### Step Three: Connecting Audio

- **Option 1, Join Computer Audio** Once you join the meeting, a window will appear asking you to "Join Audio by Computer." Click the green "Join Audio by Computer" button.

- **Option 2, Dial into Phone Audio** You might use phone audio instead of computer audio if your computer does not have speakers or if you are not watching on your computer. Press the "Phone Call" option on the upper left tab to dial into audio via your phone. Dial the meeting's telephone number and follow the prompts to enter the meeting ID. Once prompted, enter the two digit participant ID shown on the screen. (In the example below, the participant ID is 18.) This is critical to sync your audio to your visual. Have you already joined the meeting by phone but didn't enter your participant ID? Click "Phone call" from the audio options tab, and follow the green directions at the top of the box to sync your audio to your visual (by pressing #Participant ID Number#).
