Research Development:

As part of the mission of the new Waters of the West program to develop team based interdisciplinary research in which faculty and students work together, the following research projects are under development:

Palouse Basin Water Supply Integrated Analysis, Spring 2007-present

Analysis of means to achieve sustainable use of a declining sole-source interstate aquifer.

Lapwai Creek Watershed Integrated Analysis, Spring 2008-present

Analysis of opportunities for, and barriers to, recovery of steelhead spawning and rearing habitat in a multi-jurisdictional watershed.

Additional research project:

Columbia River Treaty Project, Fall 2007-present

University of Idaho representative on a core team from Oregon State University, University of Washington, University of Montana, University of Calgary and University of British Columbia, developing research to inform re-negotiation of the Columbia River Treaty between the United States and Canada. The treaty comes up for re-consideration in 2014.

Projects

Indian Water Rights Settlement Database development, Summer 2008-present
 The database will gather Indian water right settlements and their implementing documents online. There are currently twenty settlements, with the majority of documents unavailable to those seeking to negotiate new settlements. The database project will provide access to information for tribes, states and federal representatives involved in negotiation.
