In compliance with the Americans with Disabilities Act of 1990, those requesting reasonable accommodations need to contact Chris Schnepf at the UI-Kootenai County Extension Office (Phone: 208-446-1680) at least one week prior to this program.
Forestry efforts to manage plants that impede reforestation or degrade forest biodiversity rely primarily on cultural techniques. But sometimes a discrete herbicide application can make all the difference in such efforts, particularly on challenging sites or where invasive species are a serious problem.

Safely Using Herbicides in Forestry is designed to provide an introduction to when and where herbicides can be considered as part of a forest management strategy and how to use them safely and effectively in a forest environment.

Program Agenda

8:00 am  Check In
8:15 am  Pesticide Use in Forestry - an Overview: Chris Schnepf, University of Idaho Extension
8:45 am  Herbicides for Reforestation: Dan Miller, Idaho Dept. of Lands (contracted)
9:45 am  Break
