Adding the ILJLC Printer for macOS

1. Click on the Apple menu icon and then click System Preferences...

2. Select the Print & Fax icon.
3. Select the '+ (add)' button to add a new network printer.
4. The window to add a printer will appear. The advanced option icon will need to be added to the toolbar. To do this, hold down the `ctrl` key and click on the grey area at the top of the window. In the drop down menu select **Customize Toolbar…**
5. Click and drag the **Advanced** icon to the toolbar, then select the **Done** button to continue.
6. Click on the Advanced icon in the toolbar. Select Windows as the connection type and in the URL field enter the following: path for the

**URL:** smb://print1.its.uidaho.edu/Law-ILJLCStudent
7. Click on the **Please select a driver or printer model** and select **Generic PCL Driver**.
8. When all of this is setup correctly please click on the **Add** button to install the printer.

When the printer is added to the local computer, print a test page to make sure the printer was installed correctly. It will ask for your Net ID when you print (ad\wand1234). If you are unable to add a printer or have problems printing, please contact us.

**Please Note: There is not currently a guarantee that Macintosh systems will work with ITS printers**
