

COVID-19 and Infant Feeding

Now Recruiting COVID-19+ Mothers and Their Infants for Research Study

- Are you at least 18 years old?
- Do you have an infant who is two years old or younger?
- Have you tested positive for COVID-19 in the past week or are you waiting to find out the results of your COVID-19 test?

If so, you may be eligible to participate in a study on infant feeding and COVID-19. Participation would require seven stool and four finger/heel prick samples from mother and baby over two months. Breastfeeding mothers will also provide milk samples and will receive a breast pump, which is yours to keep after the study.

All women and infants can participate, regardless of where you live!

*Research support provided by the National Science Foundation and the
Bill and Melinda Gates Foundation*
