Forest Insects & Disease Field Day
for Forest Owners & Loggers

Coeur d’Alene
Friday, July 26, 2019
8:00 a.m. to 5:00 p.m.

Meet at North Idaho College Parking Lot “A”, on Hubbard Street across from the Coeur d’Alene Wastewater Treatment Plant.
Is something bugging your trees?

Seeing patches of trees dying on your property can be very disheartening. Unfortunately, many people do not act on insect and disease issues until they see visible symptoms. Preventative methods are usually most successful in reducing forest insects and disease problems.

Native insects and diseases are a natural part of the forest. However, sometimes they damage more trees than we want them to, especially if we have (usually unknowingly) created a favorable environment for them.

This one-day field trip will give participants firsthand exposure to a wide range of insects, diseases, and parasitic plants that impair the growth of trees and forests in northern Idaho. Experts will be on hand to help participants identify insect and disease symptoms and discuss practical methods of dealing with them.

Agenda

8:00 am  Introductions and Orientation
8:30 am  Start Field Trip (bring a sack lunch) Items to be Viewed:
- Pine and fir bark beetles
- Armillaria and other root diseases
- White pine blister rust

Date and Location

The Forest Insects & Disease Field Day will be held on Friday, July 26th, 2019, in Coeur d’Alene. The program will depart from the North Idaho College Parking Lot “A”, on Hubbard Street across from the Coeur d’Alene Wastewater Treatment Plant. NIC parking permits are not required on that day.

To ensure an effective learning environment, registration for this session is limited. Please return the registration form on the back of this flyer, as soon as possible, to assure your place and help us plan. A $15 registration fee covers handouts and refreshments.

For registration questions, contact the University of Idaho Extension Office in Kootenai County at (208) 446-1680.
