Understanding & Protecting Our Environment

Today’s global environmental problems demand professionals who grasp the complex social, political, biophysical, and economic contexts for those problems. Take advantage of this unique program to develop a strong foundation in both environmental science and the human dimensions of environmental issues. Focus your studies through courses in environmental policy, economics, planning, and geospatial analysis, while building skills for careers in environmental law, policymaking, public relations, ecotourism, land management, and many more.

Environmental Science: Policy, Planning, and Management Emphasis
