

# 7<sup>th</sup> Street Pedestrian Mall

This project will address a one block stretch of Seventh Street from the Pitman Center, on the east, to Elm Street on the west. The project will repurpose what is currently a vehicular alley to a pedestrian priority mall with enhanced paving's, appropriate landscaping and street furniture. The intent is to provide an appropriately designed, gracious and landscaped pedestrian linkage from the west entrance/exit of the Bruce Pitman Center to the main campus.

## DESIGN CONCEPT
