2015 Enterprise Budgets: District 1 Grass Hay

Kathleen Painter, PhD Agricultural Extension Educator **Boundary County** PO Box 267 Bonners Ferry ID 83805 (208) 267-3235 kpainter@uidaho.edu

Table 1. Summary of Returns by Crop and Rotation (\$/acre)

By Crop:	Unit	Yield per acre	Price* per unit	Revenue per acre	Returns over TC (\$/acre)	Returns over VC (\$/acre)	Crop & Cost Share** Cost (\$/acre)	% Share 67% 33%	Operator Owner
Establishing Grass Hay	ton	0	0	0	-162	-127	0	67/33	_
Grass Hay Production	ton	2.5	125	313	38	188	77	67/33	
Stand life, in years	6								

Note: Establishment costs are amortized over the productive years of the hay stand. The negative returns for the establishment year are carried forward as a cost for each year of production.

Input Prices

-		
		2015
Item	Unit	Price/unit
Fuel:		
Diesel, offroad, bulk (gal)	gal	\$3.00
Gas (gal)	gal	\$2.60
Oti-		
Seed:		00.40
Grass Hay Seed, mixed	lb 	\$2.40
Alfalfa Seed, Ladek	lb	\$4.35
Fertilizer:		
Nitrogen (dry)	lb	\$0.57
Phosphorous (dry)	lb	\$0.55
Sulfur (dry)	lb	\$0.28
Potassium (dry)	lb	\$0.31
Gypsum	lb	\$0.16
Adjuvants:		
Amm. Sulf. (20-0-0-24)	lb	\$0.22
Amm. Sulf. (liquid)	pt	\$0.05
Class Act (adjuvant, antifoam)	OZ	\$0.12
Crop Oil Concentrate	pt	\$1.31
Custom Rental:		
Custom Aerial	acre	\$8.95
Fertilizer Applicator	acre	\$1.00
26' Rental Shredder	acre	\$10.00
36' Ripper Shooter	acre	\$2.50
90' Rental Sprayer	acre	\$2.00

Input Prices

		2015
Item	Unit	Price/unit
Labor ¹ :		
Hourly machine labor	hour	\$17.80
Other labor	hour	\$10.25
Overhead:		
Overhead ²	percent	5.0%
Management fee:		
Management fee ³	percent	5.0%
	porconi	0.070
Cash rent:		
Cash rent	acre	\$0.00
Casirrent	acie	Ψ0.00
Land Tax:		
		05.50
Land Tax	acre	\$5.50
-		
Interest:		
Operating Loan	percent	5.75%
Machinery Loan/investment	percent	6%

<sup>Includes all applicable state and federal taxes.
Covers legal, accounting, and utility fees. Calculated as percentage of operating expenses.
Calculated as a percentage of gross revenue.</sup>

INSTRUCTIONS AND ASSUMPTIONS

Input Prices:

Input costs are based on a annual survey of input suppliers for each region, available online at http://web.cals.uidaho.edu/idahoagbiz/enterprise-budgets/

Crop Prices:

Crop prices are typically based on five-year average prices received by Idaho growers, with adjustments by region and for some contract crops.

Machinery Costs:

The machinery complement and associated hourly machinery cost data are in the last two sheets. The per acre machinery cost data are used to create the individualized machinery cost data for each budget, all located below the main table at the top. Machinery fixed costs include depreciation, interest, property taxes, insurance, and housing. For the overall farm operation, these costs do not vary by crop, given the ownership of a specific machinery complement, and are incurred whether or not crops are grown. Your per acre fixed costs will change if the farm size differs significantly from the size used in these budgets.

Land Costs:

Land costs, included either as real or as opportunity costs, are based on a typical share rental arrangement. We calculate net land rental cost as a cost share as follows:

1/3 Crop Value – (1/3 Fertilizer Cost + 1/3 Chemical Cost + 1/3 Crop Insurance + Land Taxes)

A typical lease agreement in the areas surveyed is a one-third land owner and two-third tenant crop share, with the land owner paying land taxes, one-third of the fertilizer cost, one-third of the chemical cost, and one-third of the crop insurance. The tenant covers all other production expenses. This crop-share percentage can be adjusted in the Excel version of the crop worksheets files. If the percentage is adjusted on the Summary tab, it is changed for all crops. If you want different crop-share percentages for different crops, adjust the percentage on the budget sheet for that crop. This valuable tool reveals how factors such as crop and input price increases as well as cropping choices affect revenue for landlords and operators differently. Note that pea, lentil, and garbanzo crop-share arrangements are typically 25/75.

While the owner-operator will not actually experience a land rental cost, this cost represents the minimum return owner-operators must realize to justify growing the crop themselves. To determine the profitability of crop production relative to other activities, the owner-operator may want to consider these forgone rental returns along with the usual production expenses.

General Assumptions:

Since farming is inherently variable and constantly changing, we hope that this spreadsheet format will be helpful in adjusting these budgets to reflect your particular operation. Enterprise costs and returns vary from one location to the next and over time for any particular farming operation. Variability stems from differences in the following:

- · Capital, labor, and natural resources
- Type and size of machinery complement
- · Cultural practices
- Size of farm enterprise
- Crop yields
- Input prices
- Commodity prices
- · Management skill

Please examine closely the assumptions we have used and make adjustments to reflect your particular operation. Adjustments in the variable costs can easily be made without affecting the overall accuracy of the budget information. Machinery costs are more difficult to adjust, due to the underlying complexity of machinery cost calculations. A separate machinery cost calculator program is used to develop the costs used in these budgets, which are based on specific machinery widths, tractor horsepower, type of operation, etc. The machinery cost program and data sets specific to this budget are available upon request.

Acknowledgments:

I wish to thank everyone who helped gather all of the information needed to create these worksheets. First and foremost, I thank the farmers who were willing to take the time to share their enterprise information in order to create this worksheet. Without their assistance we would not be able to provide this critical information to others. However, I take responsibility for any errors in these budgets.

Budget spreadsheets are available at the following link:

http://web.cals.uidaho.edu/idahoagbiz/enterprise-budgets/

Schedule of Operations for Establishing Grass Hay for District 1

Month	Operation	Tooling	Materials/Service
Sept	Plow	350HP-WT, 10-Bottom Plow	
Оерг	1 IOW	330TH -WT, TO-BOROTH TIOW	
April	Cultivate	350HP-WT, 40' Cultivator	
April	Fertilize	350HP-WT, rented spreader	60 lb N, 10 lb S
April	Harrow	350HP-WT, 20' Spike Harrow	
April	Harrow	350HP-WT, 20' Spike Harrow	
			7 lb grass seed
May	Plant	350HP-WT, 36' Drill	5 lb alfalfa seed
