7:00 pm—8:15 pm
Sign-in at 6:30 pm
How to Control Ventenata and Other Annual Grasses

Program Description

Ventenata and other annual grasses can spread readily in hay fields, pastures, and rangelands. These grasses reduce forage quality for livestock and compete with beneficial vegetation. Additionally, annual grasses can pose challenges for control as many herbicides that affect annual grasses can be detrimental to the perennial forage grasses they are growing with.

This program will cover the identification of annual grasses and effective approaches for controlling them, including herbicide treatments.

Program Agenda

6:30 pm Sign-in
7:00 pm Welcome & Introduction, Bill Warren, UI Extension
7:10 pm How to Control Ventenata and Other Annual Grasses, Tim Prather, UI Extension
8:10 pm Evaluation
8:15 pm Close

Registration

How to Control Ventenata and Other Annual Grasses will be held on
Tuesday, March 5, 2019
UI Extension Office
2200 Michigan Ave.
Orofino, ID
Registration and payment due by:
Friday, March 1, 2019
