

# Agriculture and Food Research Initiative Competitive Grants Program

---

## Global Food Security

*FY 2010 Request for Applications*

United States  
Department of  
Agriculture

National Institute  
of Food and  
Agriculture

**NATIONAL INSTITUTE OF FOOD AND AGRICULTURE  
U.S. DEPARTMENT OF AGRICULTURE**

**AGRICULTURE AND FOOD RESEARCH INITIATIVE  
COMPETITIVE GRANTS PROGRAM  
GLOBAL FOOD SECURITY CHALLENGE AREA**

**INITIAL ANNOUNCEMENT**

**CATALOG OF FEDERAL DOMESTIC ASSISTANCE:** This program is listed in the Catalog of Federal Domestic Assistance under 10.310.

**DATES:** Applications must be submitted via Grants.gov by 5:00 p.m. Eastern Time on the deadline date indicated in the Program Area Descriptions section beginning in Part I, C (page 4). Applications received after the deadline will normally not be considered for funding. Comments regarding this request for applications (RFA) are requested within six months from the issuance of this notice. Comments received after this date will be considered to the extent practicable.

**STAKEHOLDER INPUT:** The National Institute of Food and Agriculture (NIFA) is requesting comments regarding this RFA from any interested party. These comments will be considered in the development of the next RFA for the program, if applicable, and will be used to meet the requirements of section 103(c)(2) of the Agricultural Research, Extension, and Education Reform Act of 1998 (7 U.S.C. 7613(c)(2)). This section requires the Secretary to solicit and consider input on a current RFA from persons who conduct or use agricultural research, education, and extension for use in formulating future RFAs for competitive programs. Written stakeholder comments directed toward this RFA should be submitted in accordance with the deadline set forth in the DATES portion of this notice.

Written stakeholder comments should be submitted by mail to: Policy and Oversight Branch; Office of Extramural Programs; National Institute of Food and Agriculture; USDA; STOP 2299; 1400 Independence Avenue, SW; Washington, DC 20250-2299; or via e-mail to: [RFP-OEP@nifa.usda.gov](mailto:RFP-OEP@nifa.usda.gov). (This e-mail address is intended only for receiving comments regarding this RFA and not for requesting information or forms.) In your comments, please state that you are responding to the Agriculture and Food Research Initiative Global Food Safety RFA.

**EXECUTIVE SUMMARY:** The Department of Agriculture established the Agriculture and Food Research Initiative (AFRI) under which the Secretary of Agriculture may make competitive grants for fundamental and applied research, extension, and education to address food and agricultural sciences (as defined under section 1404 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (NARETPA) (7 U.S.C. 3103)), as amended, in six priority areas. The six priority areas include: 1) plant health and production and plant products; 2) animal health and production and animal products; 3) food safety, nutrition, and health; 4) renewable energy, natural resources, and environment; 5) agriculture systems and technology; and 6) agriculture economics and rural communities.

In fiscal year (FY) 2010, approximately \$262 million is available to support the AFRI program. Of this amount, no less than 30 percent will be made available to fund integrated research, education, and extension programs.

For FY 2010, approximately \$19 million is available to support the Global Food Security Challenge Area within AFRI. In the Global Food Security Challenge Area, specific program areas are designed to achieve the long-term outcomes of increasing domestic and international food availability and food accessibility.

Project types supported by AFRI within this Challenge Area include will propose single-function Extension Projects, multi-function Integrated Research, Education, and/or Extension Projects, and Food and Agricultural Science Enhancement (FASE) Grants. This RFA identifies research, education, extension and integrated program objectives, eligibility criteria, and matching requirements for each project type.

\*\*\*\*\*

**PLEASE READ**

\*\*\*\*\*

**AFRI RFAs:** In FY 2010, NIFA will issue seven RFAs for the AFRI Program:

- (1) Foundational Program addressing the six AFRI priority areas
- (2) Challenge Areas:
  - a. Childhood Obesity Prevention
  - b. Climate Change
  - c. Food Safety
  - d. Global Food Security
  - e. Sustainable Bioenergy
- (3) NIFA Fellowships Grant Program soliciting Pre- and Postdoctoral Fellowship Grant applications

Applications for AFRI funds may also be solicited through other announcements including supplemental AFRI RFAs or in conjunction with multi-agency programs

All **AFRI program information** is available on the NIFA Web site at: [www.nifa.usda.gov/afri](http://www.nifa.usda.gov/afri).

**FY 2010 NIFA Fellowships Grant Program:** Beginning in FY 2010, all Pre- and Postdoctoral Fellowship Grants will be solicited via a separate NIFA Fellowships Grant Program RFA. AFRI invites applications from doctoral candidates and individuals who will soon receive or have recently received their doctoral degree for a Pre- or Postdoctoral Fellowship Grant, as appropriate, for research, education, extension, or integrated activities. The AFRI program anticipates awarding at least \$6 million in Pre- and Postdoctoral Fellowship Grants. Information on the NIFA Fellowship Grants Program RFA, including the anticipated release date, is available at [www.nifa.usda.gov/afri](http://www.nifa.usda.gov/afri).

**Eligibility:** AFRI makes awards under two legislative authorities with different eligibilities. Depending on Program Area Priorities and the requested activities, the authority used, and hence eligibility, may be different within a particular Program. Please check the Program Area Descriptions (beginning in Part I, C (page 4)) and the Eligibility Information section (Part III, A (page 22)) for specific information. If you are unsure of your eligibility contact the Program Area Contact for clarification before applying. Applications from ineligible institutions will not be reviewed.

**Award Instrument:** All awards (excluding Planning/Coordination, Conference, Sabbatical, Equipment, and Seed Grants) will be made under this RFA as continuation awards. A continuation award is an award instrument by which the Department agrees to support a specified level of effort for a predetermined period of time with a statement of intention to provide additional support at a future date: provided that 1) performance has been satisfactory, 2) appropriations are available for this purpose, and 3) continued support would be in the best interest of the Federal government and the public. Awardees are expected to participate in a rigorous post-award management activity to be determined by the Agency Contact at the formative stages of the project.

Planning/Coordination, Conference, Sabbatical, Equipment, and Seed Grants will be made as standard awards. A standard award is an award instrument by which the Department agrees to support a specified level of effort for a predetermined project period without the announced intention of providing additional support at a future date.

**Award Duration:** All grants (excluding Planning/Coordination, Conference, Sabbatical, Equipment, and Seed Grants) have award duration of up to five years. Please note the procedures for no-cost extensions of time that extend the project period beyond five years under Part VIII, B. 2. e) (page 49).

**Letters of Intent:** In FY 2010, all Program Areas within the Global Food Security Challenge Area require a Letter of Intent for submission of an application. For those programs requiring a Letter of Intent, a letter is required for **all** grant types except Planning/Coordination and Conference Grant applications. Refer to the Program Area Description beginning in Part I, C (page 4) to determine if a Letter of Intent is required for a specific Program Area. Refer to Part IV, A (page 25) for instructions on the preparation of a Letter of Intent.

**Annual Investigator Meetings:** Beginning in FY 2010, if a Seed Grant application is funded, the project director is required to attend annual investigator meetings starting in the second year of funding. Reasonable travel expenses should be included as part of the project budget. For all other grant types (excluding Planning/Coordination, Conference, Sabbatical, and Equipment Grants), Project Directors will continue to be required to attend annual investigator meetings beginning in the first year of funding.

**Logic Model Requirements:** Beginning in FY 2010, Education and Extension Projects must include the elements of a logic model detailing the activities, outputs, and outcomes of the proposed project. This information may be provided as a narrative or formatted into a logic model chart. More information and resources related to the logic model planning process are provided at [www.nifa.usda.gov/funding/integrated/integrated\\_logic\\_model.html](http://www.nifa.usda.gov/funding/integrated/integrated_logic_model.html). Integrated Projects will continue to require the inclusion of a Logic Model.

**Indirect Cost Limitations:** NIFA is prohibited from paying indirect costs exceeding 22 percent of the total Federal funds provided under each award. This limitation is equivalent to 0.28205 of the total direct costs of an award. See Part IV, E (page 37) for additional information.

## **PART I – FUNDING OPPORTUNITY DESCRIPTION**

### **A. Legislative Authority and Background**

Section 7406 of the Food, Conservation, and Energy Act of 2008 (FCEA) (Pub. L. 110-246) amends section 2(b) of the Competitive, Special, and Facilities Research Grant Act (7 U.S.C. 450i(b)) to authorize the Secretary of Agriculture to establish the Agriculture and Food Research Initiative (AFRI); a competitive grant program to provide funding for fundamental and applied research, extension, and education to address food and agricultural sciences. Grants shall be awarded to address priorities in United States agriculture in the following areas:

1. Plant health and production and plant products;
2. Animal health and production and animal products;
3. Food safety, nutrition, and health;
4. Renewable energy, natural resources, and environment;
5. Agriculture systems and technology; and
6. Agriculture economics and rural communities.

To the maximum extent practicable, the National Institute of Food and Agriculture (NIFA), in coordination with the Under Secretary for Research, Education, and Economics (REE), will make grants for high priority research, education, and extension, taking into consideration, when available, the determinations made by the National Agricultural Research, Extension, Education, and Economics Advisory Board (NAREEEAB) pursuant to section 2(b)(10) of the Competitive, Special, and Facilities Research Grant Act (7 U.S.C. 450i(b)(10)), as amended. The authority to carry out this program has been delegated to NIFA through the Under Secretary for REE.

### **B. Purpose and Priorities**

The purpose of AFRI is to support research, education, and extension as well as integrated programs by awarding grants that address key problems of national, regional, and multi-state importance in sustaining all components of agriculture, including farm efficiency and profitability, ranching, renewable energy, forestry (both urban and agroforestry), aquaculture, rural communities and entrepreneurship, human nutrition, food safety, biotechnology, and conventional breeding. Providing this support requires that AFRI advance fundamental sciences as well as translational research and development in support of agriculture and coordinate opportunities to build on these discoveries. This will require that AFRI also support education and extension that delivers science-based knowledge to people, allowing them to make informed practical decisions. This AFRI RFA is announcing anticipated funding opportunities for fundamental research, applied research, education, extension, and integrated research, education, and extension projects.

NIFA may also solicit applications for AFRI funds through other announcements, including supplemental AFRI RFAs or RFAs issued in conjunction with other agencies. Such announcements will be made public in the same manner as this announcement.

The programs described herein were developed within the context of the authorized purposes of USDA research, extension, and education. In addition, AFRI obtains input from Congress, the NAREEEAB, as well as many university, scientific, and agricultural committees and organizations. NIFA developed a stakeholder's Web page ([www.nifa.usda.gov/business/reporting/stakeholder.html](http://www.nifa.usda.gov/business/reporting/stakeholder.html)) to document stakeholder input that is considered when developing and updating Program Area Descriptions and Priorities each year.

### **Background**

In July, 2008, the National Institutes of Health (NIH), National Science Foundation (NSF), and Department of Energy (DOE) asked the National Research Council's Board on Life Sciences to convene

a committee to examine the current state of biological research in the United States and recommend how best to capitalize on recent technological and scientific advances that have allowed biologists to integrate biological research findings, collect and interpret vastly increased amounts of data, and predict the behavior of complex biological systems. The committee produced a report entitled “New Biology for the 21<sup>st</sup> Century: Ensuring the United States Leads the Coming Revolution,” and a set of recommendations that recognize that the most effective leveraging of investments would come from a coordinated, interagency effort to encourage the emergence of a New Biology that would enunciate and address broad and challenging societal problems.

The New Biology is already emerging, but it is as yet poorly recognized, inadequately supported, and delivering only a fraction of its potential. The committee concludes that the most effective way to speed the emergence of the New Biology is to challenge the scientific community to discover solutions to major societal problems and outlined four broad challenges in food, environment, energy, and health that could be tackled by the New Biology.

The four challenges are:

1. *Generate food plants to adapt and grow sustainably in changing environments*
2. *Understand and sustain ecosystem function and biodiversity in the face of rapid change*
3. *Expand sustainable alternatives to fossil fuels*
4. *Understand individual health*

The committee chose to focus on these four areas of societal need because the benefits of achieving these goals would be large, progress would be assessable, and both the scientific community and the public would find such goals inspirational. Each challenge will require technological and conceptual advances that are not now at hand, across a disciplinary spectrum that is not now encompassed by the field. In the committee’s view, one of the most exciting aspects of the New Biology initiative is that success in achieving the four goals chosen here as examples will propel advances in fundamental understanding throughout the life sciences. Because biological systems have so many fundamental similarities, the same technologies and sciences developed to address these four challenges will expand the capabilities of all biologists.

### **USDA – NIFA Approach**

The report “New Biology for the 21<sup>st</sup> Century” bolsters the case for increasing the level and effectiveness of USDA’s agricultural research, education, and extension programs. These efforts have included creating NIFA and significantly increasing funding over previous levels for its research, education, and extension programs.

AFRI is one of NIFA’s major programs through which to address critical societal issues such as those laid out in the “New Biology for the 21<sup>st</sup> Century” report. USDA leadership has integrated the six AFRI priority areas (outlined in Part I, A) with the four challenges and the approach laid out in the “New Biology for the 21<sup>st</sup> Century Report” to identify five primary challenge areas around which to structure the AFRI program and begin to focus the Department’s investment in enabling an integrated approach to biological research, education, and extension. USDA science will support the following challenges:

1. Keep American agriculture competitive while ending world hunger
2. Improve nutrition and end child obesity
3. Improve food safety for all Americans
4. Secure America’s energy future
5. Mitigate and adapt to climate change

To address these challenges at a meaningful scale and to achieve outcomes of relevance to the societal challenges, NIFA intends to release several AFRI RFAs. They will address each of the five challenges, enable transition and refocusing of grants made previously under AFRI, and provide pre- and postdoctoral fellowship opportunities. These RFAs will solicit applications for larger awards for longer periods of time to enable greater collaboration among institutions and organizations and integration of basic and applied research with deliberate education and extension programs.

In FY 2010, AFRI will solicit projects addressing the above challenges through five separate challenge area RFAs, each addressing one of the challenges. AFRI will also support research grants in the six AFRI priority areas to continue building a foundation of knowledge critical for solving current and future societal challenges. These six foundational programs are being announced in a single, separate RFA. In addition, funding opportunities for pre- and postdoctoral fellowship grants will be offered in a single, separate RFA.

The following table is provided to facilitate identification of appropriate funding opportunities for AFRI applicants:

AFRI Priority Area	FY 2010 AFRI RFA
Plant Health and Production and Plant Products	Climate Change Foundational Program Global Food Security Sustainable Bioenergy
Animal Health and Production and Animal Products	Climate Change Food Safety Foundational Program Global Food Security
Food Safety, Nutrition, and Health	Childhood Obesity Prevention Food Safety Foundational Program
Renewable Energy, Natural Resources, and Environment	Climate Change Foundational Program Sustainable Bioenergy
Agriculture Systems and Technology	Climate Change Food Safety Foundational Program Sustainable Bioenergy
Agriculture Economics and Rural Communities	Childhood Obesity Prevention Climate Change Food Safety Foundational Program Sustainable Bioenergy

**Global Food Security Challenge Area:**

This RFA focuses on the societal challenge to keep American agriculture competitive while ending world hunger. In the Global Food Security Challenge Area RFA, specific program areas are designed to achieve the long-term outcome of increasing food availability and decreasing the number of food insecure individuals. Project types supported by AFRI within this RFA include single-function Extension Projects, multi-function Integrated Research, Education, and/or Extension Projects and Food and Agricultural Science Enhancement (FASE) Grants.

Other sources of NIFA funding for work relevant to the Global Food Security Challenge Area are as follows:

- *Community Food Projects Competitive Grants Program*  
Total Program Funds: Approximately \$5 million  
Information is available at [www.nifa.usda.gov/funding/cfp/cfp.html](http://www.nifa.usda.gov/funding/cfp/cfp.html)
- *International Cooperative Biodiversity* (joint with the National Institutes of Health (NIH), the National Science Foundation (NSF), and the Department of Energy (DOE))  
Total Program Funds: Approximately \$4 million  
Information is available at [www.icbg.org](http://www.icbg.org)

## C. Program Area Descriptions

### Background

The Global Food Security Challenge Area focuses on two intertwined issues: *Food Availability* and *Food Accessibility*. Adequate food availability implies that the population has a reliable source of food from domestic or international production. For adequate food accessibility the population must have sufficient resources to purchase food for a nutritious diet. Dual benefits for domestic and international food security are achieved when food availability and food accessibility goals are met successfully.

*Food Availability:* Food availability depends on sustainable production with a minimization of losses from disease, harvest, transport, and storage. Agriculture faces a serious challenge as it strives to produce food for an expanding global population that is expected to reach 9 billion by 2030. The Food and Agriculture Organization (FAO) of the United Nations estimates that a 100 percent increase in food production is required to avert further food insecurity. A further FAO estimate indicates that more than 40 percent of current crop production among the ten leading food crops is lost to pests and diseases annually. The World Health Organization (WHO) estimates that animal disease represents as much as 17 percent of animal production costs in the developed world, and more than twice this figure in developing nations. On average, one newly identified animal infectious disease has emerged each year for the past 30 years and approximately 75 percent have been zoonotic (e.g., Avian influenza; H1N1 Influenza; Ebola virus; Nipah virus).

To meet these identified needs, the long-term outcome for this program is to increase global food availability through increased sustainable food production with reduced losses. Projects are expected to address one of the stated Program Area Priorities which collectively contribute to the achievement of the following goals:

1. Increase the number of farms and ranches engaged in sustainable practices.
2. Expand the number of animal diseases and plant pests with major impacts on food availability that will be managed to the point of minimal economic, environmental, and social consequences.
3. Decrease health and environmental risks associated with the use of antibiotics and pesticides.
4. Increase animal and plant products produced with the same or fewer resources.
5. Develop a cadre of well-trained, diverse scientists and producers with expert skills and a breadth of knowledge to address sustainable global agricultural production and foster a similar cadre globally through international partnerships.

In order to achieve these program goals for Food Availability, the Global Food Security Challenge Area will address several focused objectives over the next three years.

In FY 2010:

- Improving feed efficiency of agriculturally relevant animals
- Minimizing losses from one livestock disease with major impact on food production, marketing, and/or trade
- Minimizing crop plant losses from oomycete pathosystems
- Program delivery and implementation of wide-area pest monitoring

In FY 2011:

- Translating genomics into practical applications for selection of animals with genetic resistance to diseases
- Minimizing losses from a second livestock disease with major impact on food production, marketing, and/or trade
- Management of fungal diseases in plants
- Management of vector associated pathogens in plants

In FY 2012:

- Increasing reproductive fertility in food animals
- Minimizing losses from a third livestock disease with major impact on food production, marketing, and/or trade
- Management of plant insect pests
- Management of plant bacterial diseases

*Food Accessibility:* Food accessibility depends on income available to the household, on the distribution of income within the household, and on the price of food. Assuring accessibility to nutritious food for families and communities has become increasingly important in the face of growing food insecurity in the United States and worldwide. USDA Economic Research Service (ERS) indicates that more than 17 million (14.6 percent) of U.S. households were food insecure in 2008, an increase of nearly 4 million from 2007. Worldwide, the FAO and the World Food Program estimated in 2009 that more than 1 billion people worldwide were food insecure with trends moving upwards. Food accessibility goes beyond provision of emergency supplies. It necessitates sustainable sources which are produced in ways that enhance the environment and build economic and social equity. The community food security movement has created demonstration projects in rural and urban communities using food as a community development tool to bring food self-sufficiency to locales. These demonstration projects are being replicated with successes. Developing a research base to understand how sustainable food systems work optimally will build on and support this momentum, while informing global food security work.

To meet the identified needs of agriculture, the long-term outcome for this program is to decrease the number of food insecure individuals, families, and communities by addressing key constraints to food accessibility and implementing solutions through adoption of innovative tools, practices, and strategies that enhance sustainable food systems. Projects are expected to address one of the stated Program Area Priorities which collectively contribute to the achievement of the following goals:

1. Increase the number of farms and local and regional food systems that use sustainable practices.
2. Reduce food insecurity and hunger in vulnerable locales.
3. Increase and strengthen local, regional, national, and international markets.

In order to achieve these program goals for Food Accessibility, the Global Food Security Challenge Area will address several focused objectives over the next three years.

In FY 2010:

- Improving sustainable food systems to reduce hunger and food insecurity domestically and globally

In FY 2011:

- Enhancing animal welfare in sustainable food systems – a systems approach that evaluates biological, environmental, and societal impacts of different production systems
- Evaluating Life Cycle Analysis of sustainable food systems
- Determining the impact of use of sustainable food system best practices in communities

In FY 2012:

Enhancing the viability of small and mid-sized farms in the context of global food security through:

- Evaluating trade and sustainable food systems – labor, environment, animal welfare and related issues in major food exporting countries to the United States
- Determining U.S. consumer willingness to pay for standards that enhance food security
- Improving public policies and business strategies that enhance sustainable food systems and global food security

While new funding opportunities to address program goals are anticipated for future fiscal years, these opportunities will be contingent on funding available to NIFA for this purpose.

## 1. ***Improving Sustainability by Improving Feed Efficiency of Animals***

**Program Area Code** – A5101

**Letter of Intent Deadline** – April 14, 2010 (5:00 p.m., ET); see Part IV, A (page 25) for instructions.

**Application Deadline** – July 14, 2010 (5:00 p.m., ET)

**Proposed Budget Requests** –

- Standard Grants must not exceed \$1,000,000 per year (\$5 million total, including indirect costs) for project periods of up to 5 years. Program anticipates making up to 3 awards in FY 2010.
- Conference and Food and Agricultural Science Enhancement (FASE) Grants must adhere to the guidelines outlined beginning in Part II, D. 4 and 5 (page 17).
- Requests exceeding the budgetary guidelines will not be reviewed.

**Requested Project Type** – Integrated Projects

**Requested Grant Type** – Standard, Conference, and FASE Grants

**Program Area Contact** – Dr. Mark Mirando (202-401-4336 or [mmirando@nifa.usda.gov](mailto:mmirando@nifa.usda.gov))

**Program Area Priority** – Applicants must address the following:

- Improving the biological nutrient use efficiency of agriculturally relevant animals (livestock, poultry, and aquaculture).

**Other Program Area Requirements:**

- All applications must adhere to the requirements beginning in Part IV (page 25).
- Applications from and collaborations with Minority Serving Institutions are strongly encouraged.
- This request is aimed at bringing together communities of scientists working in animal genomics, classical/conventional animal breeding, and animal nutrition toward the common goal of improving the efficiency by which animals utilize nutrient resources.
- Applicants seek national and international collaborations with groups working in the same or similar area to minimize duplication of effort, maximize cost effectiveness, and assure a global impact. U.S. collaboration with international partners is encouraged; however, applications must be submitted by eligible U.S. institutions.
- In preparation for future priorities, seed, sabbatical, and equipment proposals are encouraged to focus on education approaches that utilize animal pathogen genomic data to teach students (high school, undergraduate, and/or graduate) how to use the data to advance science.
- Applications must include an appropriate mix of basic and applied research that fills high priority knowledge gaps and leads to new technologies and approaches to improving feed efficiency. Applications are expected to take advantage of recent advances in genomic sequence information and newly developed tools and bioinformatics.
- Projects should justify how proposed work will contribute to sustainable food production systems that address global food availability.
- Applications that include eXtension are required to include a budget for those activities and letter(s) of collaboration. Impact assessment (such as cost-benefit and behavioral changes that result from implementation of the practices, *etc.*) is a requirement. This should inform the project's evolution and not be done exclusively in the final year.
- An undergraduate research component is expected in all projects and these activities need to have the following four components and be appropriately budgeted for:
  - Mentorship – be supervised directly by the Project Director or co-Project Director(s);
  - Originality – have a novel component with meaningful contribution from the student to the objectives of the project;
  - Acceptability – employ techniques or methods that are appropriate for the discipline and at the cutting edge of science; and
  - Dissemination – have a plan to share the results with the broader field and the community.
- All model systems, especially the use of laboratory animals, cell cultures, *etc.*, must be thoroughly justified in terms of the program guidelines and relevance to U.S. animal agriculture. This program will no longer accept applications whose studies primarily utilize non-agricultural or non-aquacultured species as animal models.

2. **Minimizing Losses from Dairy Diseases with Major Impact on Production, Marketing, and/or Trade**

**Program Area Code** – A5111

**Letter of Intent Deadline** – April 23, 2010 (5:00 p.m., ET); see Part IV, A (page 25) for instructions.

**Application Deadline** – July 13, 2010 (5:00 p.m., ET)

**Proposed Budget Requests** –

- Coordinated Agricultural Project (CAP) Grants must not exceed \$2,000,000 per year (\$10 million total, including indirect costs) for project periods of up to 5 years. Program anticipates making no more than 1 award in FY 2010.
- CONTINUING activities must not exceed a total budget (including indirect costs) of \$1.2 million for JDIP CAP for a project period of 1 year; \$1.2 million for PRRS CAP for a project period of 1 year; and \$1.6 million for AI CAP for a project period of 1 year.
- Conference and Food and Agricultural Science Enhancement (FASE) Grants must adhere to the guidelines outlined beginning in Part II, D. 4 and 5 (page 17).
- Requests exceeding the budgetary guidelines will not be reviewed.

**Requested Project Type** – Integrated Projects

**Requested Grant Type** – CAP, Conference, and FASE Grants

**Program Area Contact** – Dr. Peter Johnson (202-401-1896 or [pjohnson@nifa.usda.gov](mailto:pjohnson@nifa.usda.gov))

**Program Area Priority** – Applicants must address one of the following:

- Integrated disease management approaches directed to one of the following only:
  - Bovine tuberculosis
  - Bovine mastitis
  - Bovine Respiratory Disease Complex
- An Integrated CAP to support continuing activities in currently funded CAPs for: Johne's Disease, Avian Influenza, and Porcine Reproductive and Respiratory Syndrome (PRRS).

**Other Program Area Requirements:**

- All applications must adhere to the requirements beginning in Part IV (page 25).
- Applications must include all three functions of the agricultural knowledge system (research, education, and extension). Each function should be represented by one or more objectives within the application.
- Applications from and collaborations with Minority Serving Institutions are strongly encouraged.
- Applications should involve collaborations of multiple institutions.
- In preparation for future priorities, seed, sabbatical, and equipment proposals are encouraged to focus on education approaches that utilize animal pathogen genomic data to teach students (high school, undergraduate, and/or graduate) how to use the data to advance science.
- CAP applications are expected to lead to significant reduction in losses/threats from the target disease, and/or eradicating disease, or preventing disease introduction into the United States and other countries.
- As appropriate to the disease and objectives, teams should contain expertise in areas such as: microbiology, pathology, physiology, genetics/genomics/proteomics, epidemiology, infectious disease mechanisms, diagnostics, and immunology/vaccinology at the molecular, cellular, and whole animal level. Teams may also include experts in ecology, engineering, computer science, curriculum development, extension, program evaluation, economics, sociology, and human sciences.
- Collaboration with international partners is expected; however, applications must be submitted by eligible U.S. institutions.
- Applications are expected to take advantage of recent advances in genomics.
- Diseases that are zoonoses are expected to embody the "One Health" approach ([www.onehealthinitiative.com](http://www.onehealthinitiative.com)) and include expertise from the human medical community.

- Objective(s) relating to immunology/vaccinology are strongly encouraged to include one or more of the research priorities identified in “Advances in Immunology and Vaccine Discovery” (Report of the United States-European Union Commission Workshop; [www.theaavi.org/EU-US\\_Report.doc](http://www.theaavi.org/EU-US_Report.doc)).
- Applicants proposing objectives that include epidemiology, modeling, mathematics and/or ecology are expected to investigate partnering opportunities with the National Institute for Mathematical and Biological Synthesis (NIMBioS; <http://nimbios.org>).
- A plan for inclusion of power analyses is required for all objectives during the project’s duration that use experimental or field animals. For example, studies that propose to test and compare groups must justify the sample size chosen for each group. The main statistical considerations in sample size calculation are the magnitude of the effect size (e.g., difference in proportions, means, survival times, etc.), standard deviation of the outcome, power and the significance level. These assumptions should be described in the rationale for the sample size. Studies that propose to estimate a population characteristic, such as the prevalence of disease, sensitivity and/or specificity of an assay should describe the allowable error margin around the estimate (e.g., +/- 5 percent) and desired confidence level (e.g., 95 percent) used to determine the sample size. The most common problem is lack of adequate sample size, while use of more animals than is necessary is also an important ethical concern.
- Applications that develop new or improved diagnostic tests are expected to include an appropriate validation plan.
- An undergraduate research component is expected, and these activities must have the following four components and be appropriately budgeted for:
  - Mentorship – be supervised directly by the Project Director or co-Project Director(s);
  - Originality – have a novel component with meaningful contribution from the student to the objectives of the project;
  - Acceptability – employ techniques or methods that are appropriate for the discipline and at the cutting edge of science; and
  - Dissemination – have a plan to share the results with the broader field and the community.
- For new CAP proposals, by the end of 5 years (or earlier), the project director and team are to report the estimated overall economic impact of the CAP activities, as well as other significant, relevant outcomes such as, but not limited to, behavioral, social, and, environmental. The project team should return to this expectation each year to assure that the subsequent year’s work will support clear evidence that the CAP federal funding has been a good investment of taxpayer funds.
- Applications proposing approaches using transgenic organisms should address social and regulatory implications of the proposed product.
- Leveraging and coordination of project resources with other USDA and non-USDA efforts for the same or similar area(s) is required.
- Disease communities with the capacity to develop and submit one consensus CAP proposal for that particular priority disease, rather than more than one proposal for the same disease, are encouraged.

### 3. *Oomycete Pathosystems in Crop Plants to Minimize Disease*

**Program Area Code** – A5121

**Letter of Intent Deadline** – April 26, 2010 (5:00 p.m., ET); see Part IV, A (page 25) for instructions.

**Application Deadline** – August 2, 2010 (5:00 p.m., ET)

**Proposed Budget Requests** –

- Coordinated Agricultural Project (CAP) Grants must not exceed \$1,900,000 per year (\$9.5 million total, including indirect costs) for project periods of up to 5 years. Program anticipates making up to 2 awards in FY 2010.
- Conference and Food and Agricultural Science Enhancement (FASE) Grants must adhere to the guidelines outlined beginning in Part II, D. 4 and 5 (page 17).
- Requests exceeding the budgetary guidelines will not be reviewed.

**Requested Project Type – Integrated Projects**

**Requested Grant Type –** CAP, Conference, and FASE Grants

**Program Area Contact –** Dr. Ann Lichens-Park (202-401-6460 or [apark@nifa.usda.gov](mailto:apark@nifa.usda.gov))

**Program Area Priority –** Applicants must address the following:

- Integrated management of oomycete diseases of crop plants (such as, but not limited to, late blight pathogen, *Phytophthora infestans*; downy mildews such as *Pseudoperonospora cubensis*; root infecting organisms like *Pythium* and *Phytophthora* species).

**Other Program Area Requirements:**

- All applications must adhere to the requirements beginning in Part IV (page 25).
- Applications must include all three components of the agricultural knowledge system (research, education, and extension). Each component should be represented by one or more objectives within the application.
- Applications from and collaborations with Minority Serving Institutions are strongly encouraged.
- Applications should involve collaborations of multiple institutions.
- CAP applications are expected to lead to significant reduction in losses/threats from the target disease(s), and/or eradicating disease, or preventing disease introduction into the United States and other countries.
- In preparation for future priorities, seed, sabbatical, and equipment proposals are encouraged to focus on the following education goal: Utilization of plant pathogen genomic data to teach students (high school, undergraduate, and/or graduate) how to use the data to advance science.
- Applications must contain: 1) research translating advances in basic sciences into novel approaches to manage diseases caused by oomycetes in crop plants; 2) plans for sustainable deployment of novel management approaches developed; 3) evaluation of durability of such approaches; and 4) demonstrations of state-of-the art management options to a broad clientele.
- Address multiple components of management; where possible: determine how novel management approaches will affect producer cost/benefit ratios; and/or incorporate market research as a part of the overall project.
- Applicants are encouraged to work with stakeholders to estimate baseline pest impact and subsequent reduction in losses and/or improved profitability due to adoption of new technologies.
- Applications proposing pest control approaches using transgenic organisms and/or chemical applications should address social, environmental, and regulatory implications of the proposed product(s).
- As appropriate to the disease and objectives, teams should contain expertise in areas such as: microbiology, pathology, physiology, genetics/ genomics/ proteomics, epidemiology, infectious disease mechanisms, and diagnostics at the molecular, cellular, and pathosystem level. Teams may also include experts in ecology, engineering, computer science, curriculum development, extension, program evaluation, economics, sociology, and human sciences.
- Collaboration with international partners is expected; however, applications must be submitted by eligible U.S. institutions.
- An undergraduate research component is expected, and these activities must have the following four components and be appropriately budgeted for:
  - Mentorship – be supervised directly by the Project Director or co-Project Director(s);
  - Originality – have a novel component with meaningful contribution from the student to the objectives of the project;
  - Acceptability – employ techniques or methods that are appropriate for the discipline and at the cutting edge of science; and
  - Dissemination – have a plan to share the results with the broader field and the community.
- Applications are expected to take advantage of recent advances in the biological (including genomics), physical, social, and economic sciences.
- Applications that develop new or improved diagnostic tests are expected to include an appropriate validation plan.
- By the end of 5 years (or earlier), the project director and team are to report the estimated overall economic impact of the CAP activities, as well as other significant, relevant outcomes such as,

but not limited to, behavioral, social, and, environmental. The project team should return to this expectation each year to assure that the subsequent year's work will support clear evidence that the CAP federal funding has been a good investment of taxpayer funds.

- Leveraging and coordination of project resources with other USDA and non-USDA efforts for the same or similar area(s) is required.

#### 4. ***Program Delivery and Implementation of Wide-area Pest Monitoring***

**Program Area Code** – A5131

**Letter of Intent Deadline** – May 19, 2010 (5:00 p.m., ET); see Part IV, A (page 25) for instructions.

**Application Deadline** – August 11, 2010 (5:00 p.m., ET)

**Proposed Budget Requests** –

- Coordinated Agricultural Project (CAP) Grants must not exceed \$1,200,000 per year (\$6 million total, including indirect costs) for project periods of up to 5 years. Program anticipates making no more than 1 award in FY 2010.
- Conference and Food and Agricultural Science Enhancement (FASE) Grants must adhere to the guidelines outlined beginning in Part II, D. 4 and 5 (page 17).
- Requests exceeding the budgetary guidelines will not be reviewed.

**Requested Project Type** – Extension Projects

**Requested Grant Type** – CAP, Conference, and FASE Grants

**Program Area Contact** – Dr. Martin Draper – (202-401-1990 or [mdraper@nifa.usda.gov](mailto:mdraper@nifa.usda.gov))

**Program Area Priority** – Applicants must address the following:

- Develop extension-based programs for wide area monitoring of crops, pests, diseases or associated beneficial species and reporting for rapid implementation of existing knowledge, including allowing producers to make better decisions in managing pests of high consequence.

**Other Program Area Requirements:**

- All applications must adhere to the requirements beginning in Part IV (page 25).
- Applications from and collaborations with Minority Serving Institutions are strongly encouraged.
- Applications should involve collaborations of multiple institutions.
- Teams should contain expertise in areas such as microbiology, entomology, plant nematology, apiculture, pathology, physiology, genetics, social sciences, and other disciplinary expertise as appropriate to the project.
- Crop systems may include horticultural crops, field crops, native and urban forests or rangelands where pest issues are of high consequence. Disease organisms include fungal, viral, and bacterial diseases of plant species. Pest organisms may include insects, mites, plant-parasitic nematodes, and weeds; beneficial species include biological control agents and pollinators.
- In preparation for future priorities, seed, sabbatical, and equipment proposals are encouraged to focus on the following education goal: Utilization of plant pest population dynamics and relationships to allied disciplines to teach students (high school, undergraduate, and/or graduate) how to use the data to advance science.
- Application must include validation of wide-area models for pest distribution and dissemination with ground-truth data reported to a reasonable density for scientifically sound analysis and conclusions.
- Address the primary components of the National IPM Road Map ([www.ipmcenters.org/ipmroadmap.pdf](http://www.ipmcenters.org/ipmroadmap.pdf)): Improving cost benefit analyses through the adoption of IPM practices; Reducing potential human health risks from pests and related pest management practices, and; Minimizing adverse environmental effects from pests and related pest management practices.
- Applications for this CAP must focus on extension activities, however, work that supports decision models is acceptable, as is development and implementation of programs to rapidly and effectively detect and monitor the incidence of disease. While this program area is 100%

extension, it is accepted that extension activities include technology transfer and applied research aimed at strengthening the monitoring system.

- Implementation of existing knowledge and technology and development and/or adaptation of tools to fill needs in wide-area pest monitoring programs should be included. The science community should be engaged to form cohesive teams that respond to grower needs relative to high consequence pest management issues and provide for grower education as well as information technology-based push and pull technologies to inform growers of pest risk.
- Development of programs under a common conceptual IT platform or connectivity of data under a common portal to allow shared access among collaborators and appropriate display of public data within the guidance of Federal data security and personally identifiable information (PII) concerns. Data hosting to assure public access for data visualization and appropriate information security.
- Integration of social sciences to measure access to and adoption of best management practices and new technologies with analysis of implications of effects on farm profitability, environmental, and human health implications.
- As appropriate to the disease and objectives, teams should contain expertise in areas such as: microbiology, pathology, physiology, genetics/ genomics/ proteomics, epidemiology, infectious disease mechanisms, and diagnostics at the molecular, cellular, and pathosystem level. Teams may also include experts in ecology, engineering, computer science, curriculum development, extension, program evaluation, economics, sociology, and human sciences.
- An undergraduate extension/research component with direct connections to the project is expected, and these activities must have the following four components and be appropriately budgeted for:
  - Mentorship – be supervised directly by the Project Director or co-Project Director(s);
  - Originality – have a novel component with meaningful contribution from the student to the objectives of the project;
  - Acceptability – employ techniques or methods that are appropriate for the discipline and at the cutting edge of science; and
  - Dissemination – have a plan to share the results with the broader field and the community.
- Collaboration with international partners is expected; however, applications must be submitted by eligible U.S. institutions.
- Leveraging and coordination of project resources with other USDA and non-USDA efforts for the same or similar area(s) is required.

5. ***Improved Sustainable Food Systems to Reduce Hunger and Food Insecurity Domestically and Globally***

**Program Area Code** – A5141

**Letter of Intent Deadline** – April 30, 2010 (5:00 p.m., ET); see Part IV, A (page 25) for instructions.

**Application Deadline** – June 29, 2010 (5:00 p.m., ET)

**Proposed Budget Requests** –

- Standard Grants must not exceed \$1,000,000 per year (\$5 million total, including indirect costs) for project periods of up to 5 years. Program anticipates making up to 5 awards in FY 2010.
- Conference and Food and Agricultural Science Enhancement (FASE) Grants must adhere to the guidelines outlined beginning in Part II, D. 4 and 5 (page 17).
- Requests exceeding the budgetary guidelines will not be reviewed.

**Requested Project Type** – Integrated Projects

**Requested Grant Type** – Standard, Conference, and FASE Grants

**Program Area Contact** – Dr. Elizabeth Tuckermanty (202-205-0241 or

[etuckermanty@nifa.usda.gov](mailto:etuckermanty@nifa.usda.gov))

**Program Area Priority – Applicants must address the following:**

- Develop research, education, and extension sustainable programs on local and regional food systems that will increase food security in disadvantaged U.S. communities and create viability in local economies.

**Other Program Area Requirements:**

- All applications must adhere to the requirements beginning in Part IV (page 25).
- Applications from and collaborations with Minority Serving Institutions are strongly encouraged.
- Applications should involve collaborations of multiple institutions.
- There are many regional and local sustainable food system programs across the country addressing food insecurity by developing small food economies in diverse ways. Applications must explore best practices in these projects, better understand the basis for success or failure measure the innovations, assess social, economic, and environmental impact, determine cost/benefit, and provide feedback and replication opportunities to improve the work.
- Applications must be focused on urban and/or rural self-defined geographic regions centered on ongoing local and regional sustainable food systems (food sheds) that include disadvantaged communities.
- Active participation of disadvantaged communities should guide the project's assessment of best practices that inform future activity, assess infrastructure needs, identify gaps between knowledge and practice; and draw on both domestic and international experience to improve existing approaches.
- Proposed projects must:
  - Include a multi-state, multi-institutional, and trans-disciplinary team composed of public, private, for profit and non-profit sectors, including, but not limited to community-based organizations, universities, local governments, and foundations;
  - Integrate with existing sustainable food system programs and projects and existing successes; and
  - Draw upon such expertise as, but not limited to, the agricultural, social, environmental and economic scientific communities as well as practitioners in community development, marketing, sustainable agriculture, program evaluation, economics, sociology, and human sciences. Applications are required to demonstrate partnerships with and inclusion of individuals representing disadvantaged community members and use community-based approaches.
- Awarded projects will be expected to insure cross linkages between other funded projects to share lessons learned and best practices for efficient use of program funds.
- Projects should promote food security through research, education, and extension using approaches such as, but not limited to, the following:
  - Topic areas for research, education, and extension to be covered may include, but are not limited to:
    - Farm-to-Institution: Farm to schools, farm to retail, farm to hospital
    - Value Supply Chain: entrepreneurship, marketing, community and school garden, youth farm stands, cooperatives
    - Financial: Cost benefit analysis, availability of resources, types of financial instruments, micro-financing
    - Policy: Barriers and enablers of local regional sustainable food systems work and food policy councils interface of local and regional food systems with USDA food assistance programs
  - Research:
    - Identify, assess, and evaluate the best practice constraints and barriers in sustainable, local and regional food systems
    - Identify and assess relevant innovations and trends
    - Develop and test program methods, approaches, and models
    - Translate existing social, biological, environmental, economic, and cultural research into best practices

- Include disadvantaged community participatory research on food systems within their communities to shape best practices
- Identification of special features of local food cultures
- Extension:
  - Participate in all aspects of project activity
  - Implementation of community organizing
  - Collaborating and catalyzing community activity
  - Adoption and application of best practices
  - Inform research through feedback to planning cycle
  - Inform, train, and engage purchasers and consumers
- Education:
  - Develop human capital through formal and non-formal education (*i.e.*, internships for college students; curriculum development; leadership training; staff development; youth development)

## **PART II – Award Information**

### **A. Available Funding**

There is no commitment by USDA to fund any particular application or to make a specific number of awards. In FY 2010, approximately \$262 million is available for support of the AFRI Program. Of this amount, no less than 30 percent will be made available to fund integrated research, education, and extension programs. Of the AFRI funds allocated to research activities, section 7406 of the FCEA directs 60 percent toward grants for fundamental (or basic) research and 40 percent toward grants for applied research. Of the AFRI funds allocated to fundamental research, not less than 30 percent will be directed toward research by multidisciplinary teams. It is anticipated that no less than 10 percent of the FY 2010 funds will be made available for Food and Agricultural Science Enhancement (FASE) Projects, and no more than two percent of the funds available for fundamental research will be made available for Equipment Grants. AFRI funds may be used to support applications submitted to supplementary AFRI RFAs and/or solicitations for multi-agency programs in which AFRI is and will be participating.

In FY 2010, approximately \$19 million is available for support of the Global Food Security Challenge Area within AFRI.

Awards issued as a result of this RFA will have designated the Automated Standard Applications for Payment System (ASAP), operated by the Department of Treasury's Financial Management Service, as the payment system for funds. For more information see [http://www.nifa.usda.gov/business/method\\_of\\_payment.html](http://www.nifa.usda.gov/business/method_of_payment.html).

### **B. Types of Applications**

#### **1. New Application**

A new application is an application that has not been previously submitted to AFRI. New applications will be reviewed competitively using the evaluation criteria specified in Part V, B (page 40).

All awards (excluding Planning/Coordination, Conference, Sabbatical, Equipment, and Seed Grants) will be made as continuation awards. A continuation award is an award instrument by which the Department agrees to support a specified level of effort for a predetermined period of time with a statement of intention to provide additional support at a future date: provided that 1) performance has been satisfactory, 2) appropriations are available for this purpose, and 3) continued support would be in the best interest of the Federal government and the public. Awardees are expected to participate in rigorous post-award management activities to be determined by the Program Area Contacts at the formative stages of the project.

Planning/Coordination, Conference, Sabbatical, Equipment, and Seed Grants will be made as standard awards. A standard award is an award instrument by which the Department agrees to support a specified level of effort for a predetermined project period without the announced intention of providing additional support at a future date.

### **C. Project Types**

Projects supported by AFRI will propose single-function Research, Education, and Extension Projects and multi-function Integrated Research, Education, and/or Extension Projects. Grant types are: Standard Grants, Coordinated Agricultural Project (CAP) Grants, Planning/Coordination Grants, Conference Grants, and Food and Agricultural Science Enhancement (FASE) Grants which include Pre- and Postdoctoral Fellowship Grants, New Investigator Grants, and Strengthening Grants.

The project types solicited in the Global Food Security Challenge Area are indicated in the table below and described in the Program Area Descriptions beginning in Part I, C (page 4). All project types offered for the entire AFRI Program are described below.

Project Types Solicited by Global Food Security Challenge Area										
	Grant Types									
	Standard	CAP <sup>1</sup>	Planning/ Coordination <sup>1</sup>	Conference	Food and Agricultural Science Enhancement (FASE) Grants <sup>2</sup>					
					New Investigator	Strengthening Grants				
				Sabbatical		Equipment	Seed	Standard	CAP	
Research										
Education										
Extension		✓		✓	✓	✓	✓	✓		✓
Integrated	✓	✓		✓	✓	✓	✓	✓	✓	✓

<sup>1</sup> CAP Grants and Planning/Coordination Grants are solicited by a limited number of Program Area Priorities. Refer to Part I, C (page 4) for Program Area Descriptions.

<sup>2</sup> FASE Grants have special eligibility requirements. Refer to Part II, D. 3 (page 18) for eligibility and additional information.

The work proposed for all project types must address a specific Program Area Priority described under Program Area Descriptions beginning in Part I, C (page 4), and the application must be submitted directly to that Program Area by the designated deadline date. Additionally, applicants must adhere to the Application and Submission Information beginning in Part IV (page 25) when preparing applications.

### 1. Research Projects

Single-function Research Projects support fundamental or applied research conducted by individual investigators, co-investigators within the same discipline, or multidisciplinary teams.

**Fundamental research** means research that (i) increases knowledge or understanding of the fundamental aspects of phenomena and has the potential for broad application and (ii) has an effect on agriculture, food, nutrition, or the environment.

**Applied research** means research that includes expansion of the findings of fundamental research to uncover practical ways in which new knowledge can be advanced to benefit individuals and society.

**Multidisciplinary projects** are those in which investigators from two or more disciplines collaborate closely to address a common problem. These collaborations, where appropriate, may integrate the biological, physical, chemical, or social sciences.

### 2. Education Projects

Single-function Education Projects develop human capital relevant to overall program goals for U.S. agriculture. An education activity or teaching activity is formal classroom instruction, laboratory instruction, and practicum experience in the food and agricultural sciences and other related matters such as faculty development, student recruitment and services, curriculum development, instructional materials and equipment, and innovative teaching methodologies.

The applications for Education Projects may include any of the following activities: conducting classroom and laboratory instruction and practicum experience; faculty research internships for curricula development; cutting-edge agricultural science and technology curriculum development; innovative teaching methodologies; instructional materials development; education delivery systems; student experiential learning (student led-research; internships; externships; clinics); student learning styles and student-centered instruction; student recruitment and retention efforts; career planning materials and counseling; pedagogy; faculty development programs; development of modules for on-the-job training; providing knowledge and skills for professionals creating policy or transferring to the

agriculture workforce; faculty and student exchanges; and student study abroad and international research opportunities relevant to overall program goals for U.S. agriculture. The activities for Education Projects must show direct alignment with increasing technical competency in AFRI priority area(s) to ensure that the U.S. remains globally competitive in the knowledge age.

Education Projects address one or two of the following key strategic actions:

- 1) Train students for Associate, Baccalaureate, Master's or Doctoral degrees; and/or
- 2) Prepare K-12 teachers and higher education faculty to understand and present food and agricultural sciences.

These projects should lead to measurable, documented changes in learning, actions, or conditions in an identified audience or stakeholder group. These projects should synthesize and incorporate a wide range of the latest relevant research results.

### 3. **Extension Projects**

Single-function Extension Projects conduct programs and activities that deliver science-based knowledge and informal educational programs to people, enabling them to make practical decisions. Program delivery may range from community-based to national and from face-to-face to electronic or combinations thereof. Extension Projects may also include related matters such as certification programs, in-service training, client recruitment and services, curriculum development, instructional materials and equipment, and innovative instructional methodologies appropriate to informal educational programs.

Extension Projects address one or more of the following key strategic actions:

- 1) Support informal education to increase food and agricultural literacy of youth and adults;
- 2) Promote science-based agricultural literacy by increasing understanding and use of food and agricultural science data, information, and programs;
- 3) Build science-based capability in people to engage audiences and enable informed decision making;
- 4) Develop new applications of instructional tools and curriculum structures that increase technical competency and ensure global competitiveness;
- 5) Offer non-formal learning programs that increase accessibility to new audiences at the rate at which new ideas and technologies are tested and/or developed at the community-scale; and
- 6) Develop programs that increase public knowledge and citizen engagement leading to actions that protect or enhance the nations' food supply, agricultural productivity, environmental quality, community vitality, and/or public health and well-being.

These projects should lead to measurable, documented changes in learning, actions, or conditions in an identified audience or stakeholder group. These projects should synthesize and incorporate a wide range of the latest relevant research results.

### 4. **Integrated Research, Education, and/or Extension Projects**

An Integrated Project includes at least two of the three functions of the agricultural knowledge system (*i.e.*, research, education, and extension) within a project, focused around a problem or issue. The functions addressed in the project should be interwoven throughout the life of the project and act to complement and reinforce one another. The functions should be interdependent and necessary for the success of the project and no more than two-thirds of the project's budget may be focused on a single component.

- 1) The proposed **research** component of an integrated project should address knowledge gaps that are critical to the development of practices and programs to address the stated problem.
- 2) The proposed **education** (teaching and teaching-related) component of an Integrated Project should follow the same scope and principles as Education Projects. Note that routine use of graduate students and postdoctoral personnel to conduct research is not considered education for the purposes of this program.

- 3) The proposed **extension** component of an Integrated Project should follow the same scope and principles as Extension Projects. Please note that research-related activities such as publication of papers or speaking at scientific meetings are not considered extension for the purposes of this program.

Integrated Projects aim to resolve today's problems through the application of science-based knowledge and address needs identified by stakeholders. Integrated Projects clearly identify anticipated outcomes and have a plan for evaluating and documenting the success of the project.

Integrated Project applicants are encouraged to review [www.nifa.usda.gov/funding/integrated/integrated.html](http://www.nifa.usda.gov/funding/integrated/integrated.html) for additional information on integrated programs, including tips for writing Integrated Project applications and an example of an integrated application. Those interested in submitting Integrated Project applications are encouraged to contact the appropriate Program Area Contact to discuss the anticipated project parameters and outcomes to ensure the application content appropriately meets the requirements of an Integrated Project.

#### **D. Grant Types**

##### **1. Standard Grants**

Standard Grants support targeted, original scientific Research, Education, Extension, or Integrated Projects.

##### **2. Coordinated Agricultural Project Grants**

The Coordinated Agricultural Project (CAP) is a type of Research, Education, Extension, or Integrated Project that supports large-scale, multi-million dollar projects to promote collaboration, open communication, and the exchange of information; reduce duplication of effort; and coordinate activities among individuals, institutions, States, and regions. Integrated CAP Grants address problems through multi-function projects that incorporate at least two of the three components of the agricultural knowledge system (*i.e.*, research, extension, and education). Please note that there occasionally may be programs in which an Integrated CAP Grant is required to address all three components of the agricultural knowledge system. In a CAP, participants serve as a team that conducts targeted research, education, and/or extension in response to emerging or priority area(s) of national need. Applications articulate how a CAP will complement and/or link with existing programs or projects at the national level. A CAP contains the needed science-based expertise in research, education, and/or extension, as well as expertise from principal stakeholders and partners, to accomplish project goals and objectives. Applications should outline the potential of the project, the structure, coordination, and plan of implementation, and propose several research, education, and/or extension areas that will be evaluated during the study period. All Research, Education, Extension, and Integrated Project requirements described earlier apply to CAP Grants. CAP Grants are solicited by a limited number of Program Area Priorities. Note that Food and Agricultural Science Enhancement Grants (see Part II, D. 5 (page 18)) can be submitted to Program Areas that solicit CAP Grants. Refer to Part I, C (page 4) for Program Area Descriptions.

##### **3. Planning/Coordination Grants**

Planning/Coordination Grants provide assistance to applicants in the development of quality future CAP applications. Applications must articulate benefits accrued from formal planning activities and provide evidence of a high likelihood that quality future applications will be submitted. Applications are encouraged to develop events/meetings that bring together biological, physical, and social scientists and others as appropriate, including end-users and technology providers, to identify research, education, and/or extension needs, foster collaboration, and create networking opportunities. These activities can take the form of workshops or symposia. The application must include a preliminary agenda for the planned activity. These events and the information they generate should be used to build teams that can develop applications to address identified Program Area Priorities. Planning/Coordination Grants are solicited by a limited number of Program Area Priorities. Note that

ONLY Planning/Coordination Grants may be submitted to these Program Area Priorities. Refer to Part I, C (page 4) for Program Area Descriptions. Grants range from \$25,000 - \$50,000 for one year depending on the size and scope of the project and are not renewable. An institutional allowance not exceeding \$2500 is allowed. Indirect costs are not permitted on Planning/Coordination Grant awards.

**4. Conference Grants**

Conference Grants to support scientific meetings that bring together scientists to identify research, education, and/or extension needs, update information, or advance an area of science are recognized as integral parts of scientific efforts. Support for a limited number of meetings covering subject matter encompassed by this solicitation will be considered for partial or, if modest, total support. Individual conference grants are not expected to exceed \$50,000 for one year and are not renewable. Indirect costs are not permitted on Conference Grant awards.

**5. Food and Agricultural Science Enhancement Grants**

Food and Agricultural Science Enhancement (FASE) Grants strengthen science capabilities in research, education, extension, and integrated programs. FASE Grants are designed to help institutions develop competitive research, education, extension, and integrated projects, and to attract new scientists and educators into careers in high-priority areas of National need in agriculture, food, and environmental sciences. The FASE Grants provide support for Pre- and Postdoctoral Fellowships which will be solicited in a separate NIFA Fellowships Grant Program, New Investigators, and Strengthening Grants. Specific eligibility requirements for these grants are described below.

**a. Pre- and Postdoctoral Fellowship Grants**

Beginning in FY 2010, all Pre- and Postdoctoral Fellowship Grants will be solicited via a separate NIFA Fellows Program RFA. AFRI invites applications from doctoral candidates and individuals who will soon receive or have recently received their doctoral degree for a Pre- or Postdoctoral Fellowship Grant, as appropriate, for research, education, extension, or integrated activities. The AFRI program anticipates awarding at least \$6 million in Pre- and Postdoctoral Fellowship Grants. Information on the NIFA Fellowship Grants program RFA, including the anticipated release date, is available at [www.nifa.usda.gov/funding/afri](http://www.nifa.usda.gov/funding/afri).

**b. New Investigator Grants**

An individual who is beginning his/her career, does not have an extensive scientific publication record, and has less than five years postgraduate, career-track experience is encouraged to submit an application for a New Investigator Grant for research, education, extension, or integrated activities. The new investigator may not have received competitively awarded Federal research funds with the exception of pre- or postdoctoral grants or USDA NRI or AFRI Seed Grants. The application must contain documentation that lists all prior Federal research support. The work proposed for New Investigator Grants must address a specific Program Area Priority described under Program Area Descriptions in Part I, C (page 4), and the application must be submitted directly to that Program Area by the designated deadline date.

**c. Strengthening Grants**

These funds are expected to enhance institutional capacity with the goal of leading to future funding in the project area, as well as strengthen the competitiveness of the investigator's research, education, extension, or integrated activities. Strengthening Grants consist of Standard Grant types (both Single-function and Multi-functional Projects) as well as Seed Grants, Equipment Grants, and Sabbatical Grants. The work proposed for Strengthening Grants must address a specific Program Area Priority described under Program Area Descriptions in Part I, C (page 4), and the application must be submitted directly to that Program Area by the designated deadline date. All applications submitted for Strengthening Grants must fulfill the eligibility requirements described below.

1) Strengthening Grant Eligibility

Strengthening grants are limited to (1) small and mid-sized or minority-serving degree-granting institutions that previously had limited institutional success for receiving Federal funds or (2) State Agricultural Experiment Stations or degree-granting institutions eligible for

USDA Experimental Program for Stimulating Competitive Research (EPSCoR) funding and are eligible for reserved strengthening funds for research, education, extension, and integrated grants. See Figure 1 following Part VIII (page 56) to assist with determining eligibility for Strengthening Grants.

2) Strengthening Grant Eligibility Definitions

a) **EPSCoR States**

Every three years, NIFA determines the states that are eligible for USDA EPSCoR funding. This list is generated by calculating which states have had a funding level no higher than the 38th percentile of all states, based on average funding for the previous three-year period (excluding strengthening set-aside funds). Since this is the second year for the AFRI program, the eligibility determinations are based on the data obtained from grants made through the National Research Initiative program from 2005 to 2008. Beginning FY 2009 and continuing through FY 2010, the following States meet the requirements for this category:

FY 2010 USDA EPSCoR States		
Alabama	Louisiana	South Carolina
Alaska	Maine	South Dakota
Connecticut	Mississippi	Vermont
Delaware	Nevada	West Virginia
Hawaii	New Hampshire	Wyoming
Idaho	North Dakota	
Kentucky	Rhode Island	

Other entities eligible for USDA EPSCoR funds in FY 2009 and continuing through FY 2010 include the following United States commonwealths, territories, possessions and their successors, and the District of Columbia:

Other Entities eligible for USDA EPSCoR Funds	
American Samoa	Northern Mariana Islands
District of Columbia	Puerto Rico
Guam	Virgin Islands of the U.S.
Micronesia	

- b) **Small and mid-sized institutions** are academic institutions with a current total enrollment of 17,500 or less, including graduate and undergraduate as well as full- and part-time students. An institution in this instance is an organization that possesses a significant degree of autonomy as defined by being independently accredited in the current version of the Higher Education Directory, published by Higher Education Publications, Inc., 6400 Arlington Boulevard, Suite 648, Falls Church, Virginia 22042 (703-532-2300; [www.hepinc.com](http://www.hepinc.com)).
- c) **Minority-serving institutions** are academic institutions whose enrollment of a single minority group or a combination of minority groups (as defined in Part VIII, H (page 51)) exceeds 50 percent of the total enrollment, including graduate and undergraduate as well as full- and part-time students.

Applicants applying under this category should indicate the current percentage of applicable minority students enrolled at the institution in a cover letter. An institution in this instance is an organization that possesses a significant degree of autonomy as defined by being independently accredited in the current version of the Higher Education Directory, published by Higher Education Publications, Inc., 6400 Arlington Boulevard, Suite 648, Falls Church, Virginia 22042 (703-532-2300; [www.hepinc.com](http://www.hepinc.com)). A list of post-secondary minority-serving institutions can be found at

<http://www.ed.gov/about/offices/list/ocr/edlite-minorityinst.html>.

- d) **Limited institutional success** is defined as institutions that are not among the most successful universities and colleges for receiving Federal funds for science and engineering research and development. See Table 1 following Part VIII (page 53) for an alphabetical list of the most successful institutions.

All institutions grouped under one main campus as listed in Table 1 following Part VIII (page 53), unless located in an EPSCoR state, are excluded from eligibility for all strengthening funds. The institution may petition for an exemption to this rule as described in Part III, B (page 23).

3) Strengthening Grant Types

An individual applicant may submit only one of the following types of strengthening applications (Sabbatical Grants, Equipment Grants, and Seed Grants) as PD this fiscal year. Investigators are encouraged to contact the Program Area Contact of the appropriate program, regarding suitability of project topics to verify that their submission is appropriate to the program. For Equipment Grants, investigators are also encouraged to contact the appropriate Program Area Contact regarding appropriateness of requested equipment for topics within program requirements.

a) **Sabbatical Grants**

Sabbatical Grants are to provide an opportunity for faculty to enhance their research, education, and/or extension/outreach capabilities by funding sabbatical leaves. Collaborative arrangements are encouraged. Grants will be limited to one year of salary and funds for travel and supplies, where justified, and are not renewable.

NIFA also encourages and will support the concept of “mini-sabbaticals” for faculty and researchers desiring short-term training to learn new techniques that will improve their competitiveness. These short-term training opportunities generally follow all of the sabbatical requirements described beginning in Part IV, C (page 25), but for a shorter duration. These grants may be used to participate in short courses offered at various research institutions.

b) **Equipment Grants**

Equipment Grants are designed to strengthen the research, education, and/or extension/outreach capacity of institutions by funding the purchase of one major piece of equipment. These grants are not intended to replace requests for equipment in individual project applications. Rather, they are intended to help fund items of equipment that will upgrade infrastructure. Requests for computer equipment are allowed only if the equipment is to be used in an activity integral to the proposed project. Requests for computer equipment will not be permitted if the equipment will primarily serve as a word processor or perform administrative functions.

Each request shall be limited to one major piece of equipment within the cost range of \$10,000-\$250,000 and are not renewable. The amount of Federal funding requested shall not exceed 50 percent of the cost or \$50,000, whichever is less. Unless a waiver is granted by NIFA using the criteria listed in Part III, C (page 23), it is the responsibility of the PD to secure required matching funds with non-Federal funds (see Part III, C (page 23) for more information). No installation, maintenance, warranty, or insurance expenses may be paid from these grants, nor may these costs be part of the matching funds. Indirect costs are not permitted on Equipment Grant awards.

c) **Seed Grants**

Seed Grants are to provide funds to enable investigators to collect preliminary data in preparation for applying for research, education, extension, or integrated grants from

AFRI. The grants are not intended to fund stand-alone projects, but rather projects that will lead to further work applicable to one of the AFRI program areas.

Seed Grants are limited to a total of \$150,000 (including indirect costs) for two year duration and are not renewable.

- d) **Strengthening Standard and Strengthening CAP Grants**  
Research, Education, Extension, and Integrated Grant Standard and Coordinated Agricultural Project (CAP) Grant applications that meet the eligibility requirements for Strengthening Grants are eligible for reserved strengthening funds as a Strengthening Standard Grant and Strengthening CAP Grant. The eligibility requirements only apply to the lead PD and are not required for co-PD(s) associated with the project.

## **PART III – ELIGIBILITY INFORMATION**

### **A. Eligible Applicants**

Eligibility is linked to the **project type** requested in Program Area Descriptions beginning in Part I, C (page 4). All project types are described beginning in Part II, C (page 14). Eligible institutions for single-function Research, Education, or Extension Projects are described in paragraph #1 below. Eligible institutions for multi-functional Integrated Projects are described in paragraph #2 below.

Applicants must respond to the Program Area Priorities and deadlines found in the FY 2010 RFAs. Grant recipients may subcontract to organizations not eligible to apply provided such organizations are necessary for the conduct of the project.

#### **1. Research, Education, or Extension Projects**

Eligible applicants for the program implemented under this subpart include: (1) State Agricultural Experiment Stations; (2) colleges and universities (including junior colleges offering associate degrees or higher); (3) university research foundations; (4) other research institutions and organizations; (5) Federal agencies, (6) national laboratories; (7) private organizations or corporations; (8) individuals who are U.S. citizens, nationals, or permanent residents; and (9) any group consisting of 2 or more entities identified in (1) through (8). Eligible institutions do not include foreign and international organizations.

#### **2. Integrated Projects**

Eligible applicants for Integrated Projects include: (1) colleges and universities; (2) 1994 Land-Grant Institutions; and (3) Hispanic-serving agricultural colleges and universities.

For Integrated Projects, the terms "college" and "university" mean an educational institution in any state which (1) admits as regular students only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate; (2) is legally authorized within such state to provide a program of education beyond secondary education; (3) provides an educational program for which a bachelor's degree or any other higher degree is awarded; (4) is a public or other nonprofit institution; and (5) is accredited by a nationally recognized accrediting agency or association. A research foundation maintained by a college or university is eligible to receive an award under this program.

#### **3. Hispanic-serving Agricultural Colleges and Universities**

Section 7101 of the Food, Conservation, and Energy Act of 2008 (Pub.L. 110-246) amended section 1404 of NARETPA (7 U.S.C. 3103) to create a definition for a new group of cooperating institutions: Hispanic-serving Agricultural Colleges and Universities (HSACUs). HSACUs are colleges and universities that qualify as Hispanic-serving Institutions (HSIs) and offer associate, bachelors, or other accredited degree programs in agriculture-related fields. HSACUs do not include 1862 land-grant institutions.

Pursuant to section 406 of the Agricultural Research, Extension, and Education Reform Act of 1998 (AREERA) (7 U.S.C. 7626), which authorized the Integrated Research, Education, and Extension Competitive Grant Program, all four-year HSIs are eligible to apply for Integrated Projects as identified in the FY 2010 AFRI RFA. Two-year HSIs, however, may be eligible to apply only upon a determination by NIFA that the institution offers an associate or other accredited degree programs in agriculture-related fields. To seek an eligibility determination for grants under the FY 2010 AFRI RFA, two-year HSIs may submit a one-page request to NIFA certifying that they are a Hispanic-serving institution, as defined in section 502 of the Higher Education Act of 1965 (20 U.S.C. 1101a), and providing a justification that they do offer associate or other accredited degree programs in agriculture-related fields. Eligibility determinations are valid for FY 2010 only and must be renewed every fiscal year.

Additional questions on HSACU eligibility can be addressed to Dr. Irma Lawrence, HSI National Program Leader, at [ilawrence@nifa.usda.gov](mailto:ilawrence@nifa.usda.gov), (202) 720-2082, or via fax (202) 720-3398. HSIs that seek a determination of eligibility may submit a request before the application deadline date to Dr. Lawrence directly or as a portable document format (PDF) attachment to the SF-424-R&R application package submitted through Grants.gov. The request should document that the HSI: 1) qualifies as a Hispanic-serving institution; 2) offers accredited degree programs in agriculture-related fields; and 3) is not an 1862 Land-Grant institution.

#### 4. **Food and Agricultural Science Enhancement Grants**

The Food and Agricultural Science Enhancement (FASE) Grants have additional eligibility requirements. See Part II, D. 5 (page 18) for details.

### **B. Request for Determination**

If an applicant's institution can be considered a minority-serving institution and wishes to be considered for a Strengthening Grant (as described in Part II, D. 5. c (page 18)), but does not serve one or more of the minority groups specified in the Definitions section of this RFA (see Part VIII, H (page 51)), the applicant must submit to NIFA documentation supporting the request. This documentation must be submitted as part of the requestor's Letter of Intent (if required) and the application package, and must be received by NIFA by the applicable program deadline. The Secretary of Agriculture or designated individual will determine whether the group or groups identified are eligible under this program.

The Request for Determination as a minority-serving institution must be attached with the Letter of Intent (if required) and the final application. The following information must be provided in the order specified below:

1. A description of each minority group that is being submitted for determination;
2. Data or studies supporting this group's designation as a minority group; and
3. Data indicating that enrollment of the minority group(s) exceeds 50 percent of the total enrollment at the academic institution, including graduate and undergraduate and full- and part-time students.

All institutions grouped under one main campus as listed in Table 1 following Part VIII (page 53), unless located in an EPSCoR state (listed in Part II, D. 5. c. 2) a) (page 19)), are excluded from eligibility for all strengthening funds. However, if any campus within a multi-campus listing can provide information demonstrating that it is administratively independent or has an independent accreditation, then the institution may petition for an exemption to this rule and request eligibility for strengthening funds. The Letter of Intent (if required) and the application must include a letter indicating how the institution is independent of the main campus, either through accreditation or administration. In addition, the letter should stipulate that the institution is eligible as a small and mid-sized or minority-serving institution due to enrollment and total federal funds received for science and engineering research and development. The letter must be signed by the Authorized Representative (AR) and included with the Letter of Intent (if required) and the completed application.

### **C. Cost Sharing or Matching**

**For Equipment Grants:** The amount of Federal funds provided may not exceed 50 percent of the cost of the equipment acquired using funds from the grant, or \$50,000, whichever is less. Grantees are required to match 100 percent of Federal funds awarded from non-Federal sources. The Secretary may waive all or part of the matching requirement if all three of the following criteria are met: 1) applicants must be a college, university, or research foundation maintained by a college or university that ranks in the lowest one third of such colleges, universities, and research foundations on the basis of Federal research funds received (see Table 2 following Part VIII (page 54) for eligibility); 2) if the equipment to be acquired using funds from the grant costs not more than \$25,000; and 3) has multiple uses within a single research

project or is usable in more than one research project. If the institution believes it is eligible for the waiver for matching funds, the budget justification must include a letter signed by the institution's AR stating this information.

**For applied research projects:** If a project funded for research is commodity-specific and not of national scope, the grant recipient is required to match the USDA funds awarded on a dollar-for-dollar basis from non-Federal sources with cash and/or in-kind contributions.

## PART IV – APPLICATION AND SUBMISSION INFORMATION

### A. Letter of Intent Instructions

All Program Areas within the Global Food Security Challenge Area require a Letter of Intent for submission of an application. Refer to the Program Area Descriptions beginning in Part I, C (page 4) for Letter of Intent deadlines for a specific Program Area.

Failure to follow the guidelines below may result in the Letter of Intent being removed from consideration.

1. The Letter of Intent must adhere to the following formatting guidelines:
  - a. Font size must be at least 12 point
  - b. Margins must be at least one inch in all directions
  - c. Line spacing must not exceed six lines of text per vertical inch
2. The Letter of Intent is limited to **two pages** for all project types, except for Coordinated Agricultural Project (CAP) Grants for which three pages are allowed.
  - a. On Page 1 provide **only** the following information:
    - i. the name, professional title, department, institution and e-mail address of the lead project director (PD) and all collaborating investigators
    - ii. the Program Area Priority addressed by the project
  - b. On Page 2 (or Pages 2-3 for CAP only) include:
    - i. a descriptive title
    - ii. rationale
    - iii. overall hypothesis or goal
    - iv. specific objectives
    - v. approach
    - vi. potential impact and expected outcomes
3. NIFA will only accept Letters of Intent in the portable document format (PDF). Attach the PDF Letter of Intent to an email addressed to the Program Area Contact listed for that Program Area. In the email subject line write: *Letter of Intent [Program Code] \_ [PDs Last Name]*.
4. For those programs requiring a Letter of Intent, a letter is required for **all** grant types except Planning/Coordination and Conference Grant applications. See Part II, D (page 14) for a detailed description of grant types.
5. Submission of more than one Letter of Intent to a program is discouraged.
6. An acknowledgement receipt will be sent by replying to the sender within 5 business days.
7. Letters of Intent will be reviewed by scientific program staff in order to plan for appropriate expertise for the peer review panel and ensure that the proposed project fits appropriately within the Program Area Priorities.
8. Within three weeks after the Letter of Intent deadline, the PD will receive a response from the Program Area Contact.
9. Where a Letter of Intent is required, applications submitted without a prior Letter of Intent submission will not be reviewed.

## B. Electronic Application Package

Only electronic applications may be submitted via Grants.gov to NIFA in response to this RFA. Prior to preparing an application, it is suggested that the PD first contact an AR to determine if the organization is prepared to submit electronic applications through Grants.gov. If the organization is not prepared, the AR should see [http://www.grants.gov/applicants/get\\_registered.jsp](http://www.grants.gov/applicants/get_registered.jsp) for steps for preparing to submit applications through Grants.gov.

The steps to access application materials are as follows:

1. In order to access, complete and submit applications, applicants must download and install a version of Adobe Reader compatible with Grants.gov. This software is essential to apply for NIFA Federal assistance awards. For basic system requirements and download instructions, please see [http://www.grants.gov/help/download\\_software.jsp](http://www.grants.gov/help/download_software.jsp). To verify that you have a compatible version of Adobe Reader, Grants.gov established a test package that will assist you in making that determination. Grants.gov Adobe Versioning Test Package: <http://www.grants.gov/applicants/AdobeVersioningTestOnly.jsp>.
2. The application package must be obtained via Grants.gov. Go to <http://www.grants.gov>, click on “Apply for Grants” on the left navigation menu, click on “**Step 1: Download a Grant Application Package and Instructions,**” enter the Funding Opportunity Number USDA-NIFA-AFRI-003041 in the appropriate box, and click “Download Package.” From the search results, click “Download” to access the application package.

Contained within the application package is the “NIFA Grants.gov Application Guide: A Guide for Preparation and Submission of NIFA Applications via Grants.gov.” This Guide contains an introduction and general Grants.gov instructions, information about how to use a Grant Application Package in Grants.gov, and instructions on how to complete the application forms.

If assistance is needed to access the application package (e.g., downloading or navigating Adobe forms), refer to resources available on the Grants.gov Web site first. Grants.gov assistance is also available as follows:

Grants.gov customer support  
Toll Free: 1-800-518-4726  
Business Hours: 24 hours a day, 7 days a week; closed on [Federal holidays](#).  
Email: [support@grants.gov](mailto:support@grants.gov)

See <http://www.nifa.usda.gov/funding/electronic.html> for additional resources for applying electronically.

## C. Content and Form of Application Submission

Electronic applications must be prepared following Part V and VI of the document entitled “A Guide for Preparation and Submission of NIFA Applications via Grants.gov.” This guide is part of the corresponding application package (see Section A. of this Part). The following is **additional information** needed in order to prepare an application in response to this RFA. If there is discrepancy between the two documents, **the information contained in this RFA is overriding**.

All application information provided herein is general for all Project and Grant Types. However, some types require different information. These differences are noted by a ☼ symbol. Proper preparation of an application will assist reviewers in evaluating the merits of each application in a systematic, consistent fashion.

Note: Do not use special characters (e.g., #, \$, %, &, \*, -, /, ', ") when completing the forms within the Grants.gov application package. Use of special characters is acceptable in the PDF attachments to the application.

1. **Attachment Requirements**

NIFA will only accept attachments in PDF. See Part III of the NIFA Grants.gov Application Guide. SUBMITTED APPLICATIONS THAT DO NOT MEET THESE REQUIREMENTS FOR PDF ATTACHMENTS WILL NOT BE REVIEWED. If you do not own PDF-generating software, Grants.gov provides online tools to assist applicants at <http://www.grants.gov/agencies/software.jsp#3>.

NOTE: DO NOT use the “Assemble Files into a PDF Package” feature of Adobe Acrobat Professional. This will prevent reviewers from reading the files. Use the “Merge Files into a Single PDF” feature.

Submitted PDF documents must adhere to the following formatting guidelines:

- Font size must be at least 12 point
- Margins must be at least one inch in all directions
- Line spacing must not exceed six lines of text per vertical inch
- Follow the page limitations for each attachment
- Number pages sequentially for each attachment
- Title each attachment in the document header and save each file with the referenced name (When naming your file, please do not use special characters or spaces in the file names.)

2. **SF 424 R&R Cover Sheet**

Instructions related to this form are explained in detail in Part V, 2. of the NIFA Grants.gov Application Guide.

**a. Field 12. Proposed Project** – For the start date of the project, select a date at least six months after the submission deadline date for the program. Choose the end date to correspond to the correct duration of the project.

**b. Field 20. Pre-application** – Do not fill out this portion of the form. The AFRI is not accepting pre-applications in FY 2010 in any of the programs. Some programs require a Letter of Intent. See Program Area Descriptions for more details.

3. **SF 424 R&R Project/Performance Site Location(s)**

Instructions related to this form are explained in detail in Part V, 3. of the NIFA Grants.gov Application Guide.

4. **R&R Other Project Information**

Instructions related to this form are explained in detail in Part V, 4. of the NIFA Grants.gov Application Guide.

**a. Fields 1 and 2. Are Human Subjects Involved? and Are Vertebrate Animals Used?**

☼ *For Sabbatical Grant Applications* – Applicants whose research requires use of human subjects or vertebrate animals must have their project reviewed by the appropriate committee(s) at the institution where the research will be conducted.

**b. Field 7. Project Summary/Abstract – PDF Attachment.** The Project Summary is limited to **250 words**. Title the attachment as ‘Project Summary’ in the document header and save file as ‘ProjectSummary’.

A recommended template for the Project Summary/Abstract can be found at: [http://www.nifa.usda.gov/funding/templates/project\\_summary.doc](http://www.nifa.usda.gov/funding/templates/project_summary.doc).

The Project Summary must list the names and institutions of the PD and co-PDs and indicate which specific FY 2010 Program Area Priority(ies) the proposed project addresses. Program Area Priorities

are stated within each Program Area Description (see Part I, C (page 4)). Applications that do not address at least one Program Area Priority will not be reviewed.

☀ *For Conference Grant Applications* – State the objectives of the conference, symposium, or workshop, as well as the proposed location and probable inclusive date(s) of the conference. Please state in the summary the specific Program Area Priority(ies) to which the project applies.

☀ *For Sabbatical Grant Applications* – Indicate overall project goals and supporting objectives.

☀ *For Equipment Grant Applications* – Indicate equipment sought and overall project goals for its use.

**c. Field 8. Project Narrative – PDF Attachment. 18-Page or 7-Page Limit** (explained below). Title the attachment as 'Project Narrative' in the document header and save file as 'ProjectNarrative'.

For Standard Research, Standard Education, Standard Extension, Standard Integrated, Coordinated Agricultural Project, Planning/Coordination, Conference, New Investigator, and Strengthening Standard Grant applications, the Project Narrative section may not exceed a total of 18 pages with 12-point font and line spacing not exceeding six lines of text per vertical inch, including all figures and tables.

For Sabbatical, Equipment, and Seed Grant applications, the Project Narrative section may not exceed a total of 7 pages with 12-point font and line spacing not exceeding six lines of text per vertical inch, including all figures and tables.

To ensure fair and equitable competition, applications exceeding the applicable page limitation will be returned without review.

**Project Narrative must include all of the following:**

- 1) Introduction  
Include a clear statement of the long-term goal(s) and supporting objectives of the proposed project. Summarize the body of knowledge or past activities that substantiate the need for the proposed project. Describe ongoing or recently completed activities significant to the proposed project including the work of key project personnel. Include preliminary data/information pertinent to the proposed project. All works cited should be referenced (see Bibliography & References Cited in Part IV, C. 4. d (page 31)).
- 2) Rationale and Significance
  - a) Concisely present the rationale behind the proposed project;
  - b) Describe the specific relationship of the project's objectives to one or more of the particular Program Area Priorities. Applications that do not address at least one Program Area Priority will not be reviewed; and
  - c) The potential long-range improvement in and sustainability of U.S. agriculture and food systems should be shown clearly. These purposes are described under Purpose and Priorities in Part I, B (page 1). Any novel ideas or contributions that the proposed project offers should also be discussed in this section.
- 3) Approach  
The activities proposed or problems being addressed must be clearly stated and the approaches applied are to be clearly described. Specifically, this section must include:
  - a) A description of the activities proposed and the sequence in which the activities are to be performed;
  - b) Methods to be used in carrying out the proposed project, including the feasibility of the methods;
  - c) Expected outcomes;

- d) Means by which results will be analyzed, assessed, or interpreted;
- e) How results or products will be used;
- f) Pitfalls that may be encountered;
- g) Limitations to proposed procedures;
- h) A full explanation of any materials, procedures, situations, or activities related to the project that may be hazardous to personnel, along with an outline or precautions to be exercised to avoid or mitigate the effects of such hazards; and
- i) A timeline for attainment of objectives and for production of deliverables that includes annual milestones with specific, measurable outcomes.

☀ *For Education Project Applications* – In addition to the Project Narrative requirements above, the proposed Education Project should clearly articulate:

- The potential for advancing the quality of education by addressing a specific problem or opportunity;
- The target audience and the level of education addressed;
- The long-term benefits to the institution, including how the institution attributes a high priority to the project and how the project is linked to and supported by the institution's strategic plan;
- A plan for evaluating progress toward achieving project objectives. The plan must include milestones, which signify the completion of a major deliverable, event, or accomplishment and serve to verify that the project is on schedule and on track for successful conclusion. The plan should also include descriptions of indicators that you will measure to evaluate whether the education activities are successful in achieving project goals and in contributing to achievement of the stated program goals and outcomes; and
- A dissemination plan describing the methods that will be used to communicate findings and project accomplishments.

☀ *For Extension Project Applications* –

- Extension Projects should involve a series of connected learning activities that engage the public in practical problem solving. Programming should be more than a one-time event, a single publication, a one-dimensional activity, or a general public awareness campaign. Together, informal learning activities should be elements in a curriculum-based program that has learning goals and objectives.
- Extension Projects should be connected to both 1) scientific-research based information and 2) science-based teaching techniques and informal education principles.
- In addition to the Project Narrative requirements above, the proposed Extension Project should give emphasis to scholarly principles of engagement and outreach that clearly articulate:
  - The importance of informal education to address a specific local problem or issue;
  - The theoretical basis of informal outreach methods used;
  - Development and/or implementation of a curriculum-based series of connected learning activities (including educational materials) that engage the public in practical problem solving;
  - A plan for evaluating progress toward achieving project objectives. The plan must include milestones, which signify the completion of a major deliverable, event, or accomplishment and serve to verify that the project is on schedule and on track for successful conclusion. The plan should also include descriptions of indicators that you will measure to evaluate whether the extension activities are successful in achieving project goals and in contributing to achievement of the stated program goals and outcomes; and
  - A dissemination plan describing the methods that will be used to communicate findings and project accomplishments.
- AFRI encourages “community-based” Extension Projects. Community-based programming ranges from a single town to a county, collection of counties, state, or region. Applications with leadership from campus-based faculty specialists that incorporate programming/work of local agents are highly desirable.
- AFRI encourages Extension Projects that develop content suitable for delivery through eXtension. This content is for “end users” as opposed to staff development and must align with the eXtension Guiding Principles, Implementation Plan, and other requirements presented at

<http://about.extension.org/university-researcher>. Funds may be used to contribute to an existing Community of Practice or to form a new Community of Practice as appropriate.

☀ *For Integrated Project Applications –*

- Integrated Project applications must include at least two of the three functions of the agricultural knowledge system (*i.e.*, research, education, and extension). Each function should be represented by one or more objectives within the application.
- Projects must budget sufficient resources to carry out the proposed set of research, extension, and/or education activities that will lead to the desired outcomes. No more than two-thirds of a project's budget may be focused on a single function.
- Integrated Projects must include individuals on the project team with significant expertise in each component of the project (research, education, and/or extension).
- A plan for evaluating progress toward achieving project objectives must be included. The plan must include milestones, which signify the completion of a major deliverable, event, or accomplishment and serve to verify that the project is on schedule and on track for successful conclusion. The plan should also include descriptions of indicators that you will measure to evaluate whether the research, education, and/or extension activities are successful in achieving project goals and in contributing to achievement of the stated program goals and outcomes.
- In addition to the Project Narrative requirements above, the proposed Integrated Project should clearly articulate:
  - Stakeholder involvement in project development, implementation, and evaluation, where appropriate;
  - Objectives for each function included in the project (note that extension and education activities are expected to differ and to be described in separate project objectives; see enumerated descriptions in Part II, C (page 14)); and
  - A dissemination plan describing the methods that will be used to communicate findings and project accomplishments.
- AFRI encourages Integrated Projects that develop content suitable for delivery through eXtension. This content is for “end users” as opposed to staff development and must align with the eXtension Guiding Principles, Implementation Plan, and other requirements presented at <http://about.extension.org/university-researcher>. Funds may be used to contribute to an existing Community of Practice or to form a new Community of Practice as appropriate.
- AFRI encourages Integrated Projects that lead to measurable, documented changes in learning, actions or conditions on projects suitable for 4-H audiences and stakeholder groups while meeting identified program priorities. The 4-H Youth Development is the programmatic outreach of the Land Grant Universities and Institutions to our youngest citizens in their communities. 4-H provides opportunities for youth to develop skills, practical knowledge, and wisdom with an emphasis on practical application of knowledge or “learning by doing.” From the earliest days of the 4-H Program, Land Grant Universities provided research-based education and extension programming to promote technology transfer directly to the future scientists and leaders, and also to their families, leading to the application of cutting-edge research, knowledge, and technologies. By engaging 4-H in AFRI projects, applicants engage young people as citizen scientists; increase their awareness of the role of agriculture; and prepare young people for higher education and the 21st century work environment. Opportunities for engaging 4-H in AFRI proposals should align with the 4-H Mission Mandates of Science, Engineering and Technology; Healthy Living; and Citizenship. See guiding principles at [www.national4-hheadquarters.gov](http://www.national4-hheadquarters.gov) or contact your university Cooperative Extension headquarters and/or State 4-H Program Office.

☀ *For Planning/Coordination Grant Applications –* In addition to the Project Narrative requirements above, substitute the following in the Approach section:

- A justification for the event/meeting;
- Recent events/meetings on the same subject with dates and locations;
- Names and organizational affiliations of the chair and other members of the organizing committee;

- A proposed program (or agenda) for the activity and a listing of scheduled participants, including stakeholders and their institutional affiliations;
- Expected outcomes, including how the planning project expects to contribute to development of a successful application for an AFRI grant; and
- The method of announcement or invitation that will be used.

☀ *For Conference Grant Applications* – In addition to the Project Narrative requirements above, substitute the following in the Approach section:

- A justification for the meeting;
- Recent meetings on the same subject with dates and locations;
- Names and organizational affiliations of the chair and other members of the organizing committee;
- A proposed program (or agenda) for the conference, including a listing of scheduled participants and their institutional affiliations; and
- The method of announcement or invitation that will be used.

☀ *For Sabbatical Grant Applications* – In addition to the Project Narrative requirements above, substitute the following in the Approach section:

- A general description of the research, education, and/or extension interests and goals of the applicant in order to provide perspective for the application;
- A description of the project to be pursued while on the sabbatical leave;
- A statement of how the sabbatical leave will enhance the capabilities of the applicant; and
- A statement of future research goals and objectives once the sabbatical is complete and how the sabbatical will enable the applicant to pursue these goals.

☀ *For Equipment Grant Applications* – In addition to the Project Narrative requirements above, include a general description of the project(s) for which the equipment will be used, how the equipment will fit into or enhance the research, education, and/or extension program, and how the equipment will allow the applicant to become competitive for future funding or move into new research areas. Also include a description of other similar or complementary equipment available to the PD at the institution and why the requested equipment is necessary.

☀ *For Seed Grant Applications* – Include all of the components detailed in the Project Narrative section above and present enough detail to allow adequate evaluation. In order to be competitive, long-term goals and a statement describing how this Seed Grant will allow the applicant to become competitive for future funding must be included.

**d. Field 9. Bibliography & References Cited – PDF Attachment. No Page Limit.** Title the attachment as 'Bibliography & References Cited' in the document header and save file as 'BibliographyReferencesCited'.

All work cited in the text should be referenced in this section of the application. All references must be complete; include titles and all co-authors; conform to an acceptable journal format; and be listed in alphabetical order using the last name of the first author or listed by number in the order of citation.

**e. Field 10. Facilities & Other Resources – PDF Attachment. No Page Limit.** Title the attachment as 'Facilities & Other Resources' in the document header and save file as 'FacilitiesOtherResources'.

**f. Field 11. Equipment – PDF Attachment. No Page Limit.** Title the attachment as 'Equipment' in the document header and save file as 'Equipment'.

In addition to describing available equipment, items of nonexpendable equipment necessary to conduct and successfully complete the proposed project should be listed in Field C. of the R&R Budget and described in the Budget Justification (Field K. of the R&R Budget).

**g. Field 12. Other Attachments**

- 1) **Project Type – PDF Attachment. 1-Page Limit.** Title the attachment as 'Project Type' and save file as 'ProjectType'.

Identify the type of project and the type of grant you are submitting by completing the Project Type template located at: [www.nifa.usda.gov/funding/templates/project\\_type.doc](http://www.nifa.usda.gov/funding/templates/project_type.doc). Before doing so, however, please refer to Part I, C (page 4) of this RFA to determine which project types are requested under each Program Area Description. Also please see Part II (page 14) of this RFA for a full description of each project and grant type.

- 2) **Key Personnel Roles – PDF Attachment. 2-Page Limit.** Title the attachment as 'Key Personnel' and save file as 'KeyPersonnel'.

Clearly describe the roles and responsibilities of the PD, co-PD(s), collaborator(s), and other key personnel. Biographical sketches for key personnel should be attached in the R&R Senior/Key Person Profile described in Part IV, C. 5 (page 33). If it will be necessary to enter into formal consulting or collaborative arrangements with others, such arrangements should be fully explained and justified. If the consultant(s) or collaborator(s) are known at the time of application, a biographical sketch should be provided in the R&R Senior/Key Person Profile. Collaborators simply providing services or materials should not be listed in the R&R Senior/Key Person Profile and a biographical sketch is not required. Evidence (letters of support) for this type of collaboration should be provided in the 'Documentation of Collaboration' (see number 5 below). These signed letters should provide evidence that the collaborators involved have agreed to render these services.

☀ *For Integrated Grant Applications* – state for each key personnel an estimate of the percent of time devoted to research, education, and/or extension activities.

- 3) **Logic Model – PDF Attachment. Required for Education, Extension, and Integrated Projects Only. 2-Page Limit.** Title the attachment as 'Logic Model' and save file as 'LogicModel'.

Applications proposing Education, Extension, or Integrated Projects must include the elements of a logic model detailing the activities, outputs, and outcomes of the proposed project. The logic model planning process is a tool that should be used to develop your project before writing your application. This information may be provided as a narrative or formatted into a logic model chart. More information and resources related to the logic model planning process are provided at [www.nifa.usda.gov/funding/integrated/integrated\\_logic\\_model.html](http://www.nifa.usda.gov/funding/integrated/integrated_logic_model.html).

- 4) **Management Plan – PDF Attachment. Required for Integrated Projects and Coordinated Agricultural Project (CAP) Grants Only. 3-Page Limit.** Title the attachment as 'Management Plan' and save file as 'ManagementPlan'.

The application must contain a clearly articulated project management plan to ensure efficient functioning of the team that includes an organizational chart, administrative timeline, and a description of how the project will be governed, as well as a strategy to enhance coordination, collaboration, communication, and data sharing and reporting among members of the project team and stakeholder groups. Applications must include a plan for sustaining the program beyond the termination of the project.

The management plan should also include an advisory group of principal stakeholders, partners, and professionals to assess and evaluate the quality, expected measurable outcomes, and potential impacts for the proposed research, education, and/or extension.

Please include letters of commitment (in Documentation of Collaboration below), rationale for their role, and how they will function effectively to support the goals and objectives of the project. The plan must demonstrate how partners and stakeholders contribute to project assessment on an annual basis.

- 5) *Documentation of Collaboration* – **PDF Attachment. No Page Limit.** Title the attachment as 'Documentation of Collaboration' in the document header and save file as 'Collaboration'.

Evidence, e.g., letter(s) of support, should be provided that the collaborators involved have agreed to render services. The applicant also will be required to provide additional information on consultants and collaborators in the budget portion of the application.

☼ *For Sabbatical Grant Applications* – Provide documentation that arrangements have been made with an established investigator(s) to serve as host, including:

- A letter from the home institution detailing the particular arrangements at the home institution with respect to salary and date and duration of sabbatical;
- A letter from the scientific host(s) indicating willingness to serve in this capacity and a description of the host's contribution to the proposed activities both scientifically and with regard to use of facilities and equipment; and
- A statement signed by the Department Head or equivalent official at the host institution indicating a commitment to provide research space and facilities for the period of the applicant's presence.

☼ *For Equipment Grant Applications* – The application must contain a letter(s) from the organization(s) committed to providing the non-Federal matching funds. Provide evidence of institutional commitment for operation and maintenance of requested equipment.

Arrangements for sharing equipment among faculty are encouraged. However, it must be evident that the PD is a principal user of the requested equipment.

- 6) *Appendices to Project Narrative* – **PDF Attachment. Limited to 2 preprints.** Title the attachment as 'Preprints' in the document header and save file as 'Preprints'.

Appendices are strictly limited to a maximum of **2 preprints only** (only manuscripts in press for a peer-reviewed journal will be accepted and must be accompanied by letters of acceptance from the publishing journals). Preprints attached in support of the application should be **single-spaced**. Each preprint must be identified with the name of the submitting organization, the name(s) of the PD(s), and the title of the application.

Each Project Narrative is expected to be complete; however, additions to the Project Narrative (appendices, i.e., preprints) are allowed if they are directly germane to the proposed project. Information may not be appended to an application to circumvent page limitations prescribed for the Project Narrative. **Extraneous materials will not be used during the peer review process.**

- 7) *Other Documents* (as requested) – **PDF Attachment.** Title the attachment as indicated in the Program Area Description in the document header and save file with the same name.

## 5. R&R Senior/Key Person Profile

Instructions related to this form are explained in detail in Part V, 5. of the NIFA Grants.gov Application Guide.

A Senior/Key Person Profile should be completed for the PD and each co-PD, senior associate, and other professional personnel, including collaborators playing an active role in the project. Collaborators only providing services or materials should not be listed in the R&R Senior/Key Person Profile. Evidence (letters of support) for this type of collaboration should be provided in the Documentation of Collaboration (see Part IV, C. 4. g. 5 (page 33)).

**a. Project Role Field** – Complete appropriately.

☼ *For Sabbatical Grant Applications* – Select “PD/PI” for the Sabbatical Grant applicant. Select “Other” for the corresponding scientific host(s) and any other personnel whose qualification merit consideration in the evaluation of the application.

☼ *For Equipment Grant Applications* – Select “PD/PI” for the Equipment Grant applicant. Select “Faculty” for the other major users of the equipment.

**b. Other Project Role Category Field** – Complete appropriately, if applicable.

**c. Attach Biographical Sketch Field – PDF Attachment. 2-Page Limit** (excluding publications listings) per PD, co-PD, senior associate, and other professional personnel. Title the attachment as ‘Biographical Sketch’ in the document header and save file as ‘BiographicalSketch’.

A biographical sketch (vitae) of the PD and each co-PD, senior associate, and other professional personnel should be included.

The Conflict of Interest list should not be included in the biographical sketch, but it must be provided as a separate document (see Part IV, C. 8. c (page 37) for more information).

☼ *For Sabbatical Grant Applications* – A Biographical Sketch must be submitted for the Sabbatical Grant applicant, the scientific host(s), and any other personnel whose qualifications merit consideration in the evaluation of the application.

☼ *For Equipment Grant Applications* – A Biographical Sketch for both the Equipment Grant applicant and other major users of the equipment must be submitted.

**d. Attach Current and Pending Support Field – PDF Attachment. No Page Limit.** Title the attachment as ‘Current and Pending Support’ in the document header and save file as ‘CurrentPendingSupport’.

A recommended template for the Current and Pending Support can be found at:  
[http://www.nifa.usda.gov/funding/templates/current\\_pending.doc](http://www.nifa.usda.gov/funding/templates/current_pending.doc).

Current and Pending Support information is only required for personnel with PD or co-PD indicated as their Project Role on the R&R Senior/Key Person Profile. All applications must contain a list of all Current and Pending Support detailing public or private support (including in-house support) to which personnel identified in the application have committed portions of their time, whether or not salary support for person(s) involved is included in the budget. Please note that the project being proposed should be included in the pending section of the form. Total project time listed for each PD should be indicated as percent effort and not exceed 100% for concurrent projects.

The AFRI program will not fund an application that duplicates or overlaps substantially with other NIFA funding (including non-competitive funds such as Special Grants or Hatch formula funds) or other Federal funding. As an addendum to the Current and Pending Support, provide a brief summary for any completed, current, or pending projects that appear similar to the current application, especially previous NRI or AFRI awards.

☼ *For Sabbatical Grant Applications* – Current and Pending Support for both the Sabbatical Grant applicant and the scientific host(s) (as documentation of on-going work in the host’s laboratory) must be completed.

☼ *For Equipment Grant Applications* – Current and Pending Support for both the Equipment Grant applicant and other major users of the equipment must be completed. If the applicant has significant

funding from other sources, a justification must be provided in the Project Narrative for how this equipment will strengthen the applicant's research program or institution.

6. **R&R Personal Data**

Instructions related to this form are explained in detail in Part V, 6. of the NIFA Grants.gov Application Guide.

7. **R&R Budget**

Instructions related to this form are explained in detail in Part V, 7. of the NIFA Grants.gov Application Guide.

**a. Budget Periods.** Applications must contain a budget for each budget period for the entire duration of the proposed project. Annual and cumulative budgets are required.

If a project is funded, beginning in the first year of funding, the project director will be required to attend annual investigator meetings for the duration of the award (excluding Planning/Coordination, Conference, Sabbatical, and Equipment Grant applications). Seed Grant applications are required to attend beginning in the second year of funding. Reasonable travel expenses should be included as part of the project budget.

☼ *For Integrated Project Applications* – Projects must budget sufficient resources to carry out the proposed set of research, extension, and/or education activities that will lead to the desired outcomes. No more than two-thirds of a project's budget may be focused on a single component.

☼ *For Planning/Coordination Grant Applications* – These awards are limited to one-year duration and are not renewable. An institutional allowance not exceeding \$2500 is allowed. Indirect costs are not permitted on Planning/Coordination Grant awards.

☼ *For Conference Grant Applications* – The budget for the conference may include an appropriate amount for transportation and subsistence costs for participants and for other conference-related costs. Conference awards are not expected to exceed \$50,000 and are not renewable. Indirect costs are not permitted on Conference Grant awards. Include an itemized breakdown of all support requested from the AFRI in the Budget Justification (Field K. of the R&R Budget).

☼ *For Sabbatical Grant Applications* – Limit to one year's salary and funds for travel and supplies.

☼ *For Equipment Grant Applications* – Each request shall be limited to one major piece of equipment within the cost range of \$10,000-\$250,000. Equipment grants are not renewable. The amount requested shall not exceed 50 percent of the cost or \$50,000, whichever is less. Unless waived, it is the responsibility of the PD to secure the required matching funds with non-Federal funds (see Part III, C (page 23) for more information). No installation, maintenance, warranty, or insurance expenses may be paid from these awards, nor may these costs be part of the matching funds. Indirect costs are not permitted on Equipment Grant awards.

☼ *For Seed Grant Applications* – These awards will be limited to a total of \$150,000 (including indirect costs) for two years and are not renewable.

**b. Field H. Indirect Costs** – NIFA is prohibited from paying indirect costs exceeding 22 percent of the total Federal funds provided under each award. This limitation is equivalent to 0.28205 of the total direct costs of an award. See Part IV, E (page 37) for additional information.

**c. Field K. Budget Justification – PDF Attachment. No Page Limit.** Title the attachment as 'Budget Justification' in the document header and save file as 'BudgetJustification'.

All cumulative budget categories, with the exception of Indirect Costs, for which support is requested must be individually listed (with costs) in the same order as the cumulative budget. NOTE: For

continuation awards, all budget categories for year one must also be fully justified. If consulting, collaborative, or subcontractual arrangements are included in the application, these arrangements should be fully explained and justified. The rate of pay for any consultant must be included, if known at the time of application. Please include a cost breakdown for the consultant, including the number of days in service, travel, and per diem, as well as the rate of pay. Letters of consent or collaboration and other evidence should be provided in the Documentation of Collaboration (see Part IV, C. 4. g. 5 (page 33)) to show that collaborators have agreed to participate. A proposed statement of work, biographical sketch, and a budget for each arrangement involving the transfer of substantive programmatic work or the provision of financial assistance to a third party must be supplied. In multi-institutional applications, a budget and budget narrative must be included for each institution involved. The lead institution and each participating institution must be identified.

☼ *For Integrated Project Applications* – Each function should be represented by one or more objectives within the application. Projects must budget sufficient resources to carry out the proposed set of research, extension, and/or education activities that will lead to the desired outcomes. No more than two-thirds of a project's budget may be focused on a single component.

☼ *For Equipment Grant Applications* – The Budget Justification should describe the instrument requested including the manufacturer and model number, if known; provide a detailed budget breakdown of the equipment and accessories required; and indicate the amount of funding requested from USDA for each component of equipment requested. A letter signed by the institution's AR stating that the necessary non-Federal matching funds will be made available from an institutional or other source is required. An institution that believes it is eligible for the waiver of the matching funds should include a letter stating and documenting the eligibility that is signed by the institution's AR (see Table 2 following Part VIII (page 54) for eligibility). A justification must be given for how this equipment will strengthen the applicant's research program or institution.

#### **d. Subcontract Arrangements.**

If it will be necessary to enter into a formal subcontract agreement with another institution, financial arrangements must be detailed in the "R&R Subaward Budget Attachment(s) Form." Annual and cumulative budgets and a budget justification are required for each subcontract agreement. Refer to Part V, 8. of the NIFA Grants.gov Application Guide for instructions on completing this form.

#### **e. Matching**

**Equipment Grants** requiring matching funds, as specified in Part III, C (page 23), must include a letter in the budget justification signed by the institution's AR stating that the necessary non-Federal matching funds will be made available from the institution or other source. The amount of Federal funds provided may not exceed 50 percent of the cost of the equipment acquired using funds from the grant, or \$50,000, whichever is less. Grantees are required to match 100% of federal funds awarded from non-Federal sources. If the institution believes it is eligible for the waiver for matching funds (see Part III, C (page 23) for waiver eligibility), the budget justification must include a letter signed by the institution's AR stating this information. NIFA will consider this justification when ascertaining final matching requirements or in determining if required matching can be waived. NIFA retains the right to make final determinations regarding matching requirements.

For **applied research projects** (as defined in Part II, C. 1 (page 51)), if a grant funded for research is commodity-specific and not of national scope, the grant recipient is required to match the USDA funds awarded on a dollar-for-dollar basis from non-Federal sources with cash and/or in-kind contributions.

The sources and the amount of all matching support from outside the applicant organization should be summarized on a separate page and placed in the application immediately following the Budget Justification. All pledge agreements must be placed in the application immediately following the summary of matching support.

The value of applicant contributions to the project shall be established in accordance with applicable cost principles. Applicants should refer to OMB Circular A-21 (2 CFR Part 220), Cost Principles for Educational Institutions, for further guidance and other requirements relating to matching and allowable costs.

#### 8. Supplemental Information Form

Instructions related to this form are explained in detail in Part VI, 1. of the NIFA Grants.gov Application Guide.

**a. Field 1. Funding Opportunity** – Funding Opportunity Name is pre-populated with “Agriculture and Food Research Initiative” and “USDA-NIFA-AFRI-003041” for Funding Opportunity Number in Field 1.

**b. Field 2. Program to which you are applying** – Enter the Program Code Name and the Program Code for the Program Area to which you are applying from the information provided in the Program Area Descriptions beginning in Part I, C (page 4). An application can only be submitted to one program. It is extremely important that the Program Code Name and Program Code are spelled correctly and match this RFA. If you have a question about which topic area is appropriate for your application, please contact the Program Area Contact.

**c. Field 8. Conflict of Interest List – PDF Attachment. No Page Limit.** Title the attachment as ‘Conflict of Interest’ in the document header and save file as ‘Conflict of Interest’.

A Conflict of Interest List is required for all applications submitted to the AFRI. The Conflict of Interest List should be provided as a separate PDF attachment and not included in the vitae or resume. A Conflict of Interest List must be completed individually for all personnel who have submitted a Biographical Sketch in the R&R Senior/Key Personnel Profile. **Collate all individual Conflict of Interest lists into a single document file.** The lists can only be submitted as a single PDF attachment.

A recommended template for the Conflict of Interest List can be found at:  
[http://www.nifa.usda.gov/funding/templates/conflict\\_of\\_interest.doc](http://www.nifa.usda.gov/funding/templates/conflict_of_interest.doc).

☼ *For Equipment Grant Applications* – Conflict of Interest list for the Equipment Grant applicant and other major users of the equipment must be completed.

#### D. Submission Dates and Time

Electronic applications must be submitted via Grants.gov by 5:00 p.m. ET on the dates indicated in the Program Area Descriptions beginning in Part I, C (page 4). **Applications received after the applicable deadlines will not be reviewed.**

#### E. Funding Restrictions

Section 7132 of the Food, Conservation, and Energy Act of 2008 (Pub. L. 110-246) amended section 1462(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3310(a)) on recovery of indirect costs. The recovery of indirect costs on awards made by NIFA under this program may not exceed the lesser of the institution's official negotiated indirect cost rate or the equivalent of 22 percent of total Federal funds awarded.

Funds made available for grants under the AFRI program shall not be used for the construction of a new building or facility or the acquisition, expansion, remodeling, or alteration of an existing building or facility (including site grading and improvement, and architect fees).

## F. Other Submission Requirements

### 1. Proper Application Submission

The applicant must follow the submission requirements noted in the document entitled “A Guide for Preparation and Submission of NIFA Applications via Grants.gov.”

Described below are the requirements for successful submission of an application, all of the following steps must be met for an application to be considered for peer review:

1. Meeting the deadline:  
To electronically send the application to Grants.gov the submit button is hit, which triggers a date and time stamp on the application. The date and time stamp is used to determine whether the application was received by Grants.gov before the deadline, which is 5:00 p.m. Eastern Time on the dated specified in the Program Area Descriptions beginning in Part I, C (page 4). An application submitted or resubmitted after the deadline is late. Consideration of late applications is only given in extenuating circumstances (e.g., natural disasters, confirmed Grants.gov outage) with proper documentation and support of the Agency Contact (see Part VII (page 48)). The occurrence of one of these situations does not automatically ensure that a late application will be accepted. If an applicant wants a late application considered under an extenuating circumstance, the applicant should contact the Agency Contact accordingly.
2. Successful Grants.gov validation:  
The Grants.gov system performs a limited check of the application, and applicants are notified by Grants.gov of the outcome of the initial review. Applications meeting Grants.gov requirements are made available to the funding agency for further processing. Applications that fail Grants.gov validation may be resubmitted to Grants.gov if the original agency deadline has **NOT** passed. (Note that the Grants.gov system may allow applications to be submitted after the deadline has passed, but the application is considered late by NIFA.)
3. Successful Agency validation:  
NIFA staff perform precursory review of the application. The agency validation process includes, for example, meeting eligibility requirements and following agency application guidelines (e.g., formatting, page limitations, limits on budget requests). Applicants are notified by NIFA of the outcome of this review.

### 2. Application Status

After an application is submitted, the AR will receive a series of four e-mails. The titles of the four e-mails are:

- #1 – Grants.gov Submission Receipt Number
- #2 – Grants.gov Submission Validation Receipt for Application Number
- #3 – Grants.gov Grantor Agency Retrieval Receipt for Application Number
- #4 – Receipt of Grant Application Number for Review at USDA

It is extremely important that the AR watch for and save each of the e-mails. The Grants.gov validation (e-mail #2) may take up to two business days from application submission. Please plan accordingly and submit early. Receipt of e-mail #4 by the AR indicates the application reached NIFA, USDA. To track a submission, use the Submission Receipt Number in e-mail #1.

**Receipt of the four e-mails does not indicate the application has been accepted for review.** The AR and/or PD will be notified in a subsequent e-mail if the application has been accepted or declined for program review. If accepted, the application will be assigned a NIFA application number (e.g., 2010-XXXXX). This number should be cited on all future correspondence.

If an applicant has not received an e-mail within 30 days of the submission deadline either providing a NIFA application number or indicating the application was not accepted for review, the applicant must

contact the agency contact (see Part VII (page 48)) immediately and ask for the status of the application. Failure to do so may result in the application not being considered for funding by the peer review panel.

### **3. Multiple Submissions**

Duplicate, essentially duplicate, or predominantly overlapping applications submitted to one or more program areas within the AFRI (including FASE Grants) in any one fiscal year will not be reviewed. In addition, applicants may not submit to AFRI an application that is considered duplicate, essentially duplicate, or predominantly overlapping with an application submitted to another NIFA program in the same fiscal year.

## **PART V – APPLICATION REVIEW REQUIREMENTS**

### **A. General**

Each application will be evaluated in a two-part process. First, each application will be screened to ensure that it meets the administrative requirements as set forth in this RFA. Applications that do not fall within the guidelines, as stated in the RFA, will be eliminated from program competition and will not be reviewed. Second, a review panel will technically evaluate applications that meet these requirements. In addition to the review panel, written comments will be solicited from *ad hoc* reviewers when necessary. Prior to recommending an application for funding, the peer review panel and *ad hoc* reviewer comments will be presented and discussed.

Reviewers will be selected based upon their training and experience in relevant scientific, extension, or education fields, taking into account the following factors: (a) the level of relevant formal scientific, technical education, or extension experience of the individual, as well as the extent to which an individual is engaged in relevant research, education, or extension projects; (b) the need to include experts from various areas of specialization within relevant scientific, education, or extension fields; (c) the need to include other experts (e.g., producers, range or forest managers/operators, and consumers) who can assess relevance of the applications to targeted audiences and to program needs; (d) the need to include experts from a variety of organizational types (e.g., colleges, universities, industry, state and Federal agencies, private profit, and non-profit organizations) and geographic locations; (e) the need to maintain a balanced composition of reviewers with regard to minority and female representation and an equitable distribution of professional rank; and (f) the need to include reviewers who can judge the effective usefulness to producers and the general public of each application.

### **B. Evaluation Criteria**

Projects supported under this program shall be designed, among other things, to accomplish one or more of the purposes of agriculture research, education, and extension, subject to the varying conditions and needs of States. Therefore, in carrying out its review, the peer review panel will take into account the following factors.

#### **1. Research Project Applications**

These evaluation criteria will be used for the review of all single-function Research Project applications.

##### **a. Scientific Merit of the Application for Research**

- 1) Novelty, innovation, uniqueness, and originality;
- 2) Where model systems are used, ability to transfer knowledge gained from these systems to organisms of importance to U.S. agriculture;
- 3) Conceptual adequacy of the research and suitability of the hypothesis, as applicable;
- 4) Clarity and delineation of objectives;
- 5) Adequacy of the description of the undertaking and suitability and feasibility of methodology;
- 6) Demonstration of feasibility through preliminary data; and
- 7) Probability of success of the project is appropriate given the level of scientific originality, and risk-reward balance.

##### **b. Qualifications of Project Personnel, Adequacy of Facilities, and Project Management**

- 1) Qualifications of applicant (individual or team) to conduct the proposed project, including performance record and potential for future accomplishments;
- 2) Demonstrated awareness of previous and alternative approaches to the problem identified in the application;
- 3) Institutional experience and competence in subject area;
- 4) Adequacy of available or obtainable support personnel, facilities, and instrumentation; and
- 5) Planning and administration of the proposed project, including: time allocated for systematic attainment of objectives; and planned administration of the proposed project and its

maintenance, partnerships, collaborative efforts, and the planned dissemination of information for multi-institutional projects over the duration of the project.

**c. Project Relevance**

- 1) Documentation that the research is directed toward specific program area priority(ies) identified for the program in this RFA. These priorities are designed to yield improvements in and sustainability of U.S. agriculture, the environment, human health and well-being, and rural communities.

**2. Education Project Applications**

These evaluation criteria will be used for the review of all single-function Education Project applications.

**a. Merit of the Application for Science Education**

- 1) Exhibit standards of high quality and educational excellence;
- 2) Include goals with measurable objectives and an evaluation component;
- 3) Be replicable, consistent in quality and designed to be sustainable;
- 4) Address science education goals identified by USDA and national science education organizations, such as the National Academy of Sciences and the National Science Foundation; and
- 5) Increase the number of people who choose to enroll in courses and have careers supporting the science-based food and agriculture mission of USDA. Include under-represented groups as appropriate.

**b. Qualifications of Project Personnel, Adequacy of Facilities, and Project Management**

- 1) Roles of key personnel are clearly defined;
- 2) Key personnel have sufficient expertise to complete the proposed project, and where appropriate, partnerships with other disciplines (*e.g.*, social science or economics) and institutions are established;
- 3) Evidence of institutional capacity and competence in the proposed area of work is provided;
- 4) Support personnel, facilities, and instrumentation are sufficient;
- 5) A clear plan is articulated for project management, including time allocated for attainment of objectives and delivery of products, maintenance of partnerships and collaborations, a strategy for recruiting students where appropriate, and a strategy to enhance communication, data sharing, and reporting among members of the project team; and
- 6) The budget clearly allocates sufficient resources to carry out a set of education activities that will lead to desired outcomes.

**c. Project Relevance**

- 1) The project addresses a stated Program Area Priority;
- 2) Project plan fully addresses the problem or issue identified;
- 3) The proposed work addresses identified stakeholder needs;
- 4) Stakeholder involvement in project development, implementation, and evaluation is demonstrated, where appropriate;
- 5) Plan and methods for evaluating success of project activities and documenting potential impact against measurable short and mid-term outcomes are suitable and feasible;
- 6) Science-based knowledge gained, curricula and related products developed will sustain education functions beyond the life of the project; and
- 7) The resulting curricula or products share information and recommendations based on knowledge and conclusions from a broad range of research initiatives.

**3. Extension Project Applications**

These evaluation criteria will be used for the review of all single-function Extension Project applications.

**a. Merit of the Application for Science Extension**

- 1) Project objectives and outcomes are clearly described, adequate, and appropriate;
- 2) Proposed approach, procedures, or methodologies are appropriate, clearly described, suitable, and feasible;
- 3) Proposed extension leads to measurable, documented changes in learning, actions, or conditions in an identified audience or stakeholder group.

- b. Qualifications of Project Personnel, Adequacy of Facilities, and Project Management**
  - 1) Roles of key personnel are clearly defined;
  - 2) Key personnel have sufficient expertise to complete the proposed project, and where appropriate, partnerships with other disciplines (e.g., social science or economics) and institutions are established;
  - 3) Evidence of institutional capacity and competence in the proposed area of work is provided;
  - 4) Support personnel, facilities, and equipment/instrumentation are sufficient;
  - 5) A clear plan is articulated for project management, including time allocated for attainment of objectives and delivery of products, maintenance of partnerships with stakeholders and collaborations, and a strategy to enhance communication, data sharing concerning outcomes including changes in learning, actions or conditions, and reporting among members of the project team.
- c. Project Relevance**
  - 1) The project addresses a stated Program Area Priority;
  - 2) The proposed work addresses identified stakeholder needs;
  - 3) Stakeholder involvement in project development, implementation, and evaluation is demonstrated, where appropriate;
  - 4) Plan and methods for evaluating success of project activities and documenting potential impact against measurable short and mid-term outcomes are suitable and feasible;
  - 5) Curricula and related products such as materials developed for eXtension communities of practice will sustain informal education or extension functions beyond the life of the project; and
  - 6) Extension activities and the resulting curricula or products share information and recommendations based on knowledge and conclusions from a broad range of research initiatives.

#### 4. Integrated Project Applications

These evaluation criteria will be used for the review of all multi-function Integrated Project applications.

- a. Merit of the Application for Science Research, Education, and/or Extension**
  - 1) Project objectives and outcomes are clearly described, adequate, and appropriate. All project components (*i.e.*, research, education, extension) – at least two are required – are reflected in one or more project objectives;
  - 2) Proposed approach, procedures, or methodologies are innovative, original, clearly described, suitable, and feasible;
  - 3) Expected results or outcomes are clearly stated, measurable, and achievable within the allotted time frame;
  - 4) Proposed research fills knowledge gaps that are critical to the development of practices and programs to address the stated problem or issue;
  - 5) Proposed extension leads to measurable, documented changes in learning, actions, or conditions in an identified audience or stakeholder group; and
  - 6) Proposed education (teaching) has an impact upon and advances the quality of food and agricultural sciences by strengthening institutional capacities and curricula to meet clearly delineated needs and train the next generation of scientists and educators.
- b. Qualifications of Project Personnel, Adequacy of Facilities, and Project Management**
  - 1) Roles of key personnel are clearly defined;
  - 2) Key personnel have sufficient expertise to complete the proposed project, and where appropriate, partnerships with other disciplines (e.g., social science or economics) and institutions are established;
  - 3) Evidence of institutional capacity and competence in the proposed area of work is provided;
  - 4) Support personnel, facilities, and instrumentation are sufficient;
  - 5) A clear plan is articulated for project management, including time allocated for attainment of objectives and delivery of products, maintenance of partnerships and collaborations, and a strategy to enhance communication, data sharing, and reporting among members of the project team; and

- 6) The budget clearly allocates sufficient resources to carry out a set of research, education (teaching), and/or extension activities that will lead to desired outcomes, with no more than two-thirds of the budget focused on a single project component.

**c. Project Relevance**

- 1) The project addresses a stated Program Area Priority;
- 2) Project components (research, education, and/or extension) – at least two are required – are fully integrated and necessary to address the problem or issue;
- 3) The proposed work addresses identified stakeholder needs;
- 4) Stakeholder involvement in project development, implementation, and evaluation is demonstrated, where appropriate;
- 5) Plan and methods for evaluating success of project activities and documenting potential impact against measurable short and mid-term outcomes are suitable and feasible;
- 6) For extension or education (teaching) activities, curricula and related products will sustain education or extension functions beyond the life of the project; and
- 7) For extension or education (teaching) activities, the resulting curricula or products share information and recommendations based on knowledge and conclusions from a broad range of research initiatives.

**5. Planning/Coordination Grant Applications**

- a. Articulates benefits accrued from formal planning activities;
- b. Provides evidence of a high likelihood that quality future applications will be submitted;
- c. Appropriate participation by stakeholders, including a listing of key participants who will be invited and their affiliations;
- d. Clearly stated objectives and suitability of the preliminary agenda to address those objectives;
- e. Involvement of individuals with appropriate, relevant expertise in planning committees, speakers, and attendees; and
- f. Uniqueness, timeliness of the event(s), and appropriateness of budget requests.

**6. Conference Grant Applications**

- a. Relevance of the proposed conference to agriculture and food systems in the U.S. and appropriateness of the conference in fostering scientific exchange;
- b. Qualifications of the organizing committee and appropriateness of invited speakers to topic areas being covered; and
- c. Uniqueness, timeliness of the conference, and appropriateness of budget requests.

**7. New Investigator, Strengthening Standard, and Strengthening CAP Grant Applications**

Refer to the review criteria listed above for the applicable Project Type (Research, Education, Extension or Integrated) to which you are applying.

**8. Sabbatical Grant, Equipment Grant, and Seed Grant Applications**

- a. The merit of the proposed activities or equipment as a means of enhancing the capabilities and competitiveness of the applicant and/or institution;
- b. The applicant's previous experience and background along with the appropriateness of the proposed activities or equipment for the goals proposed; and
- c. Relevance of the project to long-range improvements in and sustainability of U.S. agriculture, the environment, human health and well-being, and rural communities.

**C. Conflicts of Interest and Confidentiality**

During the peer evaluation process, extreme care will be taken to prevent any actual or perceived conflicts of interest that may impact review or evaluation. For the purpose of determining conflicts of interest, the academic and administrative autonomy of an institution shall be determined by reference to

the current Higher Education Directory, published by Higher Education Publications, Inc., 6400 Arlington Boulevard, Suite 648, Falls Church, VA 22042. Phone: (703) 532-2300. Web site: [www.hepinc.com](http://www.hepinc.com).

Names of submitting institutions and individuals, as well as application content and peer evaluations, will be kept confidential, except to those involved in the review process, to the extent permitted by law. In addition, the identities of peer reviewers will remain confidential throughout the entire review process. Therefore, the names of the reviewers will not be released to applicants.

#### **D. Organizational Management Information**

Specific management information relating to an applicant shall be submitted on a one-time basis as part of the responsibility determination prior to the award of a grant identified under this RFA, if such information has not been provided previously under this or another NIFA program. NIFA will provide copies of forms recommended for use in fulfilling these requirements as part of the pre-award process. Although an applicant may be eligible based on its status as one of these entities, there are factors that may exclude an applicant from receiving Federal financial and nonfinancial assistance and benefits under this program (*e.g.*, debarment or suspension of an individual involved or a determination that an applicant is not responsible based on submitted organizational management information).

## **PART VI – AWARD ADMINISTRATION**

### **A. General**

Within the limit of funds available for such purpose, the awarding official of NIFA shall make grants to those responsible, eligible applicants whose applications are judged most meritorious under the procedures set forth in this RFA. Note that the project need not be initiated on the grant effective date, but as soon thereafter as practical so that project goals may be attained within the funded project period. All funds granted by NIFA under this RFA shall be expended solely for the purpose for which the funds are granted in accordance with the approved application and budget, the regulations, the terms and conditions of the award, the applicable Federal cost principles, and the applicable Department's assistance regulations.

### **B. Award Notice**

The award document will provide pertinent instructions and information shall include at a minimum the following:

1. Legal name and address of performing organization or institution to which the Director has issued an award under the terms of this RFA;
2. Title of project;
3. Name(s) and institution(s) of PDs chosen to direct and control approved projects;
4. Identifying award number assigned by the Department;
5. Award type, specifying whether the grant is a standard or continuation award;
6. Project period, specifying the amount of time the Department intends to support the project without requiring re-competition for funds, and that no-cost extensions of time beyond the five year performance period will be granted only in extenuating circumstances, require prior approval and will be contingent on a satisfactory merit review conducted by NIFA;
7. Total amount of Departmental financial assistance approved by the Director during the project period;
8. Legal authority(ies) under which the award is issued;
9. Appropriate Catalog of Federal Domestic Assistance (CFDA) number;
10. Applicable award terms and conditions (see <http://www.nifa.usda.gov/business/awards/awardterms.html> to view NIFA award terms and conditions);
11. Approved budget plan for categorizing allocable project funds to accomplish the stated purpose of the award; and
12. Other information or provisions deemed necessary by NIFA to carry out its respective awarding activities or to accomplish the purpose of a particular award.

### **C. Administrative and National Policy Requirements**

Several Federal statutes and regulations apply to grant applications considered for review and to project grants awarded under this program. These include, but are not limited to:

2 CFR Part 215 – Uniform Administrative Requirements for Grants and Agreements With Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations (OMB Circular A-110).

2 CFR Part 220 – Cost Principles for Educational Institutions (OMB Circular A-21).

2 CFR Part 230 – Cost Principles for Non-Profit Organizations (OMB Circular A-122).

7 CFR Part 1, subpart A – USDA implementation of the Freedom of Information Act.

7 CFR Part 3 – USDA implementation of OMB Circular No. A-129 regarding debt collection.

7 CFR Part 15, subpart A – USDA implementation of Title VI of the Civil Rights Act of 1964, as amended.

7 CFR Part 331 and 9 CFR Part 121 – USDA implementation of the Agricultural Bioterrorism Protection Act of 2002.

7 CFR Part 3015 – USDA Uniform Federal Assistance Regulations, implementing OMB directives (*i.e.*, OMB Circular Nos. A-21 and A-122, now codified at 2 CFR Parts 220 and 230) and incorporating provisions of 31 U.S.C. 6301-6308 (formerly the Federal Grant and Cooperative Agreement Act of 1977, Pub. L. No. 95-224), as well as general policy requirements applicable to recipients of Departmental financial assistance.

7 CFR Part 3017 – USDA implementation of Governmentwide Debarment and Suspension (Nonprocurement) and 7 CFR Part 3021—Governmentwide Requirements for Drug Free Workplace (Grants).

7 CFR Part 3018 – USDA implementation of Restrictions on Lobbying. Imposes prohibitions and requirements for disclosure and certification related to lobbying on recipients of Federal contracts, grants, cooperative agreements, and loans.

7 CFR Part 3019 – USDA implementation of OMB Circular A-110, Uniform Administrative Requirements for Grants and Other Agreements With Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations.

7 CFR Part 3021 – Governmentwide Requirements for Drug Free Workplace (Grants)

7 CFR Part 3052 – USDA implementation of OMB Circular No. A-133, Audits of States, Local Governments, and Non profit Organizations.

7 CFR Part 3407 – NIFA procedures to implement the National Environmental Policy Act of 1969, as amended.

7 CFR Part 3430 – NIFA Competitive and Noncompetitive Nonformula Grant Programs—General Grant Administrative Provisions.

29 U.S.C. 794 (section 504, Rehabilitation Act of 1973) and 7 CFR Part 15b (USDA implementation of statute) – prohibiting discrimination based upon physical or mental handicap in Federally assisted programs.

35 U.S.C. 200 et seq. – Bayh Dole Act, controlling allocation of rights to inventions made by employees of small business firms and domestic nonprofit organizations, including universities, in Federally assisted programs (implementing regulations are contained in 37 CFR Part 401).

#### **D. Expected Program Outputs and Reporting Requirements**

Grantees are required to submit initial project information, annual reports, and comprehensive final reports via the NIFA Current Research Information System (CRIS) at <http://cwf.uvm.edu/cris/>. The CRIS database contains narrative project information, progress/impact statements, and final technical reports that are made available to the public. For applications recommended for funding, instructions on preparing and submission of project documentation will be provided to the applicant by the agency contact. Documentation must be submitted to CRIS before NIFA funds will be released. Project reports will be requested by the CRIS office when required. For more information on CRIS, visit <http://cris.nifa.usda.gov>.

NIFA plans to begin the transition from CRIS to REEport, a new reporting system, on October 1, 2010. Additional information about this process and any applicable information collections will be made available at [http://www.nifa.usda.gov/business/reepport\\_imp.html](http://www.nifa.usda.gov/business/reepport_imp.html)

If a project is funded, beginning in the first year of funding, the project director will be required to attend annual investigator meetings (excluding Planning/Coordination, Conference, Sabbatical, and Equipment Grant applications). Seed Grant applications are required to attend beginning in the second year of funding. Reasonable travel expenses should be included as part of the project budget.

For informational purposes, the “Federal Financial Report,” Form SF-425, consolidates into a single report the former Financial Status Report (SF-269 and SF-269A) and the Federal Cash Transactions Report (SF-272 and SF-272A). The [NIFA Agency-specific Terms and Conditions](#) include the requirement that Form SF-425 is due on a quarterly basis no later than 30 days following the end of each reporting period. A final “Federal Financial Report,” Form SF-425, is due 90 days after the expiration date of this award.

## PART VII – AGENCY CONTACTS

For general questions related to the AFRI Programs, applicants and other interested parties are encouraged to contact AFRI:

AFRI Program Office:  
 Dr. Deborah Sheely, Deputy Administrator  
 Dr. Mark Poth, Research Director  
 Dr. Diana Jerkins, Acting Integrated Programs Director  
 Telephone: (202) 401-5022  
 Fax: (202) 401-6488  
 E-mail: [AFRI@nifa.usda.gov](mailto:AFRI@nifa.usda.gov)

Specific questions pertaining to technical matters may be directed to the appropriate Program Area Contacts:

<b>Program Area</b>	<b>Program Area Contact:</b>
Improving Sustainability by Improving Feed Efficiency of Animals	Mark Mirando – (202) 401-4336 ; <a href="mailto:mmirando@nifa.usda.gov">mmirando@nifa.usda.gov</a>
Minimizing Losses from Dairy Diseases with Major Impact on Production, Marketing, and/or Trade	Margo Holland – (202) 401-5044; <a href="mailto:mholland@nifa.usda.gov">mholland@nifa.usda.gov</a> Peter Johnson – (202) 401-1896; <a href="mailto:pjohnson@nifa.usda.gov">pjohnson@nifa.usda.gov</a>
Oomycete Pathosystems in Crop Plants to Minimize Disease	Ann Lichens-Park – (202) 401-6460; <a href="mailto:apark@nifa.usda.gov">apark@nifa.usda.gov</a>
Program Delivery and Implementation of Wide-area Pest Monitoring	Martin Draper – (202) 401-1990; <a href="mailto:mdraper@nifa.usda.gov">mdraper@nifa.usda.gov</a> Mary Purcell-Miramontes – (202) 401-5168; <a href="mailto:mpurcell@nifa.usda.gov">mpurcell@nifa.usda.gov</a>
Improved Sustainable Food Systems to Reduce Hunger and Food Insecurity Domestically and Globally	Elizabeth Tuckermanty – (202) 205-0241; <a href="mailto:etuckermanty@nifa.usda.gov">etuckermanty@nifa.usda.gov</a> Hiram Larew - (202) 720-3801; <a href="mailto:hlarew@nifa.usda.gov">hlarew@nifa.usda.gov</a>

## **PART VIII – OTHER INFORMATION**

### **A. Access to Review Information**

Copies of reviews, excluding the identity of reviewers, and a summary of the panel comments will be sent to the applicant after the review process has been completed.

### **B. Use of Funds; Changes**

#### **1. Delegation of Fiscal Responsibility**

Unless the terms and conditions of the grant state otherwise, the grantee may not, in whole or in part, delegate or transfer to another person, institution, or organization the responsibility for use or expenditure of grant funds.

#### **2. Changes in Project Plans**

(a) The permissible changes by the grantee, PD(s), or other key project personnel in the approved project grant shall be limited to changes in methodology, techniques, or other similar aspects of the project to expedite achievement of the project's approved goals. If the grantee or the PD(s) is uncertain as to whether a change complies with this provision, the question must be referred to the Authorized Departmental Officer (ADO) for a final determination. The ADO is the signatory of the award document, not the program contact.

(b) Changes in approved goals or objectives shall be requested by the grantee and approved in writing by the ADO prior to effecting such changes. In no event shall requests for such changes be approved which are outside the scope of the original approved project.

(c) Changes in approved project leadership or the replacement or reassignment of other key project personnel shall be requested by the grantee and approved in writing by the ADO prior to effecting such changes.

(d) Transfers of actual performance of the substantive programmatic work in whole or in part and provisions for payment of funds, whether or not Federal funds are involved, shall be requested by the grantee and approved in writing by the ADO prior to effecting such transfers, unless prescribed otherwise in the terms and conditions of the grant.

(e) Awards will normally not be considered for additional funding beyond that approved in an original award. No-cost extensions beyond five years will be granted only under extenuating circumstances, will require prior approval of the Authorized Departmental Officer (ADO), and will be contingent on a satisfactory merit review conducted by NIFA... Standard and Coordinated Agricultural Project (CAP) Grants (including New Investigator and Strengthening eligible grants) may be allowed for a competitive renewal. Renewal applications require full competition with other applications and will be considered provided that 1) performance has been satisfactory, 2) appropriations are available for this purpose, and 3) continued support would be in the best interest of the Federal government and the public.

(f) Changes in an approved budget must be requested by the grantee and approved in writing by the ADO prior to instituting such changes if the revision will involve transfers or expenditures of amounts requiring prior approval as set forth in the applicable Federal cost principles, Departmental regulations, or grant award.

### **C. Confidential Aspects of Applications and Awards**

When an application results in a grant, it becomes a part of the record of NIFA transactions, available to the public upon specific request. Information that the Secretary determines to be of a confidential, privileged, or proprietary nature will be held in confidence to the extent permitted by law. Therefore, any information that the applicant wishes to have considered as confidential, privileged, or proprietary should be clearly marked within the application. Such an application will be released only with the consent of the applicant or to the extent required by law. The original electronic application that does not result in a grant will be retained by the Agency for a period of three years. An application may be withdrawn at any time prior to the final action thereon.

### **D. Regulatory Information**

For the reasons set forth in the final Rule-related Notice to 7 CFR part 3015, subpart V (48 FR 29114, June 24, 1983), this program is excluded from the scope of the Executive Order 12372 which requires intergovernmental consultation with State and local officials. Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the collections of information requirements contained in this Notice have been approved under OMB Document No. 0524-0039.

### **E. Application Disposition**

When each peer review panel has completed its deliberations, the responsible program staff of AFRI will recommend that the project: (a) be approved for support from currently available funds or (b) be declined due to insufficient funds or unfavorable review.

AFRI reserves the right to negotiate with the PD and/or with the submitting organization or institution regarding project revisions (*e.g.*, reductions in the scope of work, funding level, period, or method of support) prior to recommending any project for funding.

An application may be withdrawn at any time before a final funding decision is made regarding the application; however, withdrawn applications normally will not be returned. One copy of each application that is not selected for funding, including those that are withdrawn, will be retained by AFRI for a period of three years.

### **F. Materials Available on the Internet**

AFRI program information will be made available on the NIFA Web site: <http://www.nifa.usda.gov/funding/afri/afri.html>. The following are among the materials available on the AFRI More Information Page:

1. AFRI 2010 Requests for Applications
2. AFRI Abstracts of Funded Projects
3. AFRI Annual Reports

### **G. Electronic Subscription to AFRI Announcements**

If you would like to receive notifications of all new announcements pertaining to AFRI RFA, you can register via Grants.gov at <http://www.grants.gov/search/subscribeAdvanced.do>.

- Enter the e-mail address at which you would like to receive the announcements
- Enter "10.310" for *CFDA Number*
- Select "Subscribe to Mailing List"

Other criteria may be selected; however, your e-mail address and the CFDA number are the only data required to receive AFRI announcements. You do not need to be a registered user of Grants.gov to use this service. You may modify your subscriptions or unsubscribe at any time.

## H. Definitions

Please refer to [7 CFR 3430, Competitive and Noncompetitive Non-formula Grant Programs--General Grant Administrative Provisions](#) for the applicable definitions for this NIFA Grant Program

For the purpose of this program, the following additional definitions are applicable:

Director means the Director of the National Institute of Food and Agriculture (NIFA) and any other officer or employee of NIFA to whom the authority involved is delegated.

Food and Agricultural Science Enhancement (FASE) Grants means funding awarded to eligible applicants to strengthen science capabilities of Project Directors, to help institutions develop competitive scientific programs, and to attract new scientists into careers in high-priority areas of National need in agriculture, food, and environmental sciences. FASE awards may apply to any of the three agricultural knowledge components (i.e., research, education, and extension). FASE awards include Pre- and Postdoctoral Fellowships, New Investigator grants, and Strengthening grants.

Integrated project means a project incorporating two or three functions of the agricultural knowledge system (research, education, and extension) around a problem or activity.

Limited institutional success means institutions that are not among the most successful universities and colleges for receiving Federal funds for science and engineering research. A list of successful institutions will be provided in the RFA.

Minority-serving institution means an accredited academic institution whose enrollment of a single minority or a combination of minorities exceeds fifty percent of the total enrollment, including graduate and undergraduate and full- and part-time students. An institution in this instance is an organization that is independently accredited as determined by reference to the current version of the Higher Education Directory, published by Higher Education Publications, Inc., 6400 Arlington Boulevard, Suite 648, Falls Church, Virginia 22042.

Minority means Alaskan Native, American Indian, Asian-American, African-American, Hispanic American, Native Hawaiian, or Pacific Islander. The Secretary will determine on a case-by-case basis whether additional groups qualify under this definition, either at the Secretary's initiative, or in response to a written request with supporting explanation.

Multidisciplinary project means a project on which investigators from two or more disciplines collaborate to address a common problem. These collaborations, where appropriate, may integrate the biological, physical, chemical, or social sciences.

Small and mid-sized institutions are academic institutions with a current total enrollment of 17,500 or less including graduate and undergraduate and full- and part-time students. An institution, in this instance, is an organization that possesses a significant degree of autonomy. Significant degree of autonomy is defined by being independently accredited as determined by reference to the current version of the *Higher Education Directory*, published by Higher Education Publications, Inc., 6400 Arlington Boulevard, Suite 648, Falls Church, Virginia 22042 (703-532-2300).

Strengthening Grants means funds awarded to institutions eligible for FASE Grants to enhance institutional capacity, with the goal of leading to future funding in the project area, as well as strengthening the competitiveness of the investigator's research, education, and/or extension activities.

Strengthening grants consist of Standard and Coordinated Agricultural Project Grant types as well as Seed Grants, Equipment Grants, and Sabbatical Grants.

USDA EPSCoR States (Experimental Program for Stimulating Competitive Research) means States which have been less successful in receiving funding from AFRI, or its predecessor, the National Research Initiative (NRI), having a funding level no higher than the 38<sup>th</sup> percentile of all States based on a 3-year average of AFRI and/or NRI funding levels, excluding FASE Strengthening funds granted to state agricultural experiment stations and degree-granting institutions in EPSCoR States and small, mid-sized, and minority-serving degree-granting institutions. The most recent list of USDA EPSCoR States is provided in this RFA.

**TABLE 1. Most Successful Universities and Colleges Receiving Federal Funds\*.**  
Use to Determine Eligibility for Strengthening Grants

Arizona State University (all campuses)	Purdue University (all campuses)	University of Massachusetts, Worcester
Baylor College of Medicine	Rockefeller University	University of Miami
Boston University	Rutgers, The State University of New Jersey (all campuses)	University of Michigan (all campuses)
Brown University	Stanford University	University of Minnesota (all campuses)
California Institute of Technology	State University of New York, Stony Brook (all campuses)	University of Missouri, Columbia
Carnegie Mellon University	Johns Hopkins University	University of New Mexico (all campuses)
Case Western Reserve University	Scripps Research Institute, The	University of North Carolina, Chapel Hill
Colorado State University	Tufts University	University of Oklahoma (all campuses)
Columbia University	University of Alabama, Birmingham	University of Pennsylvania
Cornell University (all campuses)	University of Arizona	University of Pittsburgh (all campuses)
Dartmouth College	University of California, Berkeley	University of Rochester
Duke University	University of California, Davis	University of South Florida
Emory University	University of California, Irvine	University of Southern California
Florida State University	University of California, Los Angeles	University of Texas Health Science Center, Houston
George Washington University	University of California, San Diego	University of Texas Health Science Center, San Antonio
Georgetown University	University of California, San Francisco	University of Texas M.D. Anderson Cancer Center
Georgia Institute of Technology (all campuses)	University of California, Santa Barbara	University of Texas Medical Branch
Harvard University	University of Chicago	University of Texas Southwestern Medical Center, Dallas
Indiana University (all campuses)	University of Cincinnati (all campuses)	University of Texas, Austin
Iowa State University	University of Colorado (all campuses)	University of Utah
Louisiana State University (all campuses)	University of Connecticut (all campuses)	University of Vermont
Massachusetts Institute of Technology	University of Florida	University of Virginia (all campuses)
Medical College of Wisconsin	University of Georgia	University of Washington
Medical University of South Carolina	University of Hawaii, Manoa	University of Wisconsin, Madison
Michigan State University	University of Hawaii, System Office	Utah State University
Mount Sinai School of Medicine	University of Illinois, Chicago	Vanderbilt University
New York University	University of Illinois, Urbana-Champaign	Virginia Commonwealth University
North Carolina State University	University of Iowa	Virginia Polytechnic Institute and State University
Northwestern University	University of Kansas (all campuses)	Wake Forest University
Ohio State University (all campuses)	University of Kentucky (all campuses)	Washington University, St. Louis
Oregon Health & Science University	University of Maryland, Baltimore	Wayne State University
Oregon State University	University of Maryland, College Park	Yale University
Pennsylvania State University (all campuses)	University of Massachusetts, Amherst	Yeshiva University
Princeton University		

\*Data obtained from the table of Federal obligations for science and engineering research and development to the 100 universities and colleges receiving the largest amounts, ranked by total amount received in FY 2007 of Federal Science and Engineering Support to Universities, Colleges, and Nonprofit Institutions (National Science Foundation). Campuses that are part of a larger university system as listed in Table 1 may petition for an exemption to this rule (see Part III, B (page 23) for information).

**TABLE 2. Lowest One Third of Universities and Colleges Receiving Federal Funds\*.**  
 Use to Determine Eligibility for Possible Waiver of Matching Funds Requirement for Equipment Grants

A.T. Still University of Health Sciences	Georgetown College	Radford University
Adams State College	Gettysburg College	Randolph-Macon College
Agnes Scott College	Gonzaga University	Regis College
Albany College of Pharmacy	Goucher College	Regis University
Albion College	Graceland University	Rhodes College
