

Traction Pull-Overs

Wearing appropriate footwear, using available handrails, and walking on maintained pedestrian sidewalks and walkways whenever possible is a good idea any time of the year. Using traction pullovers on shoes and boots during the winter months as an additional precaution can significantly reduce the risk of slips and falls when walking on snow-covered, icy walking surfaces, a frequent cause of serious injuries to UI employees. *Please note: This equipment is designed and intended for exterior use only and not to be worn inside buildings on hard floor surfaces.*

Korkeez-brand traction pullovers may be purchased by departments for use on-the-job directly from UI Facilities Shop Stores. To order, or for additional information, please call (208) 885-7555.

UI faculty, staff, and students may also purchase Korkeez traction pullovers locally from the Norco Safety and Supply Company, located in Moscow at 223 West 3rd Street, at specially reduced prices. A variety of other types of traction pullovers are also available for purchase from other local vendors.

If you notice slick spots or other problem areas on the Moscow campus, please be proactive and take the time to ensure they are promptly reported to Facilities, 885-6246. Off-campus personnel should bring similar areas to the attention of appropriate maintenance personnel.

For additional information, contact Environmental Health & Safety, 208-885-6524.
