15th ANNUAL

JUNE 17-19, 2025
COEUR D’ALENE, IDAHO

SEPTEMBER 16-18, 2025
WASHINGTON, DC

ENERGY EXECUTIVE
SUMMIT

JUNE 17-19, 2025, COEUR D’ALENE, IDAHO

SEPTEMBER 16-18, 2025, WASHINGTON, DC

“The Summit is an excellent forum on the latest energy industry trends through an informed and knowledgeable set of speakers and a highly engaged group of attendees — very well done with great customer focus!”

Tom O’Brien, Senior Vice President and Chief Information Officer,
PJM Interconnection, LLC

The Premier
Executive Forum
for Energy Leaders

“The Summit provides an invaluable platform for the discussion of challenges we are all facing and is an excellent opportunity to network.”

James Blanton, Director, Distribution Engineering, Oncor

Leading Dynamic

TRANSFORMATIONAL CHANGE

The Summit is a three day executive forum designed specifically for energy leaders to discuss current trends and issues the industry faces, hear from top industry leaders, and expand networking opportunities.

KEYNOTE SESSIONS

Changing Energy Landscape

Leading expert David Groarke discusses significant trends reshaping the energy industry and how companies are navigating policy objectives, the digital economy, and customer needs.

Strategic Trends in Consumer Engagement

Thought leader Greg Guthridge examines how technology advances are powering new ways to engage consumers in the increasingly diverse energy ecosystem.

The Power Grid of the Future

Recognized energy innovator, leader, and technologist Raiford Smith discusses how sustainable solutions in technology, energy efficiency, and renewables are advancing new products and business models and transforming the power grid.

Climate Impact: Stakeholders, Resilience, Affordability, and Risk

Leading expert and visionary Grant Dougans explores how utilities are managing climate impact across diverse stakeholders such as investors, customers, and activists while maintaining a focus on resilience and affordability.

FIRESIDE CHATS

CFO Discussion — Managing Risk While Investing in the Future

A utility CFO and an investment banker engage in a dynamic dialogue about how changing policies, new technologies, and changing customer needs and expectations are impacting investment decisions, Wall Street perceptions, and the ability to raise capital.

New and Emerging Technologies

Two utility thought leaders discuss moving to a decentralized grid. Topics include key risk drivers, challenges integrating clean technology, and emerging game changing technologies.

Stakeholder Engagement

A panel of industry leaders discuss the critical role of stakeholder engagement in the changing dynamics of keeping the lights on. Topics include evolving customer needs and preferences, new and emerging technologies, and infrastructure siting and permitting challenges.

Strategically Designed

EXECUTIVE FORUM

“The energy industry is changing dramatically, and the Energy Executive Summit gives you a chance to learn what’s happening across the country. When you leave the Summit, you have a better grasp of some of the challenges, the opportunities, and potential solutions that you can apply in your own company.”

Daniella Piper, Executive Vice President and Chief Innovation Officer, New York Power Authority

Unparalleled

KNOWLEDGE AND EXPERTISE

Business Intelligence Panel — Leading the Digital Transformation

A panel of industry CIOs discuss the opportunities and challenges of the digital transformation. Topics include investing in new technologies, launching new products and services, and cybersecurity.

Legal and Regulatory Issues Panel — Evolving Business Models

A panel of industry officers explore the legal and regulatory issues facing utilities in today’s marketplace. Topics include decarbonization, extreme weather events, community energy, microgrids and storage, and changing customer needs.

Operations Panel — A Distribution System in Transition

A panel of operations officers discuss the challenges of operating and coordinating a more complex grid with more information, distributed resources, and diverse customer expectations. Topics include integrating clean technology, balancing supply and demand, and enabling more flexibility and responsiveness.

CPO and Supplier Panel — Supply Chain Strategies

A panel of utility CPOs and industry executives discuss supply chain challenges and best practices. Topics include managing strategic goals, risk, forecasting, line of business engagement, and best practices in communication, efficiency, and cost control.

Strategic Human Resources Panel — Building a Future-Ready Workforce

A panel of chief human resource officers examine challenges in the energy industry and the impact on the workforce. Topics include culture and engagement, talent acquisition and management, and partnering with leadership to develop and build teams for the future.

Fire and Ice Panel — Climate Impact

A panel of industry executives discuss the impact of extreme weather events and how utility management teams are navigating these everevolving challenges. Topics include financial risk to utilities due to increased operating costs, asset damage, legal liability, and ratepayer fatigue.

CEO Panel — Pathways to the Future

A panel of industry CEOs discuss leading in a time of transformational change. Topics include reliability, affordability and capacity, resiliency and extreme weather events, increasing stakeholder expectations, and evolving regulation and policy.

First-Class

PROFESSIONAL NETWORKING

“The Summit hit it out of the park! The topics, venue, and organization were stellar.”

Anne Jones, Vice President and Chief Human Resources Officer, MDU Resources
