Introduction

Congratulations on your appointment as a teaching or research assistant! Your new position will help develop and improve your professional skills during your time at the University of Idaho.

This handbook is a guide to UI policies and procedures that pertain to your new assistantship position. Keep in mind that your department may have further rules and regulations that you should also review.

The University of Idaho offers two different kinds of assistantships, one provides an opportunity to teach and instruct while the other provides an opportunity to conduct research.

Teaching Assistant
Assistants who provide primary teaching responsibilities, grading assignments, assisting with the delivery of instruction through technology, and providing other assistance related to instruction under the active supervision of a member of the university faculty are teaching assistants. A teaching assistant helps students learn and grow at the University of Idaho.

Research Assistant
Research assistants develop competence in performing professional-level work in support of research, scholarship, or creative activity. A research assistant position allows you study the issues you are passionate about as well as receive the chance to publish with renowned faculty. It is UI policy that all research be conducted in an ethical manner. For more information regarding UI’s research policy, please visit review chapter five of the Faculty Staff Handbook found online at www.webpages.uidaho.edu/fsh.

Assuming the responsibilities of a teaching or research assistant (TA or RA, respectively) is no small task. You were chosen for this position because we believe you have the aptitude to balance your work and education.

Appointment Policies and Procedures
TAs and RAs are graduate students who are appointed based on a high standard of performance in teaching or research and a significant potential for sustained achievement in their field of study.

Criteria for Appointment
Assistantships are open to domestic and international students who are regularly enrolled students in the College of Graduate Studies (CoGS). Students in the provisional or unclassified enrollment category are not eligible to receive assistantships.

Departments considering selecting a TA or RA must base the appointment on an evaluation of potential student’s standard of performance and academic credentials. It is UI policy to prohibit and eliminate discrimination on the basis of race, color, national origin, religion, sex, sexual orientation and gender identity/expression, age, disability, or veteran status.
Terms of Appointment
A TA/RA offer of appointment must be in writing and signed by the student. Verbal agreements between a faculty member and student do not constitute official offers of appointment. Students should not conduct any TA/RA job duties until they have received an official appointment letter. Examples of TA/RA offer letters can be found on the CoGS website.

You are required to sign a Patent and Copyright Agreement for University of Idaho Employees. A copy for your signature will be enclosed in your offer letter.

Terms of Employment
Background Check
Your appointment is contingent on the successful completion of a criminal background check, and you may not begin work until the background check is approved by Human Resources. Shortly after your department receives a signed offer letter and terms of employment, you will receive an email from HireRight Customer Support with instruction for you to complete a brief online application to initiate the background check. The University pays all background check fees.

It is strongly recommend that you wait for the results of the background check to come back clear before committing any financial resources of your own. The University will not reimburse you for any expenses if the outcome is unsuccessful. Background checks are usually completed within two weeks after you initiate the process.

Health Insurance
The University of Idaho requires that TAs and RAs submit proof of valid personal health insurance coverage as a condition of appointment. You can provide proof of insurance before the first day of the semester through VandalWeb. If you do not have health insurance you may enroll in the Student Health Insurance Program (SHIP). Visit www.uidaho.edu/shs to learn more.

Payroll
You will need to visit Human Resources (HR) at 415 W. Sixth Street to complete your payroll paperwork within three days of the start of the semester to ensure timely receipt of your first payroll check and to comply with federal regulations. Please bring forms of identification with you to establish your identity, employment eligibility, and social security number. For examples of acceptable documents please check with HR in advance. If you have any questions regarding payroll sign-up, visit www.uidaho.edu/hr or e-mail employment@uidaho.edu.

Compensation
Compensation for teaching assistants will vary across departments. Your stipend is provided by your department and if you are an out-of-state student, your out-of-state tuition waiver comes from the College of Graduate Studies.
**Enrollment**

Typically, TAs and RAs are responsible for paying for their in-state tuition fees. Full-time TAs and RAs are required to pay the uniform student fees and tuition charged to registered full-time students, regardless of credits for which they registered. Part-time assistants need only pay for the credits in which they are actually registered for. Nonresident tuition will be waived for persons holding full appointments and a pro rata portion of nonresident tuition will be waived for persons holding partial appointments.

Students on an assistantship cannot use a staff or staff spouse fee waiver or senior scholar waiver.

Research fellowships are awarded by various colleges. Research conducted on fellowships may or may not be used for dissertation purposes. Credit enrollment and stipends vary according to the particular fellowship. Fees and tuition are charged, but in some cases may be remitted, depending on the type of fellowship and the availability of funds. Inquiries should be addressed to the department in which you receive your assistantship from.

**Trainings**

As a requirement of Human Resources and the College of Graduate Studies, your full-time or part-time assistantship position is contingent upon completion of the mandatory Teaching/Research Assistant Institute. The Institute is designed to improve the quality of your teaching and assistantship experience. The Institute will be held every year on the Moscow campus in the beginning of the Fall, and occasionally Spring semesters.

Exceptional or emergency circumstances that preclude attendance at the Fall or Spring workshop must be petitioned to the College of Graduate Studies, (call 208-885-6244 or email uigrad@uidaho.edu).

All international TAs must register for INTR 508, Teaching and Learning Strategies for International Teaching Assistants. There will be required workshops attached to this course throughout the Fall or Spring semester.

**Inclusive Workplace**

The University of Idaho is committed to providing a community free of discrimination or harassment. We want to ensure a positive learning, working, and living environment for all members of our university community. University employees are federally mandated under Title IX to learn about their responsibilities as mandatory reporters of gender-based harassment. Part of our institutional responsibility is to provide training to understand our responsibilities to help recognize, prevent and respond to situations like sexual or other types of harassment or discrimination of any kind.

All Teaching and Research Assistants must complete the University of Idaho Compliance Training. Follow the web address below to complete the training. You will need to submit a copy of your completion to the College of Graduate Studies. [www.uidaho.edu/pdl_portal](http://www.uidaho.edu/pdl_portal)
Responsibilities

**Teaching Assistants** may be responsible for lecturing, tutoring, proctoring exams, grading assignments, leading discussion groups, creating engaging class activities, holding office hours, answering student’s questions, or assisting in a lab. TAs will work under the direct supervision of a UI faculty member and provide any instructional assistance they might require. Your department or faculty supervisor will provide more information on what exactly will be expected from you.

**Research Assistants** are primarily responsible for conducting research but they may also administer experiments or carry out other creative activities, depending on the needs of the department and faculty supervisor. Please contact your department or faculty supervisor for more information regarding your specific requirements.

Workload

TAs and RAs are appointed as a .50 FTE. This means your teaching or research responsibilities are 50% of your total effort, allowing for the remaining 50% dedicated to your personal coursework and academic responsibilities. By policy (FSH 1565H2), the duties of a TA or RA should not exceed, on average, 20 hours per week.

The time devoted to the assistantship may vary from day to day and week to week, given the fluctuation of demands during the typical semester, but the total workload for the semester should not exceed the cumulative average. Furthermore, a TA or RA should never work more than 8 hours a day or more than 40 hours a week, and deviations to the 20-hour standard should be kept to a minimum. If you find that you are consistently working more than 20 hours a week, consult with your faculty supervisor or department administrator. It is important that you have adequate and sufficient time to focus on your degree pursuits.

Satisfactory Performance

Continuation of the assistantship after the first semester is contingent upon satisfactory academic performance, satisfactory teaching and/or laboratory performance, progress toward your degree, and abiding by the program and University’s policies and procedures. Satisfactory performance will be determined by your faculty supervisor. UI policies are available on-line in the Faculty-Staff Handbook at [www.webpages.uidaho.edu/fsh](http://www.webpages.uidaho.edu/fsh). Department policies are available on your department’s webpage.

Tips for Success

To avoid crisis situations, begin the semester by creating some rules for yourself. Below are some examples but feel free to come up with your own priorities and make sure to write them down so you will stick to them.

- Be willing to ask for help as the semester progresses, if you find yourself consistently behind with both your graduate work and your teaching or research responsibilities, it is time to reassess your methods. Speak to your faculty advisor or TA/RA supervisor about your problem.
Don’t forget that your greatest responsibility is to your graduate program. Thinking practically, you must realize that your TA or RA position is dependent upon the successful completion of your own courses.

**Time Management Tips**

- Do not let the work pile up. Free time is often difficult to find once the semester gets underway. Keep a steady pace so you won’t be overwhelmed.
- Rank all tasks in their order of importance, which will give you a realistic perspective.
- Make an outline of all deadlines you must meet during the semester. This way you can determine what is due and what you can delay quickly.
- Enter all tasks and deadlines in a date book or calendar. Looking at this date book daily will allow you to maintain a realistic notion of what remains to be done. Flag important dates in the calendar, and write a reminder in your calendar before the due date for each task, allowing yourself enough lead-time to complete it.
- Each evening, make up a prioritized “to-do” list for the next day. Each morning, before you begin your work, go over this list to plan your day, starting with the most critical tasks first.
- Consider creating a wall chart with critical tasks and dates marked. Post it over your desk so that you can read it every day.
- Use project-management software on your computer to schedule critical tasks and dates.

**Be Accommodating**

Reasonable accommodations are available for students who have documented temporary or permanent disabilities. All accommodations must be approved through Disability Support Services, located in the Idaho Commons Building, Room 306, in order to notify your instructor(s) as soon as possible regarding accommodation(s) needed for the course. Contact DSS at 208-885-6307, email dss@uidaho.edu or go to [www.uidaho.edu/dss](http://www.uidaho.edu/dss).

**Conducting Laboratory Sessions**

A laboratory session encourages active learning. These sessions give students a chance to work with and talk to each other, experiment, explore, discuss, reflect and draw appropriate conclusions from their work. Some lab sessions aim to acquaint students with practical skills and techniques relevant to the discipline whereas others may focus on the development of skills in scientific inquiry. TAs and RAs may be required to hold a laboratory session. If you are required to hold one, please keep the following tips in mind.

**Prepare Ahead**

- Get notes and other preparatory materials together ahead of time.
- Preview textural materials and lab manuals.
Discuss lab session expectations with lecturer beforehand.

Find out where essential supplies are stored and ascertain who is responsible for ordering them.

Know how to cope with equipment breakdown.

Perform any experiments at least once in advance to ensure they work correctly and safely.

Safety Procedures

Familiarize yourself with proper emergency and safety procedures for the lab. Note where to go in case of a fire alarm.

Sign up for the University of Idaho emergency notification system, Vandal Alert on VandalWeb. For more information please call 208-885-2254.

Seek help when you are unable to deal with an emergency situation or potential danger.

Coaching

Provide clear and complete instruction at the very beginning of the lab session.

In case of difficulties, avoid jumping right in and completing the task for the students. Instead, use process questions to help students identify their own problems and solve them. This will help students develop vital scientific inquiry skills.

Get the whole group together for debriefing.

Avoid lecturing, but instead summarize what the students have learned and highlight major discussion points.

Try to break down the demonstration (of equipment, the experiment process or both) into several meaningful steps.

Explain and emphasize the main points. It is very desirable to check understanding from students by asking relevant questions or inviting a few to try on the equipment.

During the session, you may ask process questions like:
- How did you begin?
- Where did you first experience difficulty?
- Are there other options available to you?

Post-lab Feedback

Jot down notes for future improvement.

Share notes with faculty, technicians and other researchers.
Campus Resources

- Academic Support and Access Programs: Commons 306; (208) 885-6307
- Campus Copy Center: Commons, 1st floor; (208) 885-7377
