

This table includes minimum formal training requirements mandated by applicable regulations. The training may be web-based or available as instructor-led class. Some courses are available in both formats, depending on your situation and number of people that need the course.

Additional training topics may be appropriate based on unique department, task, or employee needs. In all cases, Environmental Health and Safety (EHS) general training must be accompanied by job/task-specific training from the supervisor or designee. Our website provides supplementary written materials on many EHS-related topics. EHS is available to provide supervisors with assistance in determining job/task-specific training and additional training resources upon request.
