Appendix D. Site-specific fishway entrance efficiency

Table D8. Fishway entrance efficiency metrics for radio-tagged Pacific lamprey at **Ice Harbor Dam fishway openings** in 2005-2010. Total approaches = total number of fishway approach events; Total entries = total number of fishway entry events; Unique approaches = number of unique fish that approached opening; Unique entries = number of unique fish that entered opening. Fish were tagged at McNary Dam and released below McNary Dam or Ice Harbor (IH) Dam.
