

Seed Grant Program Purpose

The program's objectives are to promote research, outreach, and creative activities in all branches of learning that will improve competitiveness for external funding, and/or which will result in publications, patents, or exhibitions/performances appropriate to the PI's discipline. The primary purpose of the program is to support early career faculty establishing scholarly program; early career faculty are those who have been at the UI 5 years or less and/or are still Assistant Professors. Proposals that support a change in direction for established investigators will also be considered, but must be well-justified.

Eligibility and Restrictions

- All faculty members with 25% or greater of their time allocated to Scholarship and Creative Activities on their position descriptions are eligible to apply. This includes Extension faculty, faculty whose terminal degree is not a PhD (e.g., Law), Research, Library, and Clinical faculty. A faculty member may participate in or submit only one seed grant proposal per year.
- Those who have current Seed Grants or have received seed grants in the past three years are not eligible to apply.
- Faculty who have current grant funding over \$25,000 from any source are not eligible to apply unless the Seed Grant project will be distinct from the currently funded work. The PI must provide a list of currently funded projects and must clearly and explicitly justify that the proposed project is distinct from currently funded work. Proposals that do not specifically address this distinction will be returned without review.
- Seed Grants are made for a period of one year, generally from July 1 to August 31 to coincide with the fiscal year. However, in some cases the Vice President may consider an exception to the standard timeline if the request is well justified. The Principal Investigator should state the anticipated start date and expected date of completion. An award letter will be sent to the PI with their actual award dates.

Proposal Submission

Proposals are due to the Office of Research and Economic Development by 5:00 p.m. Monday, February 3, 2014. Proposals must be submitted through the UI's Electronic Internal Proposal Routing System (EIPRS) at <http://www.uidaho.edu/osp>. EIPRS allows your proposal file to be uploaded as a PDF, and enables electronic routing and signatures. Please note that, since this is an internal grant program, the proposal will not need to be reviewed by your Sponsored Program Administrator in the Office of Sponsored Programs. Sarah Koerber (skoerber@uidaho.edu), Proposal Development Specialist, Office of Research and Economic Development, is the contact for all questions about proposal development and submission.

Guidelines

Use single spacing, one-inch margins, and a font size of 12 pt. Do not include extra materials. Proposals that do not follow these guidelines will be returned without review.

- 1) **Cover Sheet (1 Page):** Complete the cover sheet included in this application packet.

FY2015 Seed Grant Request for Proposals

In EIPRS, please begin the title with "Seed Grant:". This will assist with tracking the proposal through EIPRS. For Sponsor, please select "UI Office of Research and Economic Development." Signatures of PI(s), departmental administrator(s), and college dean(s) will be processed electronically via EIPRS. *All signatures must be obtained through EIPRS by the 5:00pm deadline in order for the proposal to be considered complete and on time.* Please note that your College may have an internal deadline for proposal submission and routing, to ensure that there is adequate time for Departmental and College level review and approval.

2) Abstract (1 Page): Provide a brief (limited to 200 words), *non-technical* description of the problem, work to be performed, and expected outcome.

3) Narrative (2 Pages): PIs are encouraged to follow the structure below.

- Describe the proposed scholarly or creative activity, including brief context or background.
- Explain how the project will contribute to the PI's field and professional development. For established investigators, the proposal must clearly explain how the project is a change in direction.
- Present specific objectives and methods and how they will be completed during the one-year funding period.
- Describe the expected outcomes and the deliverables that will result from the scholarly activity, e.g., publication, exhibition/performance, patent, proposal to an external funding agency.
- If the PI has other grants > \$25,000, include a list of currently funded projects in the Biographical Information and describe the special circumstances that may justify a Seed Grant award.

4) Bibliography/References Cited. This will not be counted towards the 2 page limit.

5) Budget Form: The budget must be reasonable and well justified. The resources needed to complete the project should be described. This may include resources already available (e.g., laboratory equipment, computational resources, performance space, etc) and resources to be funded by the Seed Grant. Faculty who have been at the University less than 5 years must describe how their start-up funds contributed (or will contribute) to the proposed project. If the PI did not receive start-up funds, they should state that.

Allowable expenses include, for example, expendable supplies, capital outlay (e.g., software, computer, equipment, etc.), and travel to conduct research. Funds may be used for partial support of undergraduate or graduate students. Up to one month of PI summer salary is allowed. Travel to professional meetings is limited to \$500 and must be justified as related to the project's outcomes. The maximum award is \$12,000. Budgets that exceed the maximum amount will be returned without review. Because these are internal funds, no Facilities and Administration fees will be assessed on these awards.

6) Biographical Information: (up to 3 Pages): Please include:

FY2015 Seed Grant Request for Proposals

- Field and date of investigator's highest degree.
- Date of initial appointment as a faculty member at UI.
- Present academic rank.
- Publications, exhibitions/performances, and patents during past five years.
- Proposals submitted and funding received during the past five years.

Award Conditions

The Office of Research and Economic Development will convene a Seed Grant Orientation Meeting before the award period begins for funded PIs to discuss award conditions, including budget management and project reporting.

Ownership of any and all **intellectual property** created through the use of these funds shall be determined as defined in *UI Faculty Staff Handbook 5300*.

If the proposed project will involve regulated activities (e.g., **Human Subjects, Animals, biohazards**), the PI will need to obtain the appropriate assurances before a grant is awarded. The PI must specifically address their plans to obtain the appropriate assurances. All IRB or IACUC approvals must be received before the funds can be awarded to those engaged in regulated activities.

Seed Grant awardees are selected through a highly competitive, peer-review process. Their projects represent some of the most interesting and potentially high impact research and scholarly activity taking place at the UI. To raise the visibility of these projects, the Office of Research and Economic Development will coordinate a University-wide Seed Grant Symposium during the Fall 2015 semester. PIs will be asked to present their work at the Symposium. The Office of Research and Economic Development will make arrangements for the symposium and will contact Seed Grant PIs to work out the details regarding dates and times.

A final project report will be required; the due date and format of the report will be posted at a later date and/or provided to PIs at the time award decisions are made.

Evaluation

Each proposal will be evaluated by reviewers selected from various colleges within the UI. Because the review panel is diverse, **proposers are strongly encouraged to write for a non-expert audience**. Proposers should read the Seed Grant Evaluation Sheet (below) to make sure that their proposal addresses all of the criteria.

Reviewers will assign proposals a rank of Excellent, Very Good, Good, Fair, or Poor. The reviewers will evaluate each proposal on the following:

- The degree to which the proposed work will initiate or contribute to a scholarly project that will support the PI's career development.
- Overall quality and clarity of the proposal
- Degree to which the budget is reasonable and well-justified

The reviewers will convene to discuss proposals and make funding recommendations. The Research Council makes final funding decisions and may require modifications in the budget as a condition of funding. Award notifications are expected to be made in early to mid-April 2014. Project start dates may be no earlier than July 1, 2014 (FY2015 funds).

FY2015 Seed Grant Application Budget Form

<p>Salaries (PI salary is limited to one summer month—academic year support for PIs is not allowed; partial support for undergraduate and/or graduate students is allowed) (Describe)</p>	<p>\$</p>
<p>Fringe Benefits (if applicable) (Describe)</p>	<p>\$</p>
<p>Travel* (travel to field sites or other locations to perform research is permitted; travel to professional conferences is limited to \$500) (Describe)</p>	<p>\$</p>
<p>Other Expenses (e.g., field or lab supplies, software, etc) (Describe)</p>	<p>\$</p>
<p>Capital Outlay (e.g., field equipment, computers, etc) (Describe)</p>	<p>\$</p>
<p>Trustee Benefits (Describe)</p>	<p>\$</p>
<p>Total Requested</p>	<p>\$</p>

Note: Seed Grants are internally funded. No Facilities and Administrative (F&A) expense are calculated on the budget.

FY2015 Seed Grant Evaluation Form

Proposal Number: _____ PI: _____

Proposal Title: _____

Please give the proposal an overall rating:

- **Excellent:** outstanding proposal; high priority for support
- **Very good:** high quality proposal in nearly all respects; support if possible
- **Good:** good quality proposal; has strong points but some minor weaknesses
- **Fair:** proposal is lacking in one or more critical aspects; key issues need to be addressed
- **Poor:** proposal has significant deficiencies

Evaluation Summary: Please briefly summarize your impression of the proposal, including perceived strengths and weaknesses, and rationale for overall rating.

Review Criteria: Reviewers should consider the degree to which proposed projects fit with the Purpose of the Seed Grant Program.

1. Explanation and justification of how the proposed work will initiate or contribute to a new or early scholarly project that will support the PI's career development. When evaluating the proposal, consider the degree to which:

- The project goal(s) and outcome(s) are clearly expressed and contribute to the PI's area of scholarship.
- The described methods/objectives are adequate to achieve the project goal within the one year period of the Seed Grant.
- The scholarly activity will result in clearly identified deliverables, for example, publication, exhibition/performance, patent, and/or proposal to an external funding agency.

2. Overall Quality and Clarity of the Proposal The proposal is clearly written and is understandable to the non-expert reader.

3. Budget The budget must be reasonable and well justified. The resources needed to complete the project should be described. This may include resources already available (e.g., laboratory equipment, computational resources, software, etc) and resources to be funded by the Seed Grant. Early career faculty (<5 years) should describe how their start-up funds contributed (or will contribute) to the proposed project. If they did not receive start-up funds, that should be noted as well.

Allowable expenses include, for example, expendable supplies, capital outlay (e.g., software, computer, equipment, etc), travel to conduct research. Up to one month of summer salary may be requested for the PI. Funds may be used for partial undergraduate or graduate student support, but are not sufficient to be used as a research assistantship. Travel to professional meetings is limited to \$500 and must be clearly justified. The maximum award is \$12,000. Budgets that exceed the maximum amount will be returned without review.
