9:00 am—3:45 pm

Sign-in begins at 8:30 am
Current Topics in Farm & Forest Health: Climate Change

Program Description
A variety of factors can affect forest, range, and crop-land health. Current Topics is an annual program that provides landowners and managers with some of the latest information on issues that impact the achievement of land management goals.

This year’s program will focus on climate change. Topics will include the implications of climate change for pests and diseases of agricultural crops, cattle and livestock grazing systems, the spread and control of invasive plants (weeds), and forest insects—all with a focus on our area. The program will begin with an introduction to the topic of climate change, and some of the expected effects of climate change.

Program Agenda
8:30 am  Sign-in
9:00 am  Welcome & Introduction, Bill Warren, UI Extension
9:10 am  The Ecological & Social Context for Considering Climate Change Impacts to Our Area, Bill Warren, UI Extension
10:00 am Implications of Climate Change for Pests & Diseases of Dryland Crops in the Inland Northwest, Doug Finkelnburg, UI Extension
11:00 am Break
11:20 am Climate Change & Tree Mortality From Bark Beetles & Other Forest Insects in Native Conifer Forests of the Inland Northwest, Erika Eidson, Idaho Department of Lands
12:20 pm Lunch (on your own)
1:30 pm Climate Change Impacts on Livestock & Grazing Systems in the Inland Northwest, Shannon Neibergs, WSU Extension
2:30 pm Climate Change & the Spread & Control of Invasive Plants, Tim Prather, UI Extension
3:30 pm Wrap-Up/Evaluations/Credit Distribution
3:45 pm Close

Registration
Current Topics in Farm & Forest Health: Climate Change will be held on
Thursday, December 13, 2018
Ponderosa Restaurant Conference Room
220 Michigan Ave.
Orofino, ID

Registration and payment due by:
Monday, December 10, 2018
$15.00 per person registration fee.
