

GARDENING: VEGETABLES

(Click on the **publication title** to view and or print.)

<p><u>Grow Your Own Beans and Peas</u></p>	<p>Describes the types of beans and peas that fare well in the Pacific Northwest and how to grow them. Drawings illustrate a variety of bean and pea supports.</p>
<p><u>Management of Vegetable Diseases in Home Gardens</u></p>	<p>Gives six practices to help you keep garden plants healthy, from disposing of plant residue at season's end to the occasional use of pesticides.</p>
<p><u>Planning an Idaho Vegetable Garden</u></p>	<p>Four gardening experts provide successful gardening methods. Discusses site selection, garden layout, weed and insect control, and crop by crop planting instructions. Also contains a thorough list of related gardening publications. Reviewed in <i>Sunset</i> magazine as "a great new booklet to help beginning gardeners."</p>
