Wood Boiler Performance

- **Steam from wood**
- **Wood Consumed**

Wood Boiler Performance Graph - Axes: Steam Produced (1000s of pounds) vs. Year (2002-2019)

- **Wood Consumed**
  - Steady increase from 2002 to 2004
  - Drop in 2005
  - Steady rise to peak around 2007
  - Minor fluctuations from 2008 to 2019

- **Steam from wood**
  - Steady increase from 2002 to 2004
  - Steady rise to peak around 2007
  - Minor fluctuations from 2008 to 2019

**Key Points**
- Significant increase in wood consumed and steam produced from 2002 to 2004.
- Peak production of steam from wood and wood consumed around 2007.
- Minor fluctuations in production and consumption from 2008 to 2019.

**Notes**
- The graph indicates a generally increasing trend in both wood consumed and steam produced from wood from 2002 to 2019.
- The year 2004 shows a significant increase in both metrics compared to the previous years.
- The year 2007 has the peak production for both wood consumed and steam from wood.
- The years 2008-2019 show minor fluctuations with steady overall trends.
