The Lost Apples of Whitman County
1950’s
PREMIUMS FOR THESE

Awards Paid by the Whitman County Fair Association.

Displays in Every Department Were Excellent—All Could Not Receive Premiums.

The management of the Whitman County Fair Association has audited the premiums given at the tenth annual exhibit. For the most part every department was well represented with displays, some very fine exhibits being shown. The judges were careful and painstaking and all exhibitors are well pleased with the work done by them. It was no easy task to make awards in some instances, there being so many excellent displays.

All claims for premiums must be made on or before December 1, 1904. Claims presented after that date will not be allowed by the association. The list of premium awards is as follows:

The Prize Winners.

Unprofitable Varieties of Fruit

Following is the report of the committee on elimination of unprofitable varieties, as adopted by the Pacific Coast Association of Nurserymen, at their sixteenth annual convention, held at Portland, Oregon, July 10 to 12, 1918:

The task assigned to this committee is of such magnitude that we can only hope to make a beginning at this time. After careful thought and discussion we recommend that the following list of names of fruit trees be dropped from our catalogs and budding lists, and their sale discontinued. Nurserymen who have been making specialties of certain varieties may choose to push such, but unless it is one of merit and demand we would discourage such action.

Apples:
Lankford
Joanie Cooper  Shaun Shepherd

The Temperate Orchard Conservancy
Pilgrims planted apple seeds. 1629

Johnny Appleseed roamed the Ohio Valley in the early 1800's

+++ 1863 +++
OLDEST AND BEST.
LARGE RED APPLES, KING OF FRUITS.

SUMMER.
YELLOW TRANSPARENT—Medium size, earliest, beautiful, waxen white, with red cheek; dessert or market; July.
EARLY HARVEST—Medium size, yellow, tart, excellent; August.
RED ASTRACHAN—Large, crimson, tart, hardy; August.
EARLY PENOCK—Large, striped, cooking; August.
RED JUNE—Handsone, fine, dessert.
SWEET JUNE—Medium size, whitish, excellent; August.

FALL.
DUCHESS OF OLDENBURG—Large, showy, striped, tart, a magnificent fruit; August.
GRAVENSTEIN—Large, well known, excelled by no other apple; September and October.
FAMEUSE (or SNOW)—Medium size, bright crimson, mild and delicious, dessert; October and November.
WAXEN—Large, cooking and drying; October and November.
KING OF TOMPKINS COUNTY—Large, showy, yellow and red, splendid, all should have it; October.
TWENTY OZ.—Very large, striped, cooking and market, good for drying; October and November.
BAILEY SWEET—Nobest sweet, large, dark crimson, one of the most attractive every way; October.
WEALTHY—Large, brilliant red, productive, good; Nov. to Dec.
FALL PIPPIN—Large, yellow, excellent, tart; November to Dec.
MAIDEN'S BLUSH—Medium, yellow and red, showy and fine, salable; November to December.
RAMBO—Medium, striped, a good apple; December and January.

WINTER.
ROUS'S SPITZENBERG—Large, deep red, one of the best for market; February to April.
GOLDEN RUSSET—Small, russeted, nice dessert for Christmas; January and February.
BALDWIN—Large, most famous red in market; February or April.
YELLOW BELLFLOWER—Large, delicious for cooking or eating, good till February.
RED-CHEEK PIPPIN—Large, red-cheeked, juicy, rich, one of the best, keeps till April or May.
GREENING, R. J.—Greenish, juicy, rich, popular; March and April.
NORTHERN SPY—Large, red and green, one of the best winter apples; March and April.
TALMAN SWEET—Medium size, firm, rich, most popular winter sweet; all winter.
BEN DAVIS—Large, showy, red, most advertised of any apple, fine market and cooking; all winter.
WINESAP—Medium, fine, red; all winter.
ROME BEAUTY—Large, showy, red; good all winter.
LADY—Small, red-cheek, spacy, popular for fruit stands; all winter.
GANO—Large size, cherry red, very handsome, flesh white; new; all winter; 35c each, 3 for $1.
Charles Whitney
1884
Shackleford—Originated in Clark County, Missouri. The tree is a vigorous grower and a prolific bearer, better even than the Ben Davis; it flourishes on poor land with a clay sub-soil; apples large, highly colored and finely flavored; choice cookers and good keepers. Season December to May.

York Imperial—Medium, oblate, white shaded with crimson, juicy and sub-acid, a good bearer and keeper, one of the best winter apples. November to April.
Famous Apple Tree in the C. R. Frazier Orchard Near Dixie in the Walla Walla Valley. In the Year 1907, 162 1-2 Boxes of Apples Were Picked From This Tree
FRUIT TREES FOR WHITMAN COUNTY.

--- IN ---

RITZ'S NURSERY

At Walla Walla, W. T., there are

NEARLY 1,000,000 TREES,

All of the Best Kinds, and Suited to this Climate.

Mr. Ritz deals in no new, untried kinds, and keeps no humbug. His patrons will get none but the very best. He has no partners, attends to the business himself and can sell lower than any other person.

Address: PHILIP RITZ, Walla Walla.
FRUIT TREES

I am now prepared to furnish the people of Eastern Washington and Idaho with a large assortment of the choicest fruit trees. Small fruits as follows:

APPLES,
CRAB APPLES,
PEARS, CHERRIES,
PLUMS, PEACHES, QUINCES,
NECTARINES, APRICOTS,
CURRANTS, GRAPES,
GOOSEBERRIES,

MAMMOTH BLACK CAP RASPBERRIES,
Etc., Etc.

The most beautiful and fragrant
MOSS ROSES,
CLIMBING ROSES,
HYBRID PERPETUAL ROSES,
HONEY SUCKELS,
TREE PæONIES,
SNOWBALLS,
CLEMATIS,
ETC.

This stock has been obtained at a great expense, with the utmost care, from old and reliable Nurserymen in the States, and has been thoroughly tested and acclimated to this Territory, and is grown in the Palouse valley, ten miles below Colfax,

WITHOUT IRRIGATION.

All orders by mail promptly attended to.
P. O. address Colfax, Whitman Co., W. T.
L. M. SWIFT.

Farmers produce, shingles and lumber received in exchange.
PALOUSE NURSERY

PLEASANT DALE FRUIT FARM

Situated two miles northeast of Colfax.

HARDY FRUIT AND ORNAMENTAL TREES
AND SHRUBS A SPECIALTY.

Many years of observation and experience in this Palouse Country have enabled me to judge what is best adapted to this climate, as near as possible.

PRICE OF TREES:

Apple trees, one to two years, as to number taken, 10 to 15¢
Pears, Plums and Cherries, 25 to 35¢
Strawberries
Flowering Shrubs, 25 to 35¢
Roses and Peonies

Summer Apples:
Yellow Transparent, 1.00 to 2.00
Red Astrichan
Red June
Golden Sweet
Trouton Early
Jersey Sweet
Saps of Wine
Thayles

Fall Apples:
Hawley
Ant, Strawberry
Rose
Hessie Coollin
Waxen
Porter
Mother

St. Lawrence, 1.00 to 2.00
Huss
Alexandria
Twenty Ounce
Bayley’s Sweet
Oldenburg
Bellflower
and others.

Winter Apples:
Jeffries
Wagener
Rockery Russet
Paradise Sweet
Dutch Mignon
Man Apples
Walthbridges

Yellow Bellflower
White Bellflower
McIntosh Red
Wolf River
Blue Pearl

We warrant no trees except to be good when they leave the Nursery. It is not right to ask a nurseryman to warrant your labor and care and the vicissitudes of the weather.

We do not send out agents, but sell to those who come or send for them, believing it is best for all concerned. We do not wish to induce people to buy trees when they are not prepared for them.

THEO. SMITH, COLFAX, W. T.

1872
GEO. RUEDY,
PROPRIETOR OF
COLFAX NURSERY!!

Located within city limits, on the hill, due west of public school site,

COLFAX, Wash. Ter.

I am now ready to take orders for hardy fruit and ornamental trees, small fruit plants, etc., raised by myself from cuttings, seed and scions taken from the oldest orchard in the Palouse country. My stock of one and two year old apple trees consists of the following varieties:

FALL APPLES.—Alexander, Rambo, Duchess of O., Rose, Fall Pippin, Porter, Gravenstein, Waxen.

WINTER APPLES.—Yellow Newtown Pippin, W. H. Pearsmain, Baldwin, Northern Spy, Blue Pearsmain, R. I. Greening, Spitzenberg, Seek No Further, Swaar, Roxbury Russet, Winter Bellflower, Talman Sweeting, Red Cheek Pippin, Wealthy, Mann, Winsap, Ben Davis, St. Petersburg, Peter the Great.

CRAB APPLES.—Transcendent, Van Wyck.

ORNAMENTAL TREES.—Lombardy Poplar, Box Elder, Cottonwood, Silver Maple, Hard Maple, Black Ash, Gray Willow.

Parties who want any of the above had better order early, as my stock is limited.

GEORGE RUEDY.
My experimenting with nut trees has been very expensive both in time and money. The first half-dozen English walnut trees bought cost me $7. They are killed to the ground three winters.

A 4-year-old Hardy Chestnut Tree, 6 ft. 6 in. high, diameter 1 1/4 in.

IN GEORGE RUSDY’S COLFAX NURSERY, COLFAX, WASH.

A recent number of the Rural Northwest states that a resolution was adopted by the Oregon Board of Horticulture at its last meeting requesting Secretary Reed and President Miller to visit this part of the state.

**SPECIAL VARIETIES OF WINTER APPLES, $1.00 EACH**

**WINTER BANANA**—The most popular apple of recent introduction and sold by many nurseries at $1.00 each. **Fruit**—Large size, golden yellow beautifully shaded with red, quality excellent, a good keeper. **Tree**—Very strong grower and easily bearer, very valuable for market.

**BELLE OF PARIS**—Tree the strongest grower we know of among apples. **Fruit** regular and large, heavily streaked with red. High quality and a long keeper.

**JOHN APPLE**—Resembles Duchess Oldenburg in size, shape and color, but is months later, keeping all winter.

**VIRGINIA BEAUTY**—Grown from scion from Virginia. **Fruit**—Is the handsomest we have ever seen. **Quality**—Best—Sold to keep all winter.

*The above list of trees is the choice of one hundred and forty-five different kinds grafted in our two hundred and thirty acre orchards. All being selected for hardiness, fruitfulness, hardiness and fruit, and propagated from the very best stock of their kind. Our trees are all grown on high ground without irrigation and while not as large as irrigated stock, are sure to give better satisfaction in all respects; for they are harder, have better roots and are better adapted to all soils.

People buying from us run no risk of receiving infected stock; as the wolly aphis, codlin moth, San Jose scale, or other like injurious pests are unknown in this locality. The only pest we have is the common green aphis.

**GUARANTEE**—While we exercise the greatest care and diligence to have our trees, etc., true to label, and hold ourselves in readiness, on proper proof, to replace all trees, etc., that may prove untrue to label, free of charge, or refund the amount paid, yet it is mutually understood and agreed to between purchases and ourselves that our guarantee of genuineness shall in no case make us liable for any sum greater than that originally paid us for said trees, etc., that prove untrue.

All orders from unknown correspondents must be accompanied by remittance or satisfactory reference, or if parties prefer, they may make their remittance to the "Commercial State Bank," to be held by it until the goods are delivered.
JOHN APPLE—Resembles Duchess Oldenberg in size, shape and color, but is months later, keeping all winter.

The above list of trees is the choice of one hundred and forty-five different kinds fruited in our two hundred and twenty acre orchards. All being selected

PALOUSE NURSERY

Two miles east of Colfax, Wash.

The only collection of hardy trees that have been proven in the Palouse country, Cashup Davis, ever ready to show you wonders from Steptoe Butte says: “My trees are the only one he has had that were worth a ——— The rest have become black hearted.” Price of apple trees this fall at the nursery, $15 for 100, $8 for 50, $1 for 6. Special varieties and extra sizes, 25 to 50 cents apiece. All first class trees. Other trees as usual. Send for catalogue.

</table>
Jenatin—Medium size, yellow, striped with dull red; juicy, rich, delicious; tree hardy and productive; blooms late; very popular. December to April.

John Apple—Resembles Duchess of Oldenburg in size, shape and color, but is months later and keeps all winter. Quality excellent.

Jonathan—Fruit medium, roundish; skin yellow, nearly covered with dark or lively red; fine grained and finely flavored. One of the best commercial varieties. November to April.

King of Tompkins County—Large, globular; yellowish, shaded with red and splashed with crimson; juicy, tender, rich vinous flavor; delightfully aromatic. Popular commercial variety. December to March.

Kinnard’s Choice—Thought to be a seedling of Winesap. Fruit medium to large, almost covered with dark red or crimson; flesh yellowish, fine grained, tender, rich, juicy, excellent.

Lady Apple—Small, lemon yellow, with brilliant red cheek; flesh crisp, juicy and excellent; bears abundantly. A valuable dessert fruit. December to May.

Lady Sweet—One of the finest winter sweet apples for the dessert yet known or cultivated in this country. Handsome in appearance, and is a good keeper. Tree a vigorous grower, and bears abundantly. Fruit large, roundish oval. Skin very smooth, nearly covered with red in the sun, but pale yellowish green in the shade, with broken stripes of pale red. The red is sprinkled with well-marked yellowish gray dots, and covered, when first gathered, with a thin white bloom. Flesh greenish white, exceedingly tender, juicy and crisp, with a delicious, sprightly, agreeably perfumed flavor. Very good or best.

Lankford—Medium, roundish oblate red; tender, moderately juicy, mild sub-acid; very good. December to May.

Mammoth Black Twig—Large, very dark red; excellent quality, remarkable

Mammoth Golden Pippin—Very large, roundish, ribbed; coarse, juicy, tender, mild sub-acid. November to December.

Mann—Large, roundish oblate; yellow; juicy, mild sub-acid. Late keeper. Good.

May of Myers—Medium, roundish, pale green; mild sub-acid; good. February to June.

McAlee’s Nonsuch—Medium to large, roundish oblate; yellow, striped and splashed with red; tender, juicy, mild sub-acid; very good. Early winter.

McIntosh Red—Medium, nearly covered with dark red; flesh white, fine, very tender, juicy and good. November to February.

Missouri Pippin—Large; rich red, with darker red stripes; very handsome and of fair quality. Good grower; early and immense bearer.

Milam—Much grown at the West, very productive, and keeps well. Fruit medium or below, roundish, greenish, shaded and striped with red. Flesh rather firm, pleasant, sub-acid, not rich; good. December, March.

Montreal Beauty—Large; yellow, shaded with rich red; flesh yellowish, rich, firm, acid. Very handsome.

Mother—Medium, roundish conical; yellow, nearly covered, splashed and marbled with rich shades of red; tender, juicy, delicious. A valuable dessert apple. Early winter.

Niedwetzkiana—The wood, leaves, flowers and fruit are a brilliant red.

Northern Spy—Large, roundish, conical; striped, with the sunny side nearly covered with purplish red. Excellent.

We have documentation for 247 varieties of apples (not including crab apples) that were grown in eastern Washington and northern Idaho during the late 1800’s and early 1900’s.

Of the 247 known apple varieties, ___ are considered lost or extinct and have adequate enough descriptions that could lead to their re-discovery.
Below are some apple varieties we are searching for:

Babbitt, Benton County Beauty, Bostic Queen, British Columbia, Cornell’s Fancy, Elkhorn, Isham Sweet, John, Lankford, Maxon’s Early, May of Myers, Oregon Red Winter, Pyles Red Winter, Scarlett Cranberry, Walbridge, Whitman
Mr. J. C. Bowen,
Hunters, Wash.

March 30th 1904.

Dear Sir: We have your favor of the 18th and regret that we cannot furnish your list of peaches complete. We enclose duplicates of your order as we have entered it, and as far as we can furnish the stock. We wrote you several days ago that we could send 10 Gage and 10 Alexander peaches for what we received last fall. We sent all the Apricots and all the cherries except the Bitternut. We enclose our check for $18. 30 which with the amount of the bill as shown by the enclosed carbon sheet makes the amount of the check you want us.

Had you sent your order ten days earlier we could have filled it complete. Can we book the balance for fall delivery? We would also like to have your order for such other stock as you will want then and we think you will save money, especially so early in the season when things are unseasonably early. Apples are quite likely to be higher because of the apple seedling stock having been a failure in the valleys of the Missouri and Mississippi rivers which furnish most of the nurseries of the U.S. with their stock. We grow ours but do not know of another nursery that does. The price of seedlings is four to five times greater than usual.

We hope that you would like to have them shipped as early as possible and will ship just as soon as it is safe to do so, probably in a day or two. The past week has been very stormy with us and it is snowing here now.

Yours truly,

Hanford Nurseries.
early. Apples are quite likely to be higher because of the apple seedling stock having been a failure in the valleys of the Missouri and Mississippi rivers which furnish most of the nurseries of the U.S. with their stock. We grow ours but do not know of another nursery that does. The price of seedlings is four to five times greater than usual.
Oct. 11, 1892

Messrs. E.L. Allen & Co.,

Gentlemen: Will you kindly send me a set of rubbers and a breastplate for the bottom of the seed box of your Hill Dropping. I am not yet ready, and I will return the receipt on Hull as a trial plate.

The #8 but it is not so durable. We are not able to make the success of it as we had hoped we could. It would be kind if you can give information that will assist us to it.

We thought it might be able to plant more seed in 100 four inches apart with three to four seed in a hill but have been unable to be sure of dropping the seed about a inch were dropped. One of the prize plants in the garden of the seed box has grown and the name of coming out and is now out of shape that it cannot be used.

Yours truly,

E.N. Harvey
on top of the filter around several times, the
force of the water pushing the cleaner
against the porous pipe, thereby speedily
cleaning the same. This process avoids the
usual taking apart of the filter, and sepa-
ately cleaning the various parts.

We have before us a letter from The Mc-
Intosh-Huntington Co., hardware jobbers of
Cleveland, stating that they believe the
"Darling" to be the nearest germ-proof
filter made. They state that it is a very
salable article, and particularly adapted for
sale by the hardware trade.

The manufacturers advise us that they de-
sire a responsible dealer in every town to
handle this article.

"Planet, Jr.," Seed Drill

S. L. Allen & Co., 1107 Market St., Phila-
delphia, Pa., are offering the trade the
"Planet, Jr.," Single Wheel, Hill Dropping
Garden Drill, illustrations of which are
shown herewith. One of the engravings
shows the general view of the drill, while the
other clearly shows the construction of the
seed hopper.

The company have manufactured a small
number of these drills in the spring of the
current year and put them out on trial under
existing conditions, the result being they are
being offered to the hardware trade for the
season of 1896. This drill will sow a con-
tinuous row with surprising regularity, its
distinctive feature being that it will drop
very nearly in hills. It opens the furrow,
drops either in hills or drills, at pleasure.
It also covers, rolls down and marks the
row in one operation.

The machine will hold 31/2 quarts. The
driving wheel is 15 inches high, with a
black face. A single pair of covered gears
drives the feed wheels and the spacing
wheels. The hill-dropping attachment can
be changed in a moment from hill-dropping
to drill work by simply loosening the cut-
off; to reverse the movement it is only ne-
cessary to release the cut-off. Hills may be
dropped either 4, 6, 8, 12 or 24 inches apart.
The flow of seed may be started or stopped
by a single movement of the finger without
taking the hand from the handle. The
spacing wheel can be changed inside of a
half minute, while the opening plug is ad-
justable for reasonable depths.

Improved Grip Socket

The Cleveland Twist Drill Company, Clev-
eland, O., have recently patented, and
are now putting on the market, the Improved
Grip Socket shown in the Illustrations. One
of the engravings is a broken view showing
the grip of the key on the shank, the other
illustration being a general view of the
device.

This grip socket is claimed to be the first
improvement in driving taper shank twist
drills made in thirty years. It is designed
to hold and drive taper shank drills and
other tools. A groove, which is an arc of a
true circle, is milled in the shank of the
drill or tool—as shown in the illustration—a
key let into the body of the socket fits into
the groove, and is locked securely in place
by a turn of the revolving internally eccen-
trical cone shaped collar.
The Lost Apple Project
The Whitman County Historical Society Lost Apple Project seeks to identify and preserve heritage apple trees and orchards in the Inland Empire.

Goals
The Lost Apple Project (LAP) seeks to identify and map apple trees and orchards planted prior to 1920 in the region known as the Inland Empire (eastern Washington State and parts of north Idaho). We also intend to work with land owners to encourage the preservation of these trees.

The LAP aims to search for a specific list of apple varieties that were known to have been grown in this area and are now considered extinct or lost. When lost varieties are rediscovered steps will be taken to propagate the trees and make them available again to the public.

The LAP will share their knowledge, research, and resources with the community.
