

College of Science Academy of Distinguished Alumni

Purpose: The College of Science Academy of Distinguished Alumni Award recognizes individuals who have brought honor and distinction to the College of Science through extraordinary professional accomplishments.

Nature of Recognition: The award normally will be presented in conjunction with the fall College of Science Advisory Board meeting. It will consist of a plaque presented to the recipient and addition of the recipient's name to a plaque in the dean's office. After the induction of the first two groups of honorees, there normally will be a limit of two awardees per year. However, the dean may elect to increase the number of awardees in any given year if necessary.

Selection: The CoS Alumni Board will make the selection of the recipients.

Criteria:

- Must be a graduate of a department or program currently housed in the College of Science or a very closely related program.
- Must have a career in science, mathematics, or related field.
- Must have an exceptional record of professional accomplishment in their field.
- May not be a current advisory board member.

Nominations: Nominations for current year awards are due June 1; however, nominations will be accepted throughout the year. Nominations received after June 1 will be held for the following year. Nominations should include a nomination letter (limit 2 pages including full name, title, contact information for nominee, as well as a description detailing the nominee's achievements as they relate to the criteria above), two or three letters of support, and a brief curriculum vitae or resume (limit 5 pages). Nominations will be accepted from faculty and staff, alumni, friends, and CoS Advisory Board members.

Electronic nomination packets are preferred. Submit nominations to Eric Bennett at ebennett@uidaho.edu. Nomination packets may also be mailed to:
