A Word From Our Pro

I would like to thank our grounds crew for their hard work and dedication getting the greens aerated this year. It was the maiden voyage for our new aerator and after a couple tweaks and a newly rebuilt hydraulic pump for the John Deere tractor we were on a roll. Our goal is to break up a crystallized layer of soil about six inches deep that the old aerator couldn’t reach. We will now get much better drainage and the turf root system will be able to grow much deeper creating happier and healthier plants. We expect over time, that the greens will require less water which will allow for firmer greens that can still hold a golf shot. Our hope is to extend this practice to our tee box system which means you will no longer need a hammer to insert your tee when things heat up.

Passholders don’t be shy! Take Loren up on his golf lesson offer. If nothing else have Loren take you into our indoor hitting room and see your swing on video. Or for all of you inquisitive players, you may want him to analysis your swing using our new Trackman ball flight launch monitor. Very exciting stuff.

“Golf puts a man’s character on the anvil and his richest qualities – patience, poise, and restraint- to the flame” Billy Casper

From the Grounds Crew
On May 23 and 24 we successfully punched the greens with our new deep tine aerator. The process went well saving nearly half the time versus core punching. We’re looking forward to seeing how the greens respond to this style of aeration.

Also, irrigation season began the night of May 26. Please report any leaks, stuck heads, etc. to the clubhouse, and remember the system starts automatically near sunset. Our irrigation utilizes reclaim water from the city and is there for unsafe to consume.

Finally, and we do mean finally, we have our summer crew in place and will begin removing the trees that had fallen this winter and spring. Thank you for your continued patience.

Looking forward to an enjoyable summer,

Grounds Crew
