Blanchard Community Center  
685 Rusho Ln.

## Additional Sessions?

Additional sessions of this program can be scheduled for interested groups of 10 or more.

*Strengthening  
Forest Stewardship  
Skills*

# Landscaping for Fire Prevention

---

## Program

Every summer, we see numerous media reports of homes in the woods being threatened by wildfires. Forest fires are a fact of life in the Inland Northwest. Homes located on forested lands (the "wildland urban interface") can be at high risk from forest fires.

Forest fires are not always easy to stop. But you can take action to reduce the risk of damage to your home from wildfire.

*Landscaping for Fire Prevention* will help forest homeowners modify their houses and landscapes to make them less likely to burn and easier for firefighters to access.

Participants will view videos, discuss their wildland fire experiences, and participate in a simple exercise to assess their homes' interface fire risk.

---

## Dates & Locations

*Landscaping for Fire Prevention* will be held at the following dates and locations:
