

Dr. Scott Snyder is currently Professor of Biological Sciences at Idaho State University. He previously served for five years as ISU's Dean of the College of Science and Engineering and also served the institution as interim Vice President for Research. Prior to his time at ISU, Snyder was Chief Research Officer at the University of Nebraska Omaha for nearly eight years. For five of those years, Snyder also held the position of interim Executive Director of the University of Nebraska System's Peter Kiewit Institute. Snyder first joined UNO in 2001 as a faculty member in the Department of Biology. During his time at UNO, Scott also served for two years as a Program Director with the National Science Foundation. Dr. Snyder previously held a faculty position at the University of Wisconsin Oshkosh and was an NSF/Alfred P. Sloan Postdoctoral Fellow in Molecular Evolution at the University of New Mexico. His career has been dedicated to finding opportunities for students in and outside of the classroom and in supporting faculty in their research and teaching endeavors. Snyder earned his Ph.D. at the University of Nebraska-Lincoln, where he also earned his B.S. in biology. His M.S. comes from Wake Forest University.
