

Menard Law Building

The Menard Law Building was completed in 1971/72. The east entry is comprised of a set of monumental steps flanked by clay brick masonry planters. These masonry systems of planters have deteriorated over time. The intent of this project is to retain the character of the Menard Law Building Entry by renovating the steps, planters, handrails and the lighting systems. In addition, the project will include a sidewalk and ramp to provide universal access to this entrance of the building. Construction is expected to be Fall 2020.
