Backyard Forests

Program

Homeowners with five acres or less of forest land do not usually want to manage them intensively for timber harvest (though many eventually sell logs from these properties). Most owners of these “backyard forests” are interested primarily in keeping their trees healthy and their landscape attractive.

Unfortunately, many homeowners do not consider doing anything actively until backyard forest trees are visibly suffering from some kind of insect or disease problem. By the time they bring a sample into the Extension Office or to some other expert, it is often too late.

Remedies for bark beetles, root disease, and similar forest health problems are usually preventative. *Backyard Forests* will help homeowners with smaller acreages of forested land apply basic concepts of forest ecology to their trees. Participants will learn about:

- * tree species native to northern Idaho and their growth habits;
- * how forests grow and change over time;
- * common forest insects and diseases;

- * methods to improve forest tree health and reduce potential insect, disease and fire problems; and
- * enhancing forest wildlife habitat.

Dates & Locations

Backyard Forests will be held in cooperation with UI Master Gardeners at the following dates and locations:

Post Falls

Saturday, February 18, 2023 (11am to 1pm)
University of Idaho Research Park
958 S. Lochsa Street, Room 302

Sandpoint

Thursday, February 23, 2023 (9am to 12pm)
UI Sandpoint Organic Agriculture Center
10881 N Boyer Road

St. Maries

Thursday, March 23, 2023 (1pm to 4pm)
Community Presbyterian Church
1100 College Avenue

Registration

Each session has limited space, so please return the registration form on the back of this flyer as soon as possible to assure your place and help us plan. A \$10.00 registration fee includes program materials and refreshments. For registration questions, contact the University of Idaho Extension office in the county in which the program will be held (see registration panel of this flyer).
