The nutrition minor will help you build a foundation of knowledge in nutrition science and is a great supplement for any major. This 18-credit minor covers general nutrition, community nutrition, global nutrition and more.

With this minor, you will learn how to differentiate nutrition fact from fiction and apply those skills to your main area of study while also becoming a more informed consumer.

After completing this minor, you will be able to:

- Understand how the body processes nutrients and the role nutrition plays in health and disease.
- Determine which foods to include in a normal daily diet and identify sources and recommended amounts of essential nutrients.
- Understand and apply key principles of nutrition and the changes of nutritional needs across the lifespan.
- Develop knowledge and skills to supplement your major.
