## VET CHECK QUESTIONS

### First year exhibitors:

- Normal temperature range for your animal(s).
- Age of our animal(s).
- Sex of our animal(s).
- Has your animal been sick?
- Has your animal been to a veterinarian?

### Second + year exhibitors:

- What are the diseases your animal is vaccinated against?
- What are the normal temperature, pulse and respiration ranges for your animal(s)?
- Why is it important to keep a record of where and when you take your animal to fairs or events which bring groups of animals together?
- What is the definition of **biosecurity**?

### Four + year exhibitors (plus all the above):

- Describe (signs and cause) at least two common diseases or conditions affecting your species of animal(s):
  - Examples (but not limited to these examples)
    - Equid; strangles, laminitis, sleeping sickness.
    - Bovid; bloat, foot rot, bovine respiratory disease complex.
    - Ovid; rectal prolapse, nasal bots, overeating disease.
    - Suid; swine dysentery, inguinal and/or umbilical hernias, erysipelas.
    - Avid; influenza, mites, bumble foot.
    - Caprid; caseous lymphadenitis, urolithiasis.
    - Lapid; typhlitis, snuffles, ear mites.
