**Summary of Student Learning:**
The number of students reported on in this category is 558.

Students in Outcome 1 met or exceeded the outcome at the 73rd percentile (49.73% exceeded and 23.7% met the expectations of the faculty). Students in Outcome 5 met or exceed the outcome at the 67th percentile (51.08% exceeded and 15.59% met the expectations of the faculty). While both are borderline but acceptable thresholds, an eye should be kept on future Outcomes as I feel a good benchmark is the 75th percentile for all general education classes and the 80th percentile is the aspirational benchmark established for all Gen Ed programs.

**Summary of Faculty Discussion:**
This report was shared with University Committee on General Education prior to the filing of the report. There were no comments or corrections to the Summary Findings.

**Summary of Changes/Improvements Being Considered:**
It was determined by the University Committee on General Education in consultation with the Director of General Education that a determination of evaluative rotation for learning outcomes should be establish within each GEM area. In addition, the director of general education will consult with Communications on the slightly troubling findings in light of nominal and aspirational benchmarks.

**Inter-rater Reliability:**
Since courses in general education utilize multiple educators, over multiple disciplines, with multiple assessment strategies, a method for inter-reliability outside of singular disciplinary courses with multiple sections (e.g. English 101 & 102) this cannot be established immediately. The University Committee on General Education will explore this topic.

**Closing the Loop:**
As this is the establishment of a baseline in the new assessment system there is nothing to report as a closure in this GEM area. However, all areas are continuing to approve, remove, or adapt curriculum through the University Committee on General Education process and Through the University Curriculum Committee for either efficiency or to align with changing State Competencies for the GEM areas.

**Quality Assessment Feedback:**
