

HEALTHY VANDALS

~ *protect yourself and others* ~

1 maintain social distancing

- Stay home if you are sick
- Put at least 6 feet between you and others
- Remember that some people without symptoms may still be spreading a virus
- Avoid close contact with people who are sick

2 cover your mouth and nose with a cloth face covering when around others

- You can spread COVID-19 to others even if you do not feel sick
- Face coverings are required inside all university buildings, with limited exceptions
- Face coverings are not a substitute for social distancing

3 keep hands clean

- Wash often with soap and water – especially after visiting public places, using the restroom, blowing your nose or sneezing
- If soap and water are not available, use hand sanitizer (at least 60% alcohol)
- Avoid touching your face

4 cover coughs and sneezes

- If you are in a private place and not wearing a face covering, sneeze or cough inside your elbow
- Throw away used tissues
- Immediately wash hands or use a hand sanitizer if soap and water are not readily available

5 clean and disinfect

- Clean debris off surfaces before disinfecting
- Disinfect frequently touched surfaces regularly (laptops, keyboards, cell phones doorknobs, light switches, handles, countertops, shared spaces)
