Accurate two-nucleon forces have been constructed at next-to-next-to-next-to-leading order (N³LO) and applied to nuclear few and many body systems. I will give a short introduction to chiral EFT and show how nuclear forces emerge in this framework together with some results. I will finish with remarks on multi-nucleon forces and open problems.

[Today's Register](#) is a publication of the University of Idaho designed to share policy issues, news and events with the campus community. As the primary communication medium for official information, it is delivered to all faculty and staff via e-mail daily during the work week. This publication only prints items of University interest. Events must be sponsored by official University units or organizations. All material is subject to editing according to space, style and policy requirements.
