-on-one IPM and biocontrol training and control group	State University Personnel	June 2010 (month 6)
Meet weekly with selected growers at crop initiation (in the greenhouse)	State University Personnel	June-July 2010 (month 6-7)
Conduct periodic visits during crop growth	Cooperative Extension Personnel	July-September 2010 (Month 7-9)
Meet weekly with selected growers at crop fruition (in the field)	State University Personnel	September-October 2010 (month 9-10)
Collect data on pest densities; crop damage, yield, and quality; pesticide usage, pest management costs, and other techniques used	State University Personnel	October-November 2010 (month 10-11)
Survey participating growers as to attitudes and understanding of IPM techniques	Cooperative Extension Personnel	November 2010 (month 11)
Incorporate most successful ideas/techniques into comprehensive IPM Field Guide	State University Personnel	January-March 2011 (month 13-15)
Distribute to growers at Annual Meeting	Cooperative Extension Personnel	April 2011

Project Oversight – The following questions and information should be addressed in this section:

- Who will oversee the project activities?
- How will oversight be performed? Include timelines.

Example

The Director of Marketing and Development, John Doe, will work directly with the individuals identified as representing each partnering entity. Mr. Doe will coordinate the execution of cooperative agreements with each participating entity and monitor progress throughout the year long grant period. He will contact the principles of each project by phone at least once during each quarter to determine if the projects are on-track.

Project Commitment – Provide the following information in this section:

- Who supports this project?
- How will grant partners work toward the goals and outcomes of the project?

Appendix D - Budget Narrative

Although there is no specific format for the supplemental budget, the budget should contain a narrative in paragraph format for each project in order for AMS to determine the costs are reasonable and allowable.

1. *Personnel* – Persons employed by the grantee or subgrantee organization should be listed in this category. Those employed elsewhere would be listed as subcontractors or consultants in the “Other” category.

In order for secretarial and clerical salaries to be allowable as direct charges to the awards, a justification of how that person will be directly involved in the project must be included in the narrative. General administrative or accounting duties are not considered acceptable. The duties must be directly related to the project plan.

For each project participant, indicate their title, percent of full time equivalents (FTE), and corresponding salary for the FTE.

For example, if a project participant’s salary is \$50,000 and they are participating 50% of their time on the project, the total budgeted salary cost would be \$25,000.

2. *Fringe Benefits* – Provide the rate of fringe benefits for each project participant’s salary described in the personnel section.
3. *Travel* – Please provide the following information in the narrative if applicable: destination; purpose of trip; number of people traveling; number of days traveling; estimated airfare costs; estimated ground transportation costs; estimated lodging and meals costs; estimated mileage costs (at the federal rate of \$.455/mile) for the travel.

Follow the below reimbursement schedule. Per diem will only be paid for overnight travel.

Meal Reimbursement Schedule		
Meal Entitlement	In-state	Out-of-State
Full day	\$30.00	100%
Breakfast Only	\$7.50	25%
Breakfast and Lunch	\$18.00	60%
Lunch Only	\$10.50	35%
Lunch and Dinner	\$27.00	90%
Dinner Only	\$16.50	55%
Breakfast and Dinner	\$24.00	80%

Follow the below guidelines regarding departure/arrival times to determine the meal entitlement per day.

<u>Departure from Home Station</u>	
7:00am	Breakfast
11:00am	Lunch
5:00pm	Dinner

Arrival to Home Station

8:00am	Breakfast
2:00pm	Lunch
7:00pm	Dinner

4. Equipment – This category includes items of property having a useful life of more than one year and an acquisition cost of \$5,000. If the cost is under \$5,000, then include these items under SUPPLIES.

Provide an itemized list of equipment purchases or rentals, along with a brief narrative on the intended use of each equipment item, and the cost for all the equipment purchases or rentals.

Please see Section VII Restrictions and Limitations on Grant Funds for further guidance on equipment.

- Capital expenditures for general purpose equipment, buildings, and land are unallowable as direct and indirect charges.
- Capital expenditures for special purpose equipment are allowable as direct costs, provided that items with a unit cost of \$5000 or more have the prior approval of AMS.
- Rental costs of buildings and equipment are allowable as direct costs in accordance with the cost principles in Subpart T of 7 CFR Part 3015.

5. Supplies – This is anything with acquisition cost under \$5,000 and could be anything from office supplies and software to educational or field supplies. For non-typical materials & supplies items, include a brief narrative of how this fits with the project.

Provide an itemized list and estimate the dollar amount for each item.

For example, office supplies such as pens, paper, toner, etc - \$500; Gardening supplies such as soil and fertilizer - \$500.

Items such as telephone, postage, fax and express mail are more appropriately listed under the “Other” category.

6. Contractual – Provide a short description of the services each contract covers and include the flat rate fee OR the total hourly rate fee for each contract.

Compensation for contractor/consultant services should be reasonable and consistent with that paid for similar services in the marketplace. Contractor/consultant rates shall not exceed \$130,000 or \$500 per eight-hour day, excluding travel and subsistence costs.

If the contract is for service or maintenance, costs should be in direct correlation to the use of the equipment for the project (i.e., if a particular copy machine is used 50% of the time for the project, the project should only be charged 50% of the service contract paid from Federal funds.)

7. Other – Provide a detailed description of all other direct costs such as:
 - a. Conferences/Meeting - Costs of holding a conference or meeting are included in this category. Some examples are the rental of facilities or equipment for the meeting. Details of costs for each conference or meeting should be broken out and provided in the budget.

- i. Meals may not be charged as project costs when individuals decide to go to lunch or dinner together when no need exists for continuity of a meeting. Such activity is considered to be an entertainment cost. Meals may be charged to the project if such activity maintains the continuity of the meeting and to do otherwise will impose arduous conditions on the meeting participants. Some examples of acceptable reasons are that the conference facility is located in a remote area where public facilities are not accessible; there will be a speaker and business discussions during the meal; there is insufficient time available to allow participants to go out on their own. If one or more of these justifications cannot be met, or if there are no other acceptable and compelling reasons, then the meals should not be charged to the award. The attendees should be responsible for providing their own meals.
 - ii. Breakfasts for conference attendees are usually considered unallowable as it is expected these individuals will have sufficient time to obtain this meal on their own before the conference begins in the morning. This does not pertain to persons in a travel status. When paying for the travel of a person to attend a conference, meals and lodging may be included in the cost without additional justification.
 - b. Communications – Mailings, postage, express mail, faxes, and telephone long distance charges. Provide the estimated cost for this category.
 - c. Speaker/Trainer Fees- Provide the amount of the speaker’s fees and a description of the services they are providing
 - d. Publication Costs –Provide the estimated cost of printing of brochures and other program materials or scientific or technical journals.
 - e. Data collection - Provide the estimated cost of collecting performance data to measure the project outcome measures.
8. PROGRAM INCOME – Indicate the nature or source of program income (for ex: registration fees) If program income is earned it may be used for 1) expanding the project or program; 2) continuing the project or program after the grant or sub grant support ends; and 3) supporting other projects or programs that further the broad objectives of the grant program.

Appendix E – Eligible Specialty Crops

List of Plants Commonly Considered Fruits and Tree Nuts
