

# LANDSCAPES AND LAWNS

(Click on the **publication title** to view and or print.)

<a href="#"><u>Landscaping and Utilities: Problems, Prevention, and Plant Selection</u></a>	<p>Without careful planning and plant selection prior to planting, trees and shrubs can become a nuisance and a dangerous and costly problem for homeowners and businesses. This publication has information on planting near surface and overhead utilities, planting near underground utilities, local and state ordinances, recommended species, and plant hardiness.</p>
<a href="#"><u>Ornamental Grasses for Idaho Landscapes</u></a>	<p>Ornamental grasses are becoming irreplaceable landscape elements in many parts of the United States and are increasingly popular in Idaho. This publication lists the best grasses for Idaho's USDA zones, and it offers help in planning for, planting, and caring for ornamental grasses in your home landscape.</p>
<a href="#"><u>Southern Idaho Fertilizer Guide: Lawns</u></a>	<p>Fertilization done incorrectly can result in diseased lawns, weedy lawns, or lawns that adversely impact water quality. This guide is for homeowners who wish to improve the quality of their lawn through proper fertilization strategies, application amounts, and application timing.</p>
<a href="#"><u>Starting A Home Lawn</u></a>	<p>From preparing the site to caring for a freshly sprouted lawn, this publication explains how to establish a new lawn from seed or sod. Describes the characteristics of various turf grass types and lists cultivars suitable for Idaho lawns</p>
<a href="#"><u>Watering Home Lawns and Landscapes</u></a>	<p>Learn how to conserve water in your landscape, including how to determine sprinkler application rate, how to decide how much to water and when, and how to use the feel and appearance method to judge when your lawn is thirsty.</p>
