UI College of Art & Architecture
Master of Science (M.S.) in
Integrated Architecture and Design

Area of Emphasis Form

Name_____
            Last (Family)   First   Middle

The Master of Science in Integrated Architecture & Design degree is a post professional degree that offers a research program to candidates who hold a professional degree in architecture, or degree holders who desire to develop expertise in architectural research and scholarship.

The program is designed for independent research leading to a thesis under the direction of a major professor and thesis committee. *This degree does not lead to licensure as a professional architect.*

Please choose your desired research area(s) from the list below:

• Sustainable architecture and planning
• Urban design
• Environment and behavior studies
• Community planning
• Computing and visualization studies
• Other: List your preferred area of emphasis

First (required)
Second (optional)
Third (optional)
