Institutional Research and Assessment

Institutional Research and Assessment is the source for comprehensive information, analyses and university statistics, based on our access to university databases. Institutional Research and Assessment serves University decision-makers, governmental agencies and other internal and external constituencies. We provide programs and services in five areas:

- Federal and State Reporting
- Decision Support
- Assessment of the Teaching and Learning Environment
- Accreditation and Evaluation
- Student Evaluation of Teaching
Surveys

The goal of assessment is to improve academic programs and services. One method we use to do this is to provide questionnaires to students during their time with the University of Idaho and after they have graduated. Survey data are information that can be used for the assessment of student learning outcomes.

Some of the surveys we administer in the Office of Institutional Research and Assessment are listed below. All of our surveys are confidential, and data are used only in the aggregate.

- Freshman Survey
- National Survey of Student Engagement
- Graduating Senior Survey
- Alumni Survey
- Graduate Alumni Survey
- Staff Survey
- Faculty Survey
