Curriculum Information

Major: Athletic Training

Degree(s): Master of Science in Athletic Training

Minor:

Certificate:

Teaching Major/Minor:

Note: Copy and paste the curricular requirements from the online General Catalog. Clearly mark all changes using Track Changes or using strikethroughs for deletions and underlines for additions.

Curriculum: The following are all additions to the Graduate Catalog

MSAT Admission Requirements

<u>Admission Requirements:</u> Students are eligible to apply for admission to the MSAT program via two distinct routes.

1) Students who have obtained a bachelor's degree (3.0 or >3.0) and the required prerequisite coursework (4 credit hours of human anatomy or equivalent & 4 credit hours of human physiology or equivalent) are eligible for consideration of admission to the MSAT**.

OR

2) Students who are enrolled in an academic institution with whom the University of Idaho and the MSAT have a 3+2 transitional program articulation* agreement may apply to the MSAT during their junior year of study for entrance in early summer. Students must be approved for application to the 3+2 program from their specified undergraduate program director (and have met the criteria within the articulation agreement) and then apply to the MSAT**.

- * Note: The University of Idaho's 3+2 program leading to the application to the MSAT is the Bachelor of Science in Physical Education with a major in Exercise Science (3+2 track). Please contact the Division of Athletic Training for information regarding other Universities with approved MSAT 3+2 articulation agreements.
- ** Note: The 3+2 program will meet all other admission standards set forth by the College of Graduate Studies and the Masters of Science in Athletic Training Program.

Rationale Information

Rationale for approval of this request: The recently approved (Summer 2011) Master of Science in Athletic Training Program is proposing the above changes to the Graduate Catalog in order to most efficaciously continue the University of Idaho's tradition of offering a high quality education that is a great value. The proposed changes reflect national trends within the Health Professions of seamlessly transitioning undergraduate students into first professional graduate programs. These proposed catalog changes require an exception to the current College of Graduate Studies policy requiring a Bachelor's degree prior to admission to the COGS. The COGS does currently allow promising graduating students to complete a Course Level Adjustment Form to allow up to nine credits to be applied to the gradate transcript as a non-degree seeking student.
