

ICCU Arena

The ICCU Arena will be a 66,000 sq ft, 4,000 seat state-of-the-art arena that will serve as the home for Vandal Basketball, academic activities and community events. The arena is constructed with Idaho wood products using mass timber construction. The timber has been grown from Idaho trees and made into the Pacific Northwest's largest wood-engineered structure. The 854 beams weigh a combined 442 tons and the largest is 58 feet long. More than that, it is a true partnership with the forest products industry that contributes more than 31,000 jobs and \$2.2 billion to the state's economy each year. Expected completion is summer of 2021. Go to uidaho.edu/iccu-arena for more information on this project including live video of the construction site and a time-lapse video of the construction progress.
