

# Gardening, Fruits & Berries

(Click on the **publication title** to view and/or print.)

<a href="#"><u>Growing Raspberries &amp; Blackberries</u></a>	Raspberries and blackberries have similar growing requirements and offer a market advantage to commercial growers, providing local customers with high-quality fruit. This publication covers selecting a growing site, designing plots, selecting plants, planting, irrigation, fertilization, pruning, weed control, winter protection, pest and disease control, harvesting, and storage.
<a href="#"><u>Growing Blueberries</u></a>	Highbush and lowbush blueberries are native to North America and can be harvested 2-3 years after planting. This publication covers selecting a growing site, recommended cultivars, preparing the site, planting, irrigation, fertilization, pruning, weed control, pest control, and disease control.
<a href="#"><u>Growing Strawberries</u></a>	Covers selecting a growing site, recommended cultivars, preparing the site, planting, training, irrigation, fertilization, weed control, winter protection, pest and disease control, harvesting, and storing.
<a href="#"><u>Training and Pruning Your Home Orchard</u></a>	Provides general rules for training and pruning fruit trees and explains how to apply the basics in fruit and nut trees ( <i>apple, pear, sweet and sour cherry, peach, prune, plum, walnut, filbert, and apricot</i> ).
<a href="#"><u>Backyard Grapes</u></a>	This publication is a guide for growing grapes at home for use in juice, jams, jellies, and frozen products. Information includes variety selection, site selection, constructing the trellis, training and pruning American grapevines, fertilization, spring frost protection, and harvest.
