Make a Difference in the Future of Our State

What to Expect:
- Following commitment, a team will schedule a time to scope your location and verify it meets the university’s parameters and needs. Locations must be along Idaho state highways and interstates.
- In order to qualify for this partnership opportunity and gain approval by the state, properties must be zoned industrial or commercial.

ANTICIPATED TIMELINE:

Dec.-Feb. 2019
COMMITMENTS

Feb.-March 2020
DESIGNS AND PRODUCTION

April-June 2020
INSTALLATIONS

PARTNERSHIP OPPORTUNITIES

DONATION OF BUILDING EXTERIOR WALL SPACE
While U of I’s location has proven to be a unique value proposition, it can also be a barrier – keeping our target audiences from fully experiencing what U of I has to offer.

By granting the university the rights to portray graphics on the side of your grain bins and elevators along major Idaho roadways, you’ll help showcase your commitment to education in Idaho and help us continue raising awareness of U of I’s presence across the state.

COST: $0*

*U of I will cover the cost of graphic development, production and installation unless otherwise requested.

After scoping the location, the team will provide a recommendation for materials to use – either vinyl or paint – at which time a final cost will be determined and provided.

Designs will vary based on location and number of grain bins in the elevator system being enhanced. A specific design would be crafted by U of I for your specific elevator system.

All designs must be approved by the Idaho Transportation Department prior to installation and may impact the final elements. This process will be handled by the university.

The average lifespan of a wall graphic installation is 3-5 years, but graphics may fade more quickly depending on the surface and material used. As decals fade or experience anticipated wear-and-tear, funding for maintenance should be anticipated, and updates would be done in partnership according to the original agreement.

Upon special request, graphics and installation consultation are available to partners who wish to oversee installation directly.
