## Program

Every summer we see numerous media reports of homes in the woods being threatened by wildfires. Forest fires are a fact of life in the Inland Northwest. Homes located on forested lands (the "wildland urban interface") can be at high risk from forest fires.

Forest fires are not always easy to stop. But you can take action to reduce the risk of damage to your home from wildfire.

"Landscaping for Fire Prevention" will help forest homeowners modify their houses and landscapes to make them less likely to burn and easier for firefighters to access.

## Dates & Locations

Two sessions off "Landscaping for Fire Prevention" will be held online from 9am to Noon via Zoom on Saturday, November 14, 2020, and Saturday, April 10, 2021.

If you have a group of 10-25 who would commit to attending this program in person at a different time or place, contact Chris Schnepf at [cschnepf@uidaho.edu](mailto:cschnepf@uidaho.edu).
