# Women in Idaho Science and Engineering (WiiSE) in the Residence Halls

## WiiSE Hall Living

The WiiSE Hall gives students the opportunity to live, learn and experience college in a community passionate about education for women in science, technology, engineering and mathematics (STEM). Living in a community with other students in similar programs can be extremely rewarding! Your floor will be filled with like-minded students who share similar interests and classes.

## WiiSE Hall Features

The WiiSE community is located on the 9th floor of Theophilus Tower. This first-year option for women, is directly adjacent to a Women's Honors floor and two Men's Engineering floors where there will be opportunities for collaboration and support.

Hall features include:

- Vandal Edge Program (focused on first-year involvement)
- Common lounge spaces & two private study rooms.
- Internet, laundry, mini-fridge, and microwave included in room
- Computer lab with printing access

## WiiSE Hall Involvement

Get connected to female faculty and students from different STEM disciplines! This community features WiiSE specific programming where students form lifelong friendships and networks. You will have a Resident Assistant majoring in a STEM discipline living in the hall to help connect you to great resources and the college.
